Family Therapy A Constructive Framework:

Family Therapy Roger Lowe, 2004-06-11 I liked this book Though I am not a family therapist like most mental health nurses I try to bear in mind the family relationships of individuals I am working with This is an enlightening text which not only offer a framework with which we can better understand the severe psychopathologies seen in forensic work but also gives examples of how it may be used therapeutically Mental Health Practice Roger Lowe's book provides a refreshingly different approach to working with families which chimes with the growing interest in constructive approaches It is written for trainees and for practitioners who are interested in developing their skills in this collaborative and optimistic approach

Family Therapy Roger Lowe, 2004-05-25 I liked this book Though I am not a family therapist like most mental health nurses I try to bear in mind the family relationships of individuals I am working with This is an enlightening text which not only offer a framework with which we can better understand the severe psychopathologies seen in forensic work but also gives examples of how it may be used therapeutically Mental Health Practice I think this is an important book that crystallises complex theory into a user friendly model using case material and discussions from the therapeutic community A must have for counsellors working with families this will form part of the recommended reading on the Family Counselling course Barbara McKay Relate Head of Training Relate News The book provides a good overview of a number of recent approaches to working with families as well as how the author thinks about them Stephen Bray Nurturing Potential Roger Lowe achieves the almost impossible task of bringing together various theories techniques and case examples in clear and accessible ways Readers of all disciplines from front line hard pressed practitioners to students on therapy and social work courses will be grateful for the simple and above all useful way he tackles the burning questions that arise in working with the family group Highly recommended Harvey Ratner Brief Therapy Practice London Family Therapy introduces practitioners to the principles of using a constructive and collaborative approach with families The approach builds on a strengths based philosophy and focuses on enhancing family resilience and competence in a way that is both time efficient and comprehensive It brings together skills from contemporary models such as solution focused narrative and conversational therapies and adapts them to the specific challenges of working with family relationships It is the first book to systematically integrate these influential approaches and apply them to family work Setting out a clear framework for practice Roger Lowe describes the key tasks for the therapist as hosting meetings negotiating concerns and evoking family members personal and relationship resources The framework is designed to be clear but flexible and to allow practitioners to adapt it to their own situational needs For example it suggests ways for practitioners to selectively borrow from other therapeutic models while retaining a constructive orientation It also explores ways in which therapists can use their inner conversation during a session as a tool to overcome obstacles to the therapeutic process Although there is a common belief that the approach is only suited to brief interventions the author also describes ways of working constructively over a longer period of time

Throughout the book case studies are included to show how the constructive framework is used in practice and to highlight a range of challenging situations that may be encountered during family therapy Roger Lowe's book provides a refreshingly different approach to working with families which chimes with the growing interest in constructive approaches It is written for trainees and for practitioners who are interested in developing their skills in this collaborative and optimistic approach
