*Emotional Factors in Learning* Lois Barclay Murphy, Henry Ladd, 1944      **Emotional Factors in Learning** Lois Barclay Murphy, Henry Andrews Ladd, 1970      **Certain Emotional Factors in Learning and Efficiency** Fred McKinney, 1933

**The Psychology of Effective Learning and Teaching** Matt Jarvis, 2005 This book covers the psychology of teaching and learning and focuses on applying up to date as well as traditional theory in the classroom It covers a range of issues that most concern the new teacher written clearly and at an appropriate level      *Emotional Processes in Learning Situations* Marianne Habib, 2022-06-23 Emotional processes are increasingly studied in psychology whether through their modes of expression or through their effect on cognitive processes While the theorization of the link between emotional and cognitive processes has varied over the centuries the impact of emotions on cognitive functions is now undeniable and is supported by experimental arguments Psychological processes are currently considered necessary for or influenced by the emergence of emotions Learning is at the heart of individual development and involves different cognitive processes the study of the emotional processes at work in a learning situation must of course not be overlooked This book presents the contributions of different disciplines of psychology in understanding the role of emotional processes in learning situations from a developmental and whole life perspective

*Some implications of the effects of emotional factors on learning and retention of mathematics* Agnes Hatta Mundal, 1986      **Learning Emotions** Philipp Mayring, Christoph von Rhoebeck, 2003 Educational psychology and educational practice is dominated by behavioristic and cognitive approaches This reader brings together new research results which underline the important role of emotion in learning Anxiety joy pride boredom of the learner influences the learning outcome Research teams from Europe and the U S A present their results      *Emotion recognition using brain-computer interfaces and advanced artificial intelligence* Yizhang Jiang, Maozhen Li, Pengjiang William Qian, Yaoru Sun, 2023-02-17      [Encyclopedia of the Sciences of Learning](#) Norbert M. Seel, 2011-10-05 Over the past century educational psychologists and researchers have posited many theories to explain how individuals learn i e how they acquire organize and deploy knowledge and skills The 20th century can be considered the century of psychology on learning and related fields of interest such as motivation cognition metacognition etc and it is fascinating to see the various mainstreams of learning remembered and forgotten over the 20th century and note that basic assumptions of early theories survived several paradigm shifts of psychology and epistemology Beyond folk psychology and its naive theories of learning psychological learning theories can be grouped into some basic categories such as behaviorist learning theories connectionist learning theories cognitive learning theories constructivist learning theories and social learning theories Learning theories are not limited to psychology and related fields of interest but rather we can find the topic of learning in various disciplines such as philosophy and epistemology education information science biology and as a result of the emergence of computer technologies especially also in the field of computer sciences and artificial intelligence As a

consequence machine learning struck a chord in the 1980s and became an important field of the learning sciences in general. As the learning sciences became more specialized and complex the various fields of interest were widely spread and separated from each other as a consequence even presently there is no comprehensive overview of the sciences of learning or the central theoretical concepts and vocabulary on which researchers rely. The Encyclopedia of the Sciences of Learning provides an up to date broad and authoritative coverage of the specific terms mostly used in the sciences of learning and its related fields including relevant areas of instruction pedagogy cognitive sciences and especially machine learning and knowledge engineering. This modern compendium will be an indispensable source of information for scientists educators engineers and technical staff active in all fields of learning. More specifically the Encyclopedia provides fast access to the most relevant theoretical terms provides up to date broad and authoritative coverage of the most important theories within the various fields of the learning sciences and adjacent sciences and communication technologies supplies clear and precise explanations of the theoretical terms cross references to related entries and up to date references to important research and publications. *Specific Learning Disabilities* Yitzchak Frank, 2014-06-06 This book is a concise but comprehensive review of Specific Learning Disabilities with a special attention to the biology of these diverse conditions. The reader will get a review of most aspects of SLD including the different clinical syndromes mostly dyslexia and dyscalculia the clinical manifestations and the therapeutic approaches. It is unique in the proportion of its content dedicated to the biological aspects of SLD. It attempts to assemble and present the biological knowledge which has been accumulated on these conditions. This knowledge includes the neurological anatomy of dyslexia and dyscalculia demonstrated with the help of modern neuro imaging studies and the physiology and the genetics of these conditions again demonstrated by recently available technologies. These new technologies produced major discoveries related to SLD including the importance of phonological processing in reading the presence of number center in the brain and the brain networks involved in reading. We recognize that many dyslexic subjects have a deficit in aspects of language processing specifically phonological processing that dyscalculia can be the result of a number of distinct cognitive impairments and that the basic underlying deficit in many cases of SLD may be a genetic variation. The same new biological investigative techniques can like never before measure the outcome of therapeutic techniques and learning methods. Such measurements will in the future be the gold standard in assessing the efficacy of different methods of classroom teaching in regular and different learners. Last unlike many other publications on SLD this book discusses the relatively unrecognized emotional aspects of SLD and the sometime devastating effects that these conditions have on the life of affected subjects and their families in and out of the classroom.
