## **Emerging European Architects:**

**Emerging European Architects** Wilfried Wang, 1988      *Emerging European architects* W. wang, 1988      *The Emerging European Union* Birol Yesilada, David Wood, 2015-11-19

Surveying the European Union's evolution from the Rome Treaty to the present *The Emerging European Union* captures the full story of Europe's ongoing integration its changing identity and its increasing importance as a global actor in the 21st Century This text's concise but comprehensive overview of the history institutions and policies of the European Union lays out the major elements of the European integration and explain how the European Union functions Emphasizing competing intergovernmental and supranational forces *The Emerging European Union* explains the origins and future of the European Union as well as its political uniqueness

**Patterns of Disintegration. The EU and the Emerging European Order** Federico Nicolaci, 2012-08-15

Paraphrasing Marx one could say that a spectre is hunting Europe the spectre of disintegration The crisis of the Monetary Union the pinnacle of European integration seems to call into question the core assumption of more than half a century of Europe's integration history the functionalist idea that economic integration would be self sustaining and would ultimately lead to the emergence of a political community This book presents evidence suggesting that the current crisis is not an accidental snag but the collapse of the ideological architecture of Europe showing that the disintegrating dynamics threatening the EU are structurally determined      *Designing Emerging Markets* Giaime Botti, 2023-05-22

This book offers a unique glance into the process of globalisation of the architectural practice during the last three decades through the lenses of innovative methodologies in architectural history based on quantitative data Focusing on the golden age of globalisation 1990-2019 it investigates the transnational work of more than one thousand architectural firms of different business models from Europe North America and the Asia Pacific in a broad sample of emerging markets Mainland China South East Asia India the Persian Gulf Sub Saharan Africa Russia and Kazakhstan and Latin America In the book different thematic geographies are presented to explore the global scope of the contemporary profession examine significant projects and the structural conditions behind them and reveal the debates that such works generated Understanding the global agency of design firms in emerging markets also becomes a way to study different market conditions modes of production and architectural trends comparatively and to highlight the shifts that occurred in the profession over the last few decades The use of quantitative methodologies produces a novel and updated narrative on contemporary architecture in emerging markets grounded in quantitative data rather than in preassumptions and purely qualitative interpretations Richly illustrated this book is further enhanced by an ample set of maps graphs and tables to visualise data better      *Architects of Delusion* Simon Serfaty, 2013-05-23

The commencement of war in Iraq in 2003 was met with a variety of reactions around the globe In *Architects of Delusion* Simon Serfaty presents a historical analysis of how and why the decision to wage war was endorsed by some of America's main European allies especially Britain and opposed by others especially France and Germany Tony Blair George W Bush Jacques

Chirac and Gerhard Schroeder were Serfaty argues the architects of one of the most serious crises in postwar transatlantic relations These four heads of state were the victims not only of their personal delusions but also of those of the nations they led They all played the hand that their countries had dealt them the forceful hand of a righteous America the principled acquiescence of a faithful Britain the determined intransigence of a quarrelsome France and the ambiguous new way of a recast Germany Serfaty's deft interweaving of the political histories and cultures of the four countries and the personalities of their leaders transcends the Europe bashing debate sparked by the Iraq invasion He contends that not one of these four leaders was entirely right or entirely wrong in his approach to the others or to the issues before and during the war For the resulting wounds to heal though and for the continuity of transatlantic relations he reminds us that the United States and France must end their estrangement France and Britain must resolve their differences Germany must carry its weight relative to both France and Britain and the United States must exert the same visionary leadership for the twenty first century that it showed during its rise to preeminence in the twentieth century

**Towards a Dialogical History of Modern Architecture** Jorge Francisco Liernur, 2024-07-15 The book challenges three perspectives on the modern architectural canon explanations that disregard impacts and effects beyond the North Atlantic monologic superficial modifications that simply add Other figures to the canon and views that reject the canon itself Instead it recognizes the canon's significance in comprehending architecture while seeking to uncover its presumed Western centric integrity through a shift from a monological to a dialogical approach This approach integrates concepts of identity and Otherness as dialectically articulated and mutually interrelated In essence the book's main thesis contends that the canon's historiographic construction overlooked the existence of Otherness specifically neglecting the world beyond the North Atlantic nucleus of the West By examining a global context to comprehend the canon formation the book proposes a more accurate understanding of the history of modern architecture Recognizing that this task cannot emanate from a single hegemonic center it presents the prospect of a coral type architectural history This narrative should and could encompass voices from diverse cultures to explore the particular circumstances of the world intertwined with each piece or figure transiently integrated into that canon As a result the ideal readers of this book position themselves within multiple settings keen on engaging in a critical global conversation about modern architectural discourse It will be of interest to researchers and students of architecture architectural history and cultural studies
