IR is not nearly a new topic dismissing this volume as simply another typical prescription in the lineage of IR revitalization commentary would be a gross miscalculation. For one, the sheer breadth and depth of the contributing scholars brings a unique intellectual richness to this project. Also, this book distinctively tackles the issue of revitalization from a multitude of perspectives, from social capital to network theories to labor and employment law and from research and theory to teaching and practice, and does so in a way that is comprehensive, continuous, and in dialog throughout. Finally, this book makes a significant contribution because of its specific recommendations for IR revitalization. Instead of telling scholars and practitioners the need for a new direction but providing few feasible alternatives, *New Directions* proffers real pathways for progress. This book is a useful guide for navigating the ever-developing world of work and employment relations.

Sean Rogers, *Perspectives on Work: Where is the field of industrial relations going? How can it be rejuvenated? How can it be reformulated to deal with current problems?* These are among the difficult questions this stimulating book addresses.

George Strauss, University of California Berkeley, US: This book deserves to be widely read. The academic study of industrial relations has recently struggled to adjust to the brave new world of work and employment relations. Too often there has been a retreat into the study of very small issues and insufficient emphasis on the big picture. The chapters in this volume make a valuable contribution to filling this gap. Most important of all, the book is forward-looking.

Ken Mayhew, University of Oxford, UK: Charles Whalen has assembled a timely and comprehensive examination of the world of work by a distinguished group of international scholars.

Robert B. McKersie, Massachusetts Institute of Technology, US: This book represents a breath of fresh air provided by many of the most prominent scholars in industrial relations today. It anchors the field to its past but more importantly highlights pathways to the future. It is indispensable reading and will form a solid foundation for continued dialogue about new directions for the study of work and employment.

Morley Gunderson, University of Toronto, Canada: Work and its associated problems are more important to individuals and society than ever before. That is why it is so crucial to reenvision the field of industrial relations, employment relations, which brings together economics, sociology, psychology, history, human resource management, political science, and all other areas of scholarship related to work. This compendium by leading industrial relations scholars makes a vital contribution in that direction.

Paula B. Voos, Rutgers The State University of New Jersey, US: Industrial relations is confronting major challenges. This valuable book deserves a warm welcome since it illustrates and maps a series of

Ryan Lamare, William K. Roche, and Paul L. Latreille.

From Widgets to Digits, Katherine V. W. Stone, 2004-07-26. *From Widgets to Digits* is about the changing nature of the employment relationship and its implications for labor and employment law. For most of the twentieth

century employers fostered long term employment relationships through the use of implicit promises of job security well defined hierarchical job ladders and longevity based wage and benefit schemes Today s employers no longer value longevity or seek to encourage long term attachment between the employee and the firm Instead employers seek flexibility in their employment relationships As a result employees now operate as free agents in a boundaryless workplace in which they move across departmental lines within firms and across firm borders throughout their working lives Today s challenge is to find a means to provide workers with continuity in wages on going training opportunities sustainable and transferable skills unambiguous ownership of their human capital portable benefits and an infrastructure of support structures to enable them to weather career transitions
