Lewis Chung, 1997 This book investigates the influence of ethnicity on the development of psychological climate perceptions and discusses the implications of this influence on diversity in organizations Cultivating individuals within corporations to value diversity may prove to be challenging since this process is a cognitive and psychological one This book regards organizational members perceptions of their organization as real and suggests that they ought to be taken as such Consequently the success of an organization s diversity efforts is contingent on the attention it pays to the perceptions that its members hold not only about human difference but also about issues of diversity within their organization It is only when members perceptions are determined that organizations should proceed to employ diversity programs Ethnicity and Family Therapy Monica McGoldrick, Joseph Giordano, Nydia Garcia-Preto, 2005-08-18 This clinical reference provides the latest knowledge on culturally sensitive practice with more than 40 different ethnic groups and demonstrates how to weave cultural information into assessment and intervention *The Invention of Ethnicity* Werner Sollors Professor of American Literature and Afro-American Studies Harvard University, 1989-03-09 This important new collection of interdisciplinary essays sets out to chart the cultural construction of ethnicity as embodied in American ethnic literature Looking at a diverse set of texts the contributors place the subject in broad historical and dynamic contexts focusing on the larger systems within which ethnic distinctions emerge and obtain recognition It provides a new critical framework for understanding not only ethnic literature but also the underlying psychological historical social and cultural forces Table of Contents On the Fourth of July in Sitka Ishmael Reed Introduction The Invention of Ethnicity Werner Sollors An American Writer Richard Rodriguez A Plea for Fictional Histories and Old Time Jewesses Alide Cagidemetro Ethnicity as Festive Culture Nineteenth Century German America on Parade Kathleen Conzen Defining the Race 1890 1930 Judith Stein Anzia Yezierska and the Making of an Ethnic American Self Mary Dearborn Deviant Girls and Dissatisfied Women A Sociologist s Tale Carla Cappeti Ethnic Trilogies A Genealogical and Generational Poetics

Santos, 2023-07-03 This book explores the importance and construction of ethnic identity among college students and how ethnicity interfaces with students interactions on campus and the communities in which they live Based on qualitative interviews with White Latina o African American and Asian students it captures both the college context and the individual experiences students have with their ethnicity through the immediacy of the students own voices The authors observe how students negotiate their ethnic identity within the process of becoming adults They identify the influences of family the importance of socio historical forces that surround students educational experiences and the critical role of peers in students ethnic identity development While research has begun to document the positive outcomes associated with diverse learning environments this study emphasizes and more closely delineates just how these outcomes come to be In addition the study reveals how the freedom to express and develop ethnic identity which multicultural environments ideally support promotes student confidence and achievement in ways which students themselves can articulate This work is distinctive in eschewing an ethnic minority perspective through which Whites are the primary reference group and the standard from which all ethnic and racial identity processes evolve as well as in considering the influences that growing up in a multi ethnic context may have on ethnic identity processes particularly where the other is not White This perspective is particularly important at a time when students entering universities are more likely to come from highly segregated high school environments and will confront ethnic and social differences for the first time in college This book is intended as a resource for researchers and practitioners in psychology and higher education It offers insights for student affairs and higher education administrators
