entitled Conservation Ecology Principles Practices and Management a theme which Elsevier s pioneer ing journal Biological
Conservation has promoted since its foundation thirty three years ago The science of conservation ecology is now widely
acknowledged as an essential component in the planning and develop ment of activities which change or modify our natural

it is especially important to try to bridge this gap by interpreting the results of ecological research so that they are

the Islands** Christy Constantakopoulou,2010-07-29 Christy Constantakopoulou examines the history of the Aegean islands
and changing concepts of insularity with particular emphasis on the fifth century BC Islands are a prominent feature of the
Aegean landscape and this inevitably created a variety of different and sometimes contradictory perceptions of insularity in
classical Greek thought Geographic analysis of insularity emphasizes the interplay between island isolation and island
interaction but the predominance of islands in the Aegean sea made island isolation almost impossible Rather island
connectivity was an important feature of the history of the Aegean and was expressed on many levels Constantakopoulou
investigates island interaction in two prominent areas religion and imperial politics examining both the religious networks
located on islands in the ancient Greek world and the impact of imperial politics on the Aegean islands during the fifth
