A Delicate Choreography David Sabeau, 2023-10-24 The origins of the incest taboo have puzzled many of the most influential minds of the West from Plutarch to St Augustine St Thomas Aquinas Martin Luther David Hume Lewis Henry Morgan Sigmund Freud Emile Durkheim Edward Westermarck and Claude Lévi Strauss This book puts the discussion of incest on a new foundation It is the first attempt to thoroughly examine the rich literature from philosophical theological and legal treatises to psychological and biological genetic studies to a wide variety of popular cultural media over a long period of time The book offers a detailed examination of discursive and figurative representations of incest during five selected periods from 1600 to the present The incest discussion for each period is complemented with a presentation of dominant kinship structures and changes without arguing for causal relations Part I deals with the legacy of ecclesiastical marriage prohibitions of the Middle Ages Historians dealing with the Reformation have wondered about the political and social implications of theological debates about the incest rules the Enlightenment opted for sociological considerations of the household and a new anthropology based on the passions Baroque discourse focused upon sexual relations among kin by marriage while Enlightenment and Romantic discussions worried the intimacy of siblings The first section of Part II deals with the six decades around 1900 during which European and American cultures obsessed about the sexuality of women Almost everyone concurred in the idea that mother made the family what it was that she configured the household kept the lines of kinship vibrant and stood at the threshold as stern gatekeeper and many thought that she managed these tasks through her sexuality and an eroticized relationship with sons Another story line taken up in the section Intermezzo this one about the physical and mental consequences of inbreeding appeared after 1850 To what extent do close kin marriages pose risks for progeny At its center lay the incest problematic now restated Is avoidance of kin genetically programmed Do all cultures know about risks of consanguinity As for the twenty first century evolutionary and genetic assumptions are challenged by a living world population containing roughly one billion offspring of cousin marriages Part III deals with one of the perhaps most remarkable reconfigurations of Western kinship in the aftermath of World War I The shift from an endogamous to an exogamous alliance system centered on the nuclear family An historical anomaly this family form began to dissolve almost as soon as it came together and in the process shifted the focus of incest concerns to a new pairing father and daughter By the 1970s when the father daughter problematic swept all other considerations of incest aside that relationship had come to be modeled for the most part around power and its abusive potential As for incest its representations in the last three decades of the twentieth century no longer focused on biologically damaged progeny but rather on power abuses in the nuclear family sexual abuse By the mid 1990s Western culture at least partly redirected its gaze away from father and daughter towards siblings especially towards brothers and sisters and the sexual boundaries and erotics of their relationships Correspondingly siblings became a model organism for psychotherapy evolutionary biology and

the science of genetics The ^AMaking of DSM-III® Hannah Decker PhD,2013-03-29 The Making of DSM III chronicles how American psychiatry went from its psychoanalytic heyday in the 1940s and 50s through the virulent anti psychiatry of the 1960s and 70s into the late 20th century descriptive criteria grounded model of mental disorders Decker s revealing book expertly recreates the stone by stone construction of a controversial conflict laden diagnostic manual and showcases the remarkable and tenacious handiwork of its creator Robert L Spitzer **A New Family Bible, and Improved Version ...**

Regulating Family Responsibilities Jo Bridgeman, 2016-04-08 This collection brings together some of the most eminent and exciting authors researching family responsibilities to examine understandings of the day to day responsibilities which people undertake within families and the role of the law in the construction of those understandings The authors explore a range of questions fundamental to our understanding of responsibility in family life To whom and to what ends are family members responsible Is responsibility primarily a matter of care Can we fulfil our family responsibilities by paying those to whom we owe responsibility Or by paying others to fulfil our caring obligations for us In each of these circumstances the chapters in this collection explore what it means to have family responsibilities what constitutes an adequate performance of such responsibilities and the point at which the state intervenes At the heart of this collection is an interest in the way in which the changing family affects people's perception and exercise their family responsibilities and how the law attempts to regulate and understand those responsibilities The essays range across intact and separated or fragmented families from lone and shared parenting in single homes to caring across households and even across international boundaries to reflect on the actual caring responsibilities of family members and on the fulfilment of financial responsibilities in families This collection seeks to advance our understanding of the attempts of the law and its limits in regulating the responsibilities which family members take for each other

The Psychosocial Interior of the Family Gerald Handel, 1972

Women, the Family, and Policy Esther Ngan-ling Chow, Catherine White Berheide, 1994-06-07 The authors highlight how structural circumstances in countries with various degrees of industrialization are associated with specific policies The analyses of women's experiences reveal the variety of ways in which private patriarchy in families combines with public patriarchy in economies and states to create a system of domination which subordinates women The authors detail how gender is constructed under specific political economic and cultural circumstances and seek to understand how state policies with differing sensitivities to women's issues have produced mixed outcomes for women and their families in the process of economic development

Family law in contemporary Iran Marianne Bøe, 2015-01-20

Passed into law over a decade before the Revolution the Family Protection Law quickly drew the ire of the conservative clergy and the Ayatollah Khomeini in 1979. In fact it was one of the first laws to be rescinded following the revolution. The law was hardly a surprising target however since women's status in Iran was then and continues now to be a central concern of Iranian political leaders, media commentators and international observers alike. Taking up the issue of women's status in a modern context, Marianne Boe offers a nuanced view of how women's rights activists assert their rights within an Islamic context by weaving together religious and historical texts and narratives. Through her substantial fieldwork and novel analysis, Boe undermines both the traditional view of Islamic Feminism as monolithic and clears a path to a new understanding of the role of women's rights activists in shaping and synthesizing debates on the shari'a, women's rights and family law. As such, this book is essential for anyone studying family law and the role of women in contemporary Iran.

Family Therapy Alan Carr, 2012-10-04. Now in its third edition, this highly regarded and well-established textbook includes up-to-date coverage of recent advances in family therapy practice and reviews of latest research whilst retaining the popular structure and chapter features of previous editions. Presents a unique integrative approach to the theory and practice of family therapy. Distinctive style addresses family behaviour patterns, family belief systems and narratives and broader contextual factors in problem formation and resolution. Shows how the model can be applied to address issues of childhood and adolescence e.g. conduct problems, drug abuse and of adulthood e.g. marital distress, anxiety, depression. Student-friendly features: chapters begin with a chapter plan and conclude with a summary of key points; theoretical chapters include a glossary of new terms; case studies and further reading suggestions are included throughout. **Foucault, the Family and**

Politics R. Duschinsky, L. Rocha, 2012-12-14. Drawing on the writings of Foucault, this book explores the politics and power dynamics of family life, examining how everyday obligations such as attending school, going to work and staying healthy are organized through the family. The book includes an essay by Foucault, *Les d'sordres des familles*, translated here in English for the first time. *The Annual American Catalogue 1886-1900*, 1892. **Revisiting Marie Vieux Chauvet** Kaiama L.

Glover, Alessandra Benedicty-Kokken, 2015-01-01. This issue considers the oeuvre of Haitian writer Marie Vieux Chauvet (1916-1973) as a prism through which to examine individual and collective subject formation in the postcolonial French writing Caribbean, the wider Afro-Americas and beyond. While both Vieux Chauvet and her corpus are situated in the violent space of mid-twentieth-century Haiti, her work articulates the obstacles to claiming legitimized human existence on a global scale. The contributors to this interdisciplinary volume examine Vieux Chauvet's positioning within the Haitian public sphere as well as her broader significance to understanding gendered and racialized postcolonial subjectivities in the twenty-first century.
