Theories on Law and Ageing Israel Doron, 2008-09-25 This book is about trying to answer questions These questions were well introduced by Prof Margaret Hall in the opening of her chapter in this book The fundamental idea of law and aging as a discrete category of legal principle and theory is controversial how and why are older adults or seniors or elders the very terminology is controversial and fraught with difficulties a discrete and distinct group for whom special legal thought and treatment is justified For some a category of law and aging is inherently paternalistic suggesting that older persons are like children especially in need of the protection of the law In this sense the argument continues the category itself internalizes ageist presumptions about older adults and is therefore inherently flawed and even harmful If certain older adults are because of physical or mental infirmities genuinely in need of an enhanced level of legal

protection this entitlement should be conceptualized in terms of their disability older adults are not a distinct group but an arbitrarily delineated demographic category which contains within it any number of groups that are legitimately distinct for the purposes of legal theory the disabled women persons of colour Aboriginal persons rich and poor etc Indeed the artificial category of older adults may be seen as obfuscating submerging these more meaningful distinctions *Whose Government Is It?* Henry B. Tam, 2019-02-27 This book brings together leading figures in democratic reform and civic engagement to show why and how better state citizen cooperation is necessary for achieving positive social change Their contributions demonstrate that while protest and non state action may have their place citizens must also work effectively with public bodies to secure sustainable improvements The authors explain why the problem of civic disengagement poses a major threat highlight what actions can be taken and suggest how the underlying obstacles to democratic cooperation between citizens and state institutions can be overcome across a range of policy areas and in varied national contexts *Beyond Elder Law* Israel Doron, Ann M. Soden, 2012-03-30 All over the world there is a growing interest in the relationship between law and aging How does the law influence the lives of older people Can rights advocacy and representation advance the social position of the aged and combat ageism What are the new and cutting edge frontiers in the field of elder law Should there be a new international human rights convention in this field These are only a few of the many questions that arise This book attempts to answer some of these questions and to set the agenda for the future development of elder law across the globe Taking into account existing research and knowledge leading scholars from different continents North America Europe Asia and Australia present in this book original and novel ideas regarding the future development of elder law These ideas touch upon key topics such as elder guardianship citizenship mental capacity elder abuse human rights and international law family relationships age discrimination and the right to die This book can thus serve as an important reference work for all those interested in understanding where law and aging are headed and for those concerned about the future legal rights of older persons **International Perspectives on Older Adult Social Isolation and Loneliness** Ted K. The Greying of India Rajagopal D Chakraborti,2004-06-30 This book argues cogently that India s policymakers need to urgently take up the cause of the elderly in order to create an environment that insures them against various risks and allows them to maintain as much economic independence and self sufficiency as possible without disturbing the intergenerational balance The first of its kind to be based on data from the National Sample Survey Organisation and providing a global perspective this book constitutes the most comprehensive analysis of the causes and consequences of ageing in India The major objectives of the book are to Document the rapid growth of older populations in India Address the key issues and topics related to ageing Assess the implications of demographic changes for programmes and policies for the aged Present an Elderly Status Index based on available data Timely stimulating and challenging this book is packed with relevant and hitherto unanalysed data on ageing in India In particular it provides an exhaustive discussion on various conceptual and measurement issues relating to population ageing

Politics and Old Age: Older Citizens and Political Processes in Britain John A. Vincent,Guy Patterson,Karen Wale,2024-11-01 This title was first published in 2001 Older people have been characterized by two mutually contradictory stereotypes One the one hand they have been

portrayed as a powerful lobby growing demographically and able to demand large redistributions of the nation's income in their direction. On the other hand they have been typified as a marginalized group at high risk of poverty and exclusion and in a political context largely powerless. This book examines using original research conducted by the Older People and Politics Project (OPPOL) within Exeter University's Sociology Department the reality of the impact of the increasing number of older people on the British political process. The project had three main investigative concerns: how effective are pressure groups and lobbyists for older people; how is the power and influence of older people perceived by older people themselves and the general public; and how are politicians responding to older people and their needs. *Empowerment, Participation and Social Work* Robert Adams, 2017-12-07. Now in its fourth edition, completely revised and updated, this book continues to offer in-depth coverage spanning both conceptual debates about empowerment and a range of practice issues. The text provides social workers with a clear framework for critical and empowering practice with service users and carers. The author offers an account of the development of empowerment and participation in practice, considering all dimensions from work with individuals and groupwork through to organisational, community and political aspects. The clarity and accessibility, as well as new examples reflecting varied global contexts and material on empowering children and adults, make it an essential resource at all levels of study. New to this Edition: Strong emphasis on the needs of service users and a clear focus on how social workers may encourage service user and carer participation. Internationally diverse case studies and practice examples reflecting global concerns, as well as the changing service and practice terrains in the UK. New and extended material on empowering children and adults. Embodied Geographies Elizabeth Kenworthy Teather, 2005-06-23. *Embodied Geographies* provides a comprehensive account of different types of life crises which develop our identities and affect how we live our lives. Chapters focus on pregnancy, childbirth, teenagers and parenthood, migration, the threat and reality of violence, illness and disability, bereavement, the ensuing family responsibilities and death itself. It includes case studies from the UK, Australia, New Zealand, Singapore, Hong Kong, Canada and the USA. **Healthcare Ministry** Gerald A. Arbuckle, 2000. *Healthcare Ministry*. **Sustainable Ageing** Nestor Asiamah, Hafiz T.A. Khan, Whitney Nesser, Frank Frimpong Opuni, Alex Siu Wing Chan, 2024-10-26. This book uniquely operationalizes sustainable ageing as a concept for reimagining ways by which 1) social and health threats (i.e. climate change, events, extreme industrialization, infectious disease outbreak and war) can constrain the implementation of healthy ageing campaigns or limit their outcomes; and 2) potential transdisciplinary strategies can be rolled out to optimize healthy ageing through the campaigns in contexts experiencing the threats. The United Nations Decade of Healthy Ageing 2021-2030 initiative drives major healthy ageing campaigns and encapsulates 10 initiatives for enabling people to maintain health as they age. Worsening social and health threats are, however, hindering the implementation of the campaigns. Consequently, healthy ageing may not be achieved or sustained even in age-friendly contexts experiencing crises. Scholars agree these threats will adversely impact public health and an inclusive multidisciplinary approach to healthy

ageing is necessary amidst the threats This book provides an understanding of how healthy ageing should be framed and approached through the campaigns in a world experiencing crises Among the topics covered are Psychology of Ageing in Place Amidst Health and Social Threats Perspectives on the Decade of Healthy Ageing Climate Change Adaptation for Healthy Ageing Research Practice Gap Impact on Campaigns and Mitigation Strategies Human Development Pathways for Empowering Older Adults A Decade of Healthy Ageing Perspective Initiatives to Fight Ageism Neglect and Elderly Abuse During Crises A Healthy Ageing Perspective Sustainable Ageing Reimagining Healthy Ageing Through the Lens of Flagship Campaigns is a timely publication with broad appeal Each chapter provides empirical evidence or models for improving stakeholders understanding of campaign related healthy ageing programmes how the programmes are affected by the threats and what can be done to achieve the core goals in contexts experiencing threats Students lecturers and researchers can use the book as a research guide whereas public health professionals and organizations can use it to develop or alter policies Researchers in a wide range of disciplines can design studies based on models and insights from the book

Social Policies and Social Control Malcolm Harrison, Teela Sanders, 2015-11-18 This book offers an innovative account of social control and behaviorist thinking in social policies and welfare systems and the impact it has had on disadvantaged groups The contributors review how controls have been applied to individuals and households and how these interventions have narrowed social rights They illuminate the links between social control developments welfare systems and the liberalization of economics and they highlight the negative impact that behaviorist assumptions and the subsequent strategies that have grown out of them have had on the disadvantaged Overall the volume provides a cutting edge critical engagement with contemporary policy developments

Promoting Equality Neil Thompson, 2017-09-19 Practitioners working within the people professions have a legal and moral responsibility to promote equality wherever possible This insightful book from a leading author provides a lucid guide to the complexities of inequality and offers a sound foundation for practice that makes a positive contribution to equality social justice and empowerment Now in its fourth edition this highly successful text challenges oversimplified approaches to tackling discrimination and oppression It combines an impressive blend of theoretical analysis and practice insights all conveyed in the accessible and engaging style which has earned Neil Thompson his sterling reputation in the field With a clear exposition of a coherent theory base that does justice to the multi level and multi dimensional nature of discrimination Promoting Equality is essential reading for students and practitioners within the helping professions and managers and supervisors across the public private and voluntary sectors
