## **Family Political Economy And Demographic Change The Transformation Of Life:**

**Family, Political Economy, and Demographic Change** David I. Kertzer, Dennis P. Hogan, 1989 Family Political Economy and Demographic Change represents an unprecedented interdisciplinary effort to discover how changes in family life and demographic behavior actually occurred in this crucial period and how people's lives were affected The book takes issue with a number of the most influential demographic and sociological theories dealing with the evolution of the Western family and the factors responsible for fertility decline As in so many other parts of Europe the northern Italian community of Casalecchio experienced massive social and economic changes in the nineteenth and early twentieth centuries Characterized by sharecropping agriculture and large complex family households the community faced the effects of industrialization urbanization and dramatic political change Making use of unusually rich archival sources to reconstruct the lives of 19 000 people who lived in Casalecchio during this period Kertzer and Hogan challenge many current generalizations regarding the emergence of modern European society *Birth, Death, and Religious Faith in an English Dissenting Community* Albion M. Urdank, 2015-12-17 This study lies at the intersection of three principal areas of social history demography religion and quantitative methods It is a microanalysis of an English population at the level of the Anglican parish during the era of the evangelical revival which includes unusually Protestant dissenters from the Established church in this case Particular Baptists who were moderate Calvinists It goes a step beyond previous studies by giving Anglicans and Dissenters co equal status in a comparative demographic analysis and by demonstrating how religious values informed procreative activity It does so through a combination of advanced statistical methodologies and an innovative treatment of data collection forms as readable texts The study concludes that the likelihood of another birth increased following a religious conversion experience especially among both Anglican and Baptist wives following marriage Mortality too had a less constraining effect on procreative activity which in conformity with the English experience was driven largely by fertility *Economic Reforms and Fertility Behaviour* Weiguo Zhang, 2013-12-19 Based on an intensive fieldwork in a southern Hebei village in northern China 1992-3 the author takes an institutional approach and focuses on the way deliberate Chinese state policies driven by new economic and social agendas since the late 1970s have impacted on marriage family relations and consequently on the way fertility trends have been adversely affected the study is also very much concerned with the human dimension and the way in which such social and economic changes are perceived and applied in a rural community The research presented in this study goes a long way to unravelling the puzzle concerning the reasons for a very rapid decline in Chinese fertility rates contrasting sharply with a very different fertility transition within western cultures *Aging and Generational Relations over the Life Course* Tamara K. Hareven, 2012-05-21 No detailed description available for Aging and Generational Relations over the Life Course *Relationships 5.0* Elyakim Kislev, 2022 Accessible and compelling Relationships 5.0 reveals the ongoing epochal change in human relationships towards technology meant to fulfill emotional intellectual and physical needs

that have until now been met by other humans      *Aging in the Past* David I. Kertzer, 2024-06-04 Thanks to improved food medicine and living conditions the average age of the population is increasing throughout the modern industrialized world Yet despite the recent upsurge of scholarly interest in the lives of older people and the blossoming of historical demography little historical demographic attention has been paid to the lives of the elderly A landmark volume *Aging in the Past* marks the emergence of the historical demographic study of aging Following a masterly explication of the new field by Peter Laslett leading scholars in family history and historical demography offer new research results and fresh analyses that greatly increase our understanding of aging historically and across cultures Focusing primarily on post Industrial Europe and the United States they explore a range of issues under the broad topics of living arrangements widowhood and retirement and mortality This important work provides a much needed historical perspective on and suggests possible alternative solutions to the problems of the aged Contributors George Alter Rudolf Andorka Allen C Goodman Myron P Gutmann Michael R Haines E A Hammel Tamara K Hareven Nancy Karweit David I Kertzer Peter Laslett Andrejs Plakans Roger L Ransom Daniel Scott Smith Richard Sutch Peter Uhlenberg Richard Wall Charles Wetherell This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1995      **The Family in**

**Roman Egypt** Sabine R. Huebner, 2013-07-04 This study captures the dynamics of the everyday family life of the common people in Roman Egypt a social strata that constituted the vast majority of any pre modern society but rarely figures in ancient sources or in modern scholarship The documentary papyri and above all the private letters and the census returns provide us with a wealth of information on these people not available for any other region of the ancient Mediterranean The book discusses such things as family composition and household size and the differences between urban and rural families exploring what can be ascribed to cultural patterns economic considerations and or individual preferences by setting the family in Roman Egypt into context with other pre modern societies where families adopted such strategies to deal with similar exigencies of their daily lives      Situating Fertility Susan Greenhalgh, 1995-07-13 This collection addresses the world wide pattern of falling birth rates Fertility has commonly been treated from a specialized demographic perspective but there is today widespread dissatisfaction with conventional demographic approaches which are criticized for neglecting the cultural social and political forces that affect reproductive behavior For their part anthropologists have only recently begun to apply their characteristic approaches to the study of reproduction Drawing on new ethnographic and historical research and on a variety of theoretical approaches the contributors to this book indicate some of the ways in which demography might take into account historical processes political forces and cultural conceptions      *The Anthropological Demography of Health* Véronique Petit, Kaveri Qureshi, Yves Charbit, Philip Kreager, 2020-10-30 The anthropological demography of health as

a field of interdisciplinary population research has grown from the 1990s extending to a remarkable range of key human and policy issues including genetic disorders nutrition mental health infant child and maternal morbidity malaria HIV AIDS disability and chronic diseases new reproductive technologies and population ageing By observing group formation and change over time tracking people's networks and observing variance between what people say and do anthropological demography goes beyond the characteristically top down formal methodologies of most mainstream socio economic demography and population health This path breaking volume charts and integrates the growing body of research that combines ethnography with quantitative models and methods in the field of population health It offers a clear agenda based on important conceptual and methodological advances and often working in close collaboration with medical and historical research Approaches to population that are grounded in sustained ethnographic and historical research provide more than substantive knowledge of how cultural and social formations interact with health They enable understanding of how local institutions and experience of vital events come to be translated into the demographic and health measures on which survey and clinical programmes rely This in turn makes possible critical evaluation of the empirical adequacy of such translation reflection on what happens when these models and measures become standardised evaluations of health statuses and what this implies for governance The combination of anthropological demographic historical and biological research has gone beyond the initial demographic prioritisation of fertility regulation to take on an expanded range of key health policy issues and locate them in the context of the inequalities that so frequently give rise to major health differentials The Anthropological Demography of Health offers a clear agenda for the application and extension of combined anthropological and demographic thinking in population health and will provide a point of reference for the field

*The Lithuanian Family in its European Context, 1800-1914* Dalia Leinarte, 2017-06-08 This book investigates marriage and divorce in the nineteenth century European territories of the Russian Empire It uncovers the way a peasant community employed unsanctioned marital behaviour such as cohabitation and bigamy among others in order to respond to the external factors that had an impact on the family life including transmission of inheritance and household structure Lithuania was part of the Tsarist Empire until 1914 This case study reveals how under often restrictive laws and policies serfdom up to 1861 and the pervasive role of the Church in addition to deep rooted customary practices women and men manage to normalize their family life The volume is based on a wide range of archival sources and uncovers familial behaviour both from an individual and community perspectives

Diffusion Processes and Fertility Transition National Research Council, Division of Behavioral and Social

Sciences and Education, Committee on Population, 2001-12-15 This volume is part of an effort to review what is known about the determinants of fertility transition in developing countries and to identify lessons that might lead to policies aimed at lowering fertility It addresses the roles of diffusion processes ideational change social networks and mass communications in changing behavior and values especially as related to childbearing A new body of empirical research is currently emerging from studies of social networks in Asia Thailand Taiwan Korea Latin America Costa Rica and Sub Saharan Africa Kenya Malawi Ghana Given the potential significance of social interactions to the design of effective family planning programs in high fertility settings efforts to synthesize this emerging body of literature are clearly important **Population Politics in Twentieth Century Europe** Maria-Sophia Quine, 2013-04-15 Maria Sophia Quine demystifies the population policies of fascist regimes by looking at them in the wider context of how societies in general reacted to the profound economic changes brought by industrialization Population Politics in Twentieth Century Europe provides an original comparative treatment of European population policies gives the historical background to twentieth century population policies considers topics such as racism and sexism in Nazi ideology Eugenics in England family allowance schemes in France and sterilization synthesizes the latest research in different fields and countries Event History Analysis in Life Course Research Karl Ulrich Mayer, Nancy Brandon Tuma, 1990 A compendium of studies drawn from an international conference this volume includes the newest and most substantive work on event history analysis Researchers at four institutions convened shared models of analysis and collected their findings for the first time The studies included represent work done in the following organizations The Max Planck Institute in West Germany The U S Social Science Research Council s Committee on Comparative Stratification The Special Research Unit of the Deutsche Forschungsgemeinschaft and MASO and informal German working group on mathematical sociology This book is one of twelve in the University of Wisconsin Press s Life Course Studies series arranged by the series editors David L Featherman and David I Kertzer Love and Freedom Alison Mackinnon, 1997-01-28 In this 1997 book Alison Mackinnon traces the history of women s challenges to changes in education employment reproductive science and law She shows the connection between the lives of the first generation of women university graduates and the sudden decline in the national birthrate So dramatic was this shift that it sparked a Royal Commission into its cause Alison Mackinnon s extensive research shows that the declining birthrate was not simply the result of selfish educated young women refusing to bear the burdens of motherhood but was symptomatic of a larger questioning of the role of women in procreation the role of women in marriage and the institution of marriage itself Utilising social and government history autobiography and statistical analysis this book shows that the Marriage Problem exists as much in the 1990s as it did in the 1890s Men and women today are still challenging the boundaries between work and home profession and private life trying to find a way to have it all Culture, Religion, and Demographic Behaviour Kevin McQuillan, 1999-09-27 McQuillan shows that the population of the once largely German speaking region of Alsace was

sharply divided into two major religious communities one Catholic the other Lutheran Religion was a central source of identity and a filter through which the political struggles associated with the integration of the region into French society were perceived The five communities McQuillan studies represent both the religious division in the region and the varying economic circumstances of the population His analysis of the demographic record of these communities is based on a family reconstitution analysis which permits a detailed study of patterns of marriage illegitimacy marital fertility and childhood mortality A wealth of demographic research attests to the fact that theological differences between religious groups on matters of marriage or sexuality do not necessarily lead to differences in demographic behaviour McQuillan argues that religion mattered in the Alsatian case because religious affiliation became a central element of social identity Over time this resulted in what historians have called the confessionalization of the population It also meant that the far reaching political changes that affected France and Alsace in the period 1750 1870 were seen by the population through the lens of religion Not only a case study of Alsace but an exploration of the more general issue of the role of religion in promoting or delaying demographic change *Culture Religion and Demographic Behaviour* will be of great interest to students in the fields of population religion and social change

Huebner, Geoffrey Nathan, 2016-08-17 This comprehensive study of families in the Mediterranean world spans the Bronze Age through Late Antiquity and looks at families and households in various ancient societies inhabiting the regions around the Mediterranean Sea in an attempt to break down artificial boundaries between academic disciplines

*The Institutional Framework of Russian Serfdom* Tracy Dennison, 2011-04-28 Russian rural history has long been based on a Peasant Myth originating with nineteenth century Romantics and still accepted by many historians today In this book Tracy Dennison shows how Russian society looked from below and finds nothing like the collective redistributive and market averse behaviour often attributed to Russian peasants On the contrary the Russian rural population was as integrated into regional and even national markets as many of its west European counterparts Serfdom was a loose garment that enabled different landlords to shape economic institutions especially property rights in widely diverse ways Highly coercive and backward regimes on some landlords estates existed side by side with surprisingly liberal approximations to a rule of law This book paints a vivid and colourful picture of the everyday reality of rural Russia before the 1861 abolition of serfdom
