## **Famine In Tudor And Stuart England:**

**Famine in Tudor and Stuart England** Andrew B. Appleby, 1978      Feast and Famine Leslie Clarkson, Margaret Crawford, 2001-11-15 This book traces the history of food and famine in Ireland from the sixteenth to the early twentieth century It looks at what people ate and drank and how this changed over time The authors explore the economic and social forces which lay behind these changes as well as the more personal motives of taste preference and acceptability They analyze the reasons why the potato became a major component of the diet for so many people during the eighteenth century as well as the diets of the middling and upper classes This is not however simply a social history of food but it is a nutritional one as well and the authors go on to explore the connection between eating health and disease They look at the relationship between the supply of food and the growth of the population and then finally and unavoidably in any history of the Irish and food the issue of famine examining first its likelihood and then its dreadful reality when it actually occurred      *Historical Geography of England and Wales* Robert A. Dodgshon, Robin A. Butlin, 2013-10-22 This text has been designed to cover all aspects and phases of the historical geography of England and Wales in a single volume In its substantially revised and enlarged form the treatment of standard themes has been completely re written to take account of recent work and shifts in viewpoint while its overall coverage has been extended to embrace newer themes like symbolic landscapes and the geography of the inter war period Its comprehensiveness and freshness of approach ensure its continuing value and success as a text Breadth of coverage from prehistory to 1939 Uses a range of data sources and approaches Well illustrated with particular emphasis on key themes Major revision of 1st edition with much wider range of topics      **Industry Before the Industrial Revolution** John T. Swain, 1986      *Famine and Death in Occupied Greece, 1941-1944* Violetta Hionidou, 2006-07-06 This is a pioneering study of the impact of the famine that occurred in Greece during its occupation by German Italian and Bulgarian forces in 1941 and 1942 Violetta Hionidou examines the courses and politics of this food crisis focusing on the demography of the famine and the effectiveness of the relief operations Her interdisciplinary approach combines demographic historical and anthropological methodologies to offer a comprehensive account of the famine This important study makes a major contribution to current debates about mortality and its causes during famines      *Oxford Symposium on Food & Cookery, 1989* Harlan Walker, 1990 A study of staples such as potato rice root vegetables in early modern England wheat and other cereals      *The Industrial Revolutions in Europe II, Volume 5* Patrick O'Brien, 1994-04-06 Modern European economic history is marked by an endeavor to transcend the traditional national case study approach to use comparisons and to deploy economic theory in order to draw the manifold and diverse experiences of the regions countries and multicultural empires of Europe onto a unified frame of reference These two volumes exemplify this modern approach This Volume 5 of the eleven part set entitled Industrial Revolutions contains thirteen papers with an introduction which adopt and apply a conceptual and explicitly comparative approach to European economic history as a whole Volume 5

includes sixteen national case studies again organized around or set within the context of theoretical principles and ideas derived largely from macroeconomic theory social accounting productivity measurement and regional analysis     Customs in Common E. P. Thompson, 2015-09-22 The meticulously researched elegantly argued and deeply humane sequel to the landmark volume of social history *The Making of the English Working Class* The New York Times Book Review This remarkable study investigates the gradual disappearance of a range of cultural customs against the backdrop of the great upheavals of the eighteenth century As villagers were subjected to a legal system increasingly hostile to custom they tried both to resist and to preserve tradition becoming as E P Thompson explains rebellious but rebellious in defense of custom Although some historians have written of riotous peasants of England and Wales as if they were mainly a problem for magistrates and governments for Thompson it is the rulers landowners and governments who were a problem for the people whose exuberant culture preceded the formation of working class institutions and consciousness Essential reading for all those intrigued by English history *Customs in Common* has a special relevance today as traditional economies are being replaced by market economies throughout the world The rich scholarship and depth of insight in Thompson's work offer many clues to understanding contemporary changes around the globe This long awaited collection is a signal contribution from the person most responsible for inspiring the revival of American labor history during the past thirty years The Nation This book signals the return to historical writing of one of the most eloquent powerful and independent voices of our time At his best he is capable of a passionate sardonic eloquence which is unequalled The Observer     Violent Appetites Carla Cevasco, 2022-04-12 How hunger shaped both colonialism and Native resistance in Early America In this bold and original study Cevasco punctures the myth of colonial America as a land of plenty This is a book about the past with lessons for our time of food insecurity Peter C Mancall author of *The Trials of Thomas Morton* Carla Cevasco reveals the disgusting violent history of hunger in the context of the colonial invasion of early northeastern North America Locked in constant violence throughout the seventeenth and eighteenth centuries Native Americans and English and French colonists faced the pain of hunger the fear of encounters with taboo foods and the struggle for resources Their mealtime encounters with rotten meat foraged plants and even human flesh would transform the meanings of hunger across cultures By foregrounding hunger and its effects in the early American world Cevasco emphasizes the fragility of the colonial project and the strategies of resilience that Native peoples used to endure both scarcity and the colonial invasion In doing so the book proposes an interdisciplinary framework for studying scarcity expanding the field of food studies beyond simply the study of plenty     Demographic Transition Theory John C. Caldwell, 2007-09-21 This book has a strong theoretical focus and is unique in addressing both mortality and fertility over the full span of human history It examines the demographic transition in the change in the human condition from high mortality and high fertility to low mortality and low fertility It asks if fluctuating populations is a new phenomenon or if there has long been an inherent tendency in Man to maximize survival and to control family size     **The**

**Age of Elizabeth** D.M. Palliser, 2014-02-04 This famous book was the first up to date survey of its field for a generation even today when work on early modern social history proliferates it remains the only general economic history of the age This second edition substantially revised and expanded is clear in outline rich in detail stressing continuity as well as change balancing the glamour of privilege with the misery and privation of the poor and dealing with the dark side of Tudor life vagabondage starvation superstition and cruelty as well as its heroic achievements *Town and Country in Europe, 1300-1800* S. R. Epstein, 2001 This 2001 book was the first survey of relations between town and country across Europe between 1300 and 1800 **The European Crisis of the 1590s** Peter Clark, 2025-05-01 First published in 1985 The European Crisis of the 1590s now with a new preface by Peter Clark on the current literature on crisis and catastrophe investigates in depth for the first time the origin and scale of the critical problems of the 1590s and their impact on European society Among the contributors are many leading scholars working on European history during the sixteenth and seventeenth centuries The book is divided into two parts The first analyses the particular mesh of difficulties in different areas of Europe covering all the major countries England France Germany the Netherlands Spain and Italy The second part discusses more general issues such as the impact of war and the role of the state From a systematic comparative examination of one period of acute difficulty and upheaval we gain valuable insights into the general nature of the economic and social crises which recurred in the early modern era Important and vivid light is also shed on the long term social economic and institutional changes affecting European countries c 1550 c 1650 General findings are emphasised in the editorial introduction and in the wide ranging conclusion by J H Elliott which offers a powerful evaluation of the historical significance of the 1590s This volume will be essential reading for academics students and others interested in the economic social and political history of Britain and continental Europe during the sixteenth and seventeenth centuries It will also be valuable for all those working in the new field of crisis and catastrophe *Majesty and the Masses in Shakespeare and Marlowe* Chris Fitter, 2020-07-16 This book is a landmark study of Shakespeare's politics as revealed in his later History Plays It offers the first ever survey of anti monarchism in Western literature history and philosophy tracked from Hesiod and Homer through to contemporaries of Shakespeare such as George Buchanan and the authors of the *Mirror for Magistrates* thus demonstrating that anxiety over monarchic power and contemptuous demolitions of kingship as a disastrously irrational institution formed an important and irremovable body of reflection in prestigious Western writing Overturning the widespread assumption that Elizabethans believed in divine right monarchy it exposites the anti monarchic critique built into Shakespeare's *Histories* and Marlowe's *Massacre at Paris* in five chapters of close literary critical readings paying innovative attention to performance values Part Two focuses Queen Elizabeth's principal challenger for national rule the Earl of Essex England's most popular man It demonstrates from detailed readings that far from being an admirer of the war crazed unstable bipolar Essex as is regularly asserted Shakespeare launched in *Richard II* and *Henry IV* a campaign to puncture the reputation of the great earl exposing

him as a Machiavel seeking Elizabeth's throne Shakespeare emerges as a humane and clear sighted critic of the follies intrinsic to dynastic monarchy yet hostile likewise to the rash militarist Essex who would fling England into permanent war against Spain Founded on an unprecedented and wide ranging study of anti monarchist thought this book presents a significant contribution to Shakespeare and Marlowe criticism studies of Tudor England and the history of ideas

**The Unending Frontier** John F. Richards,2003-05-15 It was the age of exploration the age of empire and conquest and human beings were extending their reach and their numbers as never before In the process they were intervening in the world's natural environment in equally unprecedented and dramatic ways A sweeping work of environmental history The Unending Frontier offers a truly global perspective on the profound impact of humanity on the natural world in the early modern period John F Richards identifies four broadly shared historical processes that speeded environmental change from roughly 1500 to 1800 c e intensified human land use along settlement frontiers biological invasions commercial hunting of wildlife and problems of energy scarcity The Unending Frontier considers each of these trends in a series of case studies sometimes of a particular place such as Tokugawa Japan and early modern England and China sometimes of a particular activity such as the fur trade in North America and Russia cod fishing in the North Atlantic and whaling in the Arctic Throughout Richards shows how humans whether clearing forests or draining wetlands transporting bacteria insects and livestock hunting species to extinction or reshaping landscapes altered the material well being of the natural world along with their own

**Fear and the Shaping of Early American Societies** Lauric Henneon,Louis Roper,2016-04-08 Fear and the Shaping of Early American Societies is the first collection of essays to argue that fear permeated the colonial societies of 17th and 18th century America and to analyse its impact on the political decision making processes from a variety of angles and locations Indeed the thirteen essays range from Canada to the Chesapeake from New England to the Caribbean and from the Carolina Backcountry to Dutch Brazil This volume assesses the typically American nature of fear factors and the responses they elicited in a transatlantic context The essays further explore how the European colonists handled such challenges as Indian conspiracies slave revolts famine popery and tyranny as well as werewolves and a dragon to build cohesive societies far from the metropolis Contributors are Sarah Barber Benjamin Carp Leslie Choquette Anne Claire Faucquez Lauric Henneon Elodie Peyrol Kleiber Susanne Lachenicht Bertie Mandelblatt Mark Meuwese L H Roper David L Smith Bertrand Van Ruymbeke Christopher Vernon and David Voorhees

Epidemics and Mortality in Early Modern Japan Ann Bowman Jannetta,2014-07-14 Ann Jannetta suggests that Japan's geography and isolation from major world trade routes provided a cordon sanitaire that prevented the worst diseases of the early modern world from penetrating the country before the mid nineteenth century Her argument is based on the medical literature on epidemic diseases on previously unknown evidence in Buddhist temple registers and on rich documentary evidence from contemporary observers in Japan Originally published in 1987 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of

print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Scotland before the Industrial Revolution Ian D. Whyte, 2014-05-12 This splendid portrait of medieval and early modern Scotland through to the Union and its aftermath has no current rival in chronological range thematic scope and richness of detail Ian Whyte pays due attention to the wide regional variations within Scotland itself and to the distinctive elements of her economy and society but he also highlights the many parallels between the Scottish experience and that of her neighbours especially England The result sets the development of Scotland within its British context and beyond in a book that will interest and delight far more than Scottish specialists alone

**Warfare in Early Modern Europe 1450-1660** Paul E.J. Hammer, 2017-05-15 The early modern period saw gunpowder weapons reach maturity and become a central feature of European warfare on land and at sea This exciting collection of essays brings together a distinguished and varied selection of modern scholarship on the transformation of war often described as a military revolution during the period between 1450 and 1660

The First Century of Welfare Jonathan Healey, 2014 The first major regional study of poverty and its relief in the seventeenth century the first century of welfare The English Old Poor Law was the first national system of tax funded social welfare in the world It provided a safety net for hundreds of thousands of paupers at a time of very limited national wealth and productivity The First Century of Welfare which focusses on the poor but developing county of Lancashire provides the first major regional study of poverty and its relief in the seventeenth century Drawing on thousands of individual petitions for poor relief presented by paupers themselves to magistrates it peers into the social and economic world of England's marginal people Taken together these records present a vivid and sobering picture of the daily lives and struggles of the poor We can see how their family life their relations with their kin and their neighbours and the dictates of contemporary gender norms conditioned their lives We can also see how they experienced illness and physical and mental disability and the ways in which real people's lives could be devastated by dearth trade depression and the destruction of the Civil Wars But the picture is not just one of poor folk tossed by the tides of fortune It is also one of agency about the strategies of economic survival the poor adopted particularly in the context of a developing industrial economy of the support they gained from their relatives and neighbours and of their willingness to engage with England's developing system of social welfare to ensure that they and their families did not go hungry In this book an intensely human picture surfaces of what it was like to experience poverty at a time when the seeds of state social welfare were being planted
