Pathways to Social Class Daniel Bertaux, Paul Richard Thompson, 2006-01-01 Calling for a broader new approach to social mobility research Pathways to Social Class A Qualitative Approach to Social Mobility moves beyond pure statistics to use qualitative techniques such as life stories and family case studies to examine more closely the dynamics of mobility and address more fundamental sociological questions Up to now the extensive sociological literature on mobility has been based around the survey method As a result we have access to abundant statistical data but there is little information available to explain how and why people follow particular life paths To overcome these limitations Bertaux and Thompson have developed an alternative complementary approach using life stories case histories of whole families over several generations or case studies of local communities Employing the case study approach does not prevent the identification of structural trends on the contrary it allows us to analyze those collective processes through their local effects restoring the links with classics of sociological thought Bertaux and Thompson tackle such problems as What exactly is transmitted between generations is it wealth or land occupational models or skills social networks or values and orientations What kinds of assets can immigrants draw on How can a social elite survive the upheaval of a popular revolution What is the impact of marriage on the mobility of men and women How far can belonging to one locality rather than another or choosing a particular house shape mobility paths and aspirations Do dreams of mobility matter This volume promises to inspire other sociologists towards the richly revealing and highly significant findings that a broader based approach to social mobility will enable Daniel Bertaux is the director of research at the Centre d'étude des Mouvements Sociaux of the CNRS and EHESS in Paris His many publications on social mobility and on life stories include *Destins Personnels et Structure de Classe* and *Biography and Society* Paul Thompson is a research professor in sociology at the

a contemporary relevance And while introducing the student to classical theory the authors also show how these theories illuminate present social problems Scotland's Society and Economy in Transition, c.1500-c.1760 Ian Whyte,1997-01-29 During the last twenty years there has been an explosion of new research into the development of Scotland from a small backward country on the periphery of Europe to one poised to undergo industrialisation in step with England This book provides an overview of key themes related to social change and economic development in early Modern Scotland aimed at demonstrating how this transformation occurred *Michael Young, Social Science, and the British Left, 1945-1970* Lise Butler,2020-09-02 In post war Britain left wing policy maker and sociologist Michael Young played a major role in shaping British intellectual political and cultural life using his study of the social sciences to inform his political thought In the mid twentieth century the social sciences significantly expanded and played a major role in shaping British intellectual political and cultural life Central to this intellectual shift was the left wing policy maker and sociologist Michael Young As a Labour Party policy maker in the 1940s Young was a key architect of the Party s 1945 election manifesto Let Us Face the Future He became a sociologist in the 1950s publishing a classic study of the East London working class Family and Kinship in East London with Peter Willmott in 1957 which he followed up with a dystopian satire The Rise of the Meritocracy about a future society in which social status was determined entirely by intelligence Young was also a prolific social innovator founding or inspiring dozens of organisations including the Institute of Community Studies the Consumers Association Which magazine the Social Science Research Council and the Open University Moving between politics social science and activism Young believed that disciplines like sociology psychology and anthropology could help policy makers and politicians understand human nature which in turn could help them to build better political and social institutions This book examines the relationship between social science and public policy in left wing politics between the end of the Second World War and the end of the first Wilson government through the figure of Michael Young Drawing on Young s prolific writings and his intellectual and political networks it argues that he and other social scientists and policy makers drew on contemporary ideas from the social sciences to challenge key Labour values like full employment and nationalisation and to argue that the Labour Party should put more emphasis on relationships family and community Showing that the social sciences were embedded in the project of social democratic governance in post war Britain it argues that historians and scholars should take their role in British politics and political thought seriously Motherless Families Victor George,Profesor Paul Wilding,2023-02-03 First published in 1972 Motherless Families shows how with the slow disappearance of the extended family and the support that it could offer in such situations society has found itself responsible for lone parent families The authors cover the situation of about six hundred families in the East Midlands where the father was caring for his children on his own They examine the father s feelings about his new circumstances the problems he faces and how he copes with them They look at the ways in which the social services the modified extended family and the immediate community react to the father s position They also

consider the children's adaptation to the motherless situation and their new relationships with the father or a mother substitute. In the final chapter the authors examine the ways in which social class and social values affect the definitions of social problems and the formulation of social policy. Both administrators and practitioners in the social services as well as students of related subjects will welcome the research contained in this book and will find the authors' conclusions of particular help in their approach to the problems of all types of one parent families.

Placing Friendship in Context Rebecca G. Adams, Graham Allan, 1998 A unique collection bridging social psychological and social structural research to advance understanding of friendship.

Society and Economy in Modern Britain 1700-1850 Richard Brown, 2002-11-01 For both contemporaries and later historians the Industrial Revolution is viewed as a turning point in modern British history. There is no doubt that change occurred but what was the nature of that change and how did it affect rural and urban society? Beginning with an examination of the nature of history and Britain in 1700, this volume focuses on the economic and social aspects of the Industrial Revolution. Unlike many previous textbooks on the same period, it emphasizes British history and deals with developments in Wales, Scotland and Ireland in their own right. It is the emphasis on the diversity, not the uniformity of experience, on continuities as well as change in this crucial period of development which makes this volume distinctive. In his companion title Richard Brown completes his examination of the period and looks at the changes that took place in Britain's political system and in its religious affiliations.

Understanding Inequalities Lucinda Platt, 2017-04-21 Bringing together the latest empirical evidence with a discussion of sociological debates surrounding inequality, this book explores a broad range of inequalities in people's lives. As well as treating the core sociological topics of class, ethnicity and gender, it examines how inequalities are experienced across a variety of settings including education, health, geography and housing, income and wealth, and how they cumulate across the life course. Richly illustrated with graphs and figures showing the extent of inequalities and the differences between social groups, the book demonstrates how people's lives are structured by inequalities across multiple dimensions of their lives. Throughout the text, attention is paid to how we know what we know about inequality, what is measured and how, what is left out of the picture and what implications this has for our understanding of specific inequalities. Importantly, the book also highlights the intersections between different sources or forms of inequality and the ways that bringing an intersectional lens to bear on topics can highlight and challenge the

assumptions about how they operate Designed for second year undergraduates and above this book provides an engaging overview of social stratification and challenges readers to think about how inequalities are embedded across society
