Emotions And Needs:

Emotions and Needs Dawn Freshwater, Chris Robertson, 2002 Robertson and Freshwater explicitly use the development of a therapeutic relationship and parallel with it the development of an individual psyche as a vehicle for their exploration of emotions and needs. The subtlety is that their exploration like psychotherapy itself begins with the complexity and ends with the simplicity. Self Society Through the centrality of the concepts of needs and emotions this volume describes and discusses issues that are fundamental to psychotherapy. As an alternative to classifying modalities of psychotherapy and the way in which they understand needs and emotions by their author's era or underpinning philosophy this book focuses instead on the emotional patterning of psychotherapy. The book explores need and emotion in relation to what patients bring to therapy and what subsequently facilitates effective engagement. Examining ways of understanding the manifestation of needs and emotions the authors bring differing therapeutic schools of thought together in contemporary models of integrative psychotherapy which draw upon the transpersonal, postmodern and poststructural. The book is illustrated throughout with clinical vignettes which help the reader ground the theoretical concepts in everyday practice. The discussions in this volume not only add to the current body of knowledge surrounding the fundamental concepts of emotions and needs but also make a long overdue contribution to the psychotherapeutic professions. *Emotions and Needs* will be of interest to students and practitioners in fields such as counselling, psychotherapy, clinical psychology and social work.

Understanding the Emotional Needs of Children in the Early Years Tricia Johnson, 2018-06-12 This accessible book focuses on the emotional needs, experiences and development of young children, exploring the role of the practitioner in ensuring that each and every child feels loved, supported and safe, able to develop secure attachments and flourish in the first five years and beyond. Drawing upon neuroscientific research and referencing key theories relating to attachment and health and wellbeing the book examines the responsibilities of the early years practitioner in supporting children to reach their full potential. The response of the adult to the emotional needs of individual children is analysed in detail and the impacts of various experiences, cultures and contexts on a child's emotional wellbeing are considered. With topics including safeguarding, communication, the physical environment, neurological development and Attachment Theory, readers will learn how to respond appropriately to individual children, extend their role as a Key Person and their position in a multi-professional team. Increase their understanding of the interaction between home and childcare settings, reflect on the importance of in-depth observation, the environment and quality of care provided in their settings. Supported by rich case studies, provocations and examples of good practice to encourage reflection and improve future practice. *Understanding the Emotional Needs of Children in the Early Years* is an engaging and comprehensive guide for all early years practitioners, early years students and professionals including paediatric nurses, health visitors and social workers.
