Family Context Or Client:

Solving Modern Family Dilemmas Patricia Pitta, 2014-08-13 Context is the unifying principle that guides a therapist's formulation of the modern family's presenting dilemmas, functioning relationships and attitudes. We can no longer assume that a family is comprised of a mother, father and children; the composition and systems a family operates within can be fluid and ever-changing, requiring an equally elastic model. The Assimilative Family Therapy Model is sensitive to the many unique contexts presented by the modern family and is shaped by the inclusion of necessary interventions to address the specific dilemmas of a client or family. In *Solving Modern Family Dilemmas*, readers will learn about many schools of thought and experience their integration to help heal clients through differentiation, anxiety reduction and lowering emotional reactivity. There is also no need for readers to abandon their theoretical framework; theories, concepts and interventions can be inserted into the model, enabling readers to create their own model of family therapy. End of chapter questions enable self-examination and readers are treated to references for further exploring theories, concepts and interventions. Family therapists, psychologists, social workers and mental health counselors find this book essential in their work with all clients and professors use it in courses to teach different modes of integrating theories, concepts and interventions.

Ethics and Professional Issues in Couple and Family Therapy Lorna Hecker, 2012-07-26 While on some issues, couple and family therapists have an exquisitely clear direction from professional codes of ethics, others fall under gray areas that instead rely on therapists making reasoned ethical decisions. Therapists need to develop ethical sensitivity to potential ethical issues in order to decrease their risk in practice and increase their maneuverability in the therapy room. In *Ethics and Professional Issues in Couple and Family Therapy*, Lorna Hecker and her contributing authors address various clinical scenarios that demonstrate the complex ethical situations couple and family therapists face every day. Some points discussed in this holistic book include boundary, power and privilege issues along with unique ethical issues in practicing therapy with children. Risk issues when working with potential danger, suicide and partner violence are also explored. Each chapter sensitizes readers to potential ethical issues and provides a model for ethical decision making that best promotes good on behalf of clients. Couple and family therapists will find this text an invaluable and inexhaustible resource.
