World Development Prodromos Panayiotopoulos, Gavin Capps, 2001-06-20 Do the structures of the world economy invariably work against the interests of the Third World What is the impact of industrialisation How does it affect people and their livelihoods gender relations the environment movements for social justice and democracy World Development offers answers to these questions A comprehensive introductory guide for students teachers volunteers and NGO workers in development World Development examines the substantive issues surrounding development industrialisation and globalization and places them within a historic context It outlines the historical development of the world economy and assesses the current prospects for developing countries The book contains in depth analyses of how particular industries operate at local and global levels drawing from case studies on textiles tourism and copper There are also case studies of specific countries including South Korea Cyprus Mexico China and Spain *The Labour Markets of Emerging Economies* Sandrine Cazes, Sher Verick, 2013-08-09 The past few decades have witnessed the economic and geopolitical rise of a number of large middle income countries around the world This volume focuses on the labour market situations trends and regulations in these emerging economies **Local Economic and Employment Development (LEED) Baltic Partnerships Integration, Growth and Local Governance in the Baltic Sea Region** OECD, 2007-03-22 The Baltic Sea Region is rapidly becoming one of the world's more competitive regions The region is capitalising on its strengths and making the most of its diversity to stimulate innovation build a strong pool of skilled labour and foster *New Directions in Development Economics* Mats Lundahl, Benno Ndulu, 2005-08-10 New Directions in Development Economics is divided into two parts The first half considers the dilemma of growth with special reference to its environmental cost The second half focuses on the role of the state in the context of the growing dominance of the free market argument The contributors include Paul Collier Partha Dasgupta Ronald Findlay and Deepak Lal **Transnational Conflicts** William I. Robinson, 2003-10-16 Capitalism has disrupted the conventional pattern of revolutionary upheaval civil wars and pacification in Central America William Robinson maps the shape of change in the region *Regional Economic Outlook, October 2011, Sub-Saharan Africa* International Monetary Fund. African Dept., 2011-10-26 This year looks set to be another encouraging one for most sub Saharan African economies Reflecting mainly strong demand but also elevated commodity prices the region's economy is set to expand by more than 51.4 percent in 2011 For 2012 the IMF staff's baseline projection is for growth to be higher at 53.4 percent owing to one off boosts to production in a number of countries There are however specters at the feast the increase in global food and fuel prices amplified by drought affecting parts of the region has hit the budgets of the poor and sparked rising inflation and hesitations in the global recovery threaten to weaken export and growth prospects The projection for 2012 for the region is highly contingent on global economic growth being sustained at about 4 percent A further slowing of growth in advanced economies curtailing global demand would generate significant headwinds for the

region's ongoing expansion with more globally integrated countries likely to be most affected. Policies in the coming months need to tread a fine line between addressing the challenges that strong growth and recent exogenous shocks have engendered and warding off the adverse effects of another global downturn. In some slower growing, mostly middle income countries without binding financial constraints, policies should clearly remain supportive of output growth even more so if global growth sputters. Provided the global economy experiences the currently predicted slow and steady growth, most of the region's low income countries should focus squarely on medium term considerations in setting fiscal policy while tightening monetary policy wherever nonfood inflation has climbed above single digits. In the event of a global downturn subject to financing constraints, policies in these countries should focus on maintaining planned spending initiatives while allowing automatic stabilizers to operate on the revenue side. For the region's oil exporters, better terms of trade provide a good opportunity to build up policy buffers against further price volatility.

Central and Eastern European Economies Marcus Goncalves, Erika Cornelius Smith, 2016-07-25. Nearly seven decades ago, six countries in Western Europe—Belgium, France, West Germany, Italy, Luxembourg, and the Netherlands—decided to take economic cooperation to the next level. The vision of the EU founding states epitomized by the Schuman Declaration in 1950 was to tie their economies so closely together that war would become impossible. Robert Schuman, author of the plan, believed Europe could not be made all at once or according to a single plan. It would have to be built through concrete achievements which first create a de facto solidarity. The countries within the European Community benefited enormously from free trade and common economic policies, in particular structural funds designed to foster convergence by funding infrastructure and investments in poorer regions. This book examines how similar transitions and integration into the European Union are experienced in individual central and eastern European states through the use of country scans in the regional blocks of CEE, SEE, and CIS.

Securitizing Youth Marisa O. Ensor, 2021-04-23. Securitizing Youth offers new insights on young people's engagement in a wide range of contexts related to the peace and security field. It presents empirical findings on the challenges and opportunities faced by young women and men in their efforts to build more peaceful, inclusive, and environmentally secure societies. The chapters included in this edited volume examine the diversity and complexity of young people's engagement for peace and security in different countries across the globe and in different types and phases of conflict and violence, including both conflict-affected and relatively peaceful societies. Chapter contributors, young peacebuilders and seasoned scholars and practitioners alike, propose ways to support youth's agency and facilitate their meaningful participation in decision making. The chapters are organized around five broad thematic issues that correspond to the 5 Pillars of Action identified by UN Security Council Resolution 2250. Lessons learned are intended to inform the global youth peace and security agenda so that it better responds to on-the-ground realities, hence promoting more sustainable and inclusive approaches to long-lasting peace.
