Empty Shells:

Empty Shells Terrance Taylor, 2015-03-16 Ochieng is a young African male who has the world in his hands He has one problem though he is confused about his sexuality Ochieng is afraid to tell his family and friends about his undercover life Ochieng will have to decide if he has the strength to tell his family and friends where his heart lies In the end will Ochieng gain the support of his loved ones Or will he continue hiding his true self and lying to everyone Empty Shells Opal (pseud.), 1874 The Empty Seashell Nils Bubandt, 2015-05-06 The Empty Seashell explores what it is like to live in a world where cannibal witches are undeniably real yet too ephemeral and contradictory to be an object of belief In a book based on more than three years of fieldwork between 1991 and 2011 Nils Bubandt argues that cannibal witches for people in the coastal and predominantly Christian community of Buli in the Indonesian province of North Maluku are both corporeally real and fundamentally unknowable Witches known as gua in the Buli language or as suanggi in regional Malay appear to be ordinary humans but sometimes especially at night they take other forms and attack people in order to kill them and eat their livers They are seemingly everywhere and nowhere at the same time The reality of gua therefore can never be pinned down The title of the book comes from the empty nautilus shells that regularly drift ashore around Buli village Convention has it that if you find a live nautilus you are a gua Like the empty shells witchcraft always seems to recede from experience Bubandt begins the book by recounting his own confusion and frustration in coming to terms with the contradictory and inaccessible nature of witchcraft realities in Buli A detailed ethnography of the encompassing inaccessibility of Buli witchcraft leads him to the conclusion that much of the anthropological literature which views witchcraft as a system of beliefs with genuine explanatory power is off the mark Witchcraft for the Buli people doesn't explain anything In fact it does the opposite it confuses obfuscates and frustrates Drawing upon Jacques Derrida's concept of aporia an interminable experience that remains continuously in doubt Bubandt suggests the need to take seriously people's experiential and epistemological doubts about witchcraft and outlines by extension a novel way of thinking about witchcraft and its relation to modernity **General Orders** United States. War Department, **Report of the Government of Madras on the Indian Pearl Fisheries in the Gulf of Mannar** James Hornell, 1905 Insects and Other Arthropods of Tropical America Paul E. Hanson, 2016-06-15 Visitors to tropical forests generally come to see the birds mammals and plants Aside from butterflies however insects usually do not make it on the list of things to see This is a shame Insects are everywhere they are often as beautiful as the showiest of birds and they have a fascinating natural history With their beautifully illustrated guide to insects and other arthropods Paul E Hanson and Kenji Nishida put the focus on readily observable insects that one encounters while strolling through a tropical forest in the Americas It is a general belief that insects in the tropics are larger and more colorful than insects in temperate regions but this simply reflects a greater diversity of nearly all types of insects in the tropics On a single rainforest tree for example you will find more species of ant than in all of England Though written for those who have

no prior knowledge of insects this book should also prove useful to those who study them In addition to descriptions of the principal insect families the reader will find a wealth of biological information that serves as an introduction to the natural history of insects and related classes Sidebars on insect behavior and ecological factors enhance the descriptive accounts Kenji Nishida's stunning photographs many of which show insects in action in their natural settings add appeal to every page A final chapter provides a glimpse into the intriguing world of spiders scorpions crabs and other arthropods

Collected Papers, 1920 Consists of reprints of articles from various journals Collected Papers Johns Hopkins University. School of Hygiene and Public Health, 1920 *The Journal of Experimental Zoology* Ross Granville Harrison, William Keith Brooks, 1920 A separate section of the journal Molecular and developmental evolution is devoted to experimental approaches to evolution and development Seaside Naturalist Deborah A. Coulombe, 1990-02-14 An illustrated guide to the characteristics of some of the 200 000 different plants and animals that live in the ocean *Recent Antarctic and Subantarctic Brachiopods* Merrill W. Foster, 1974 Published by the American Geophysical Union as part of the Antarctic Research Series Volume 21 The Recent brachiopod faunas from southernmost South America Antarctica and the Subantarctic consisting of 21 genera and 37 species are described from new material New taxa include the genera *Manithyris* and *Bathynanus* Also new are 11 species *Compsothyris ballenyi* *Hispanirhynchia chiliensis* *Manithyris rossi* *Liothyrella multiporosa* *Liothyrella scotti* *Bathynanus tenuicostatus* *Eucalathis macrorhynchus* *Amphithyris hallettensis* *Dallina eltanini* *Fallax antarcticus* and *Magellania spinosa* Factor analysis was used to study relationships among morphological characters and environmental parameters In *Liothyrella* negative associations were found between beak height and water depth The size of the pedicle opening within this genus is associated with the width of the hinge plate and the loop apparently these associations are related to increased dorsal adductor muscle size with increased pedicle size Similar relationships are found in the terebratulids although here all of the characters are also negatively associated with water depth Characters negatively associated with water depth may relate to the differing current strength at various depths Puncta density is positively correlated with water temperature Examples of brachiopod variation are discussed Synonyms have resulted from former failure to study large samples and to appreciate the extent of brachiopod variation A priori valuation of certain characters as being specific is unwarranted since sibling species may be more similar than different subspecies of the same species Many Recent and fossil brachiopod genera are too narrow in definition owing to oversplitting or to a narrow conception of monophyly I advocate somewhat broader and more practical genera for obtaining the maximal information value from such taxa Brachiopods contrary to popular belief are an abundant and viable group in the southern hemisphere faunas Most brachiopods in the Ross Sea appear to have definite niches and habitats but may overlap geographically where population densities are low Brachiopods here can be divided roughly into a slope and a shelf assemblage The greatest species diversity occurs at the seaward edge of the Ross Sea shelf interpreted as an ecotone effect where two different water types meet Only South America and Antarctica appear to have or

have had direct communication between some elements of their brachiopod faunas Other similarities between separate southern continents are related to retention of common pre Cenozoic elements or to chance dispersal of larvae across barriers Events related to cooling during the late Pliocene or Pleistocene caused reduction of puncta density shell thickness and spiculation in the Recent fauna and apparently influenced the present species structure at least in *Liothyrella uva* *Gyrothyris mawsoni* and *Macandrevia* **Asian Marine Biology** Brian Morton,1993-08-10 This is the annual journal of the Marine Biological Association of Hong Kong It contains papers on marine subjects of interest to all Asian biologists Elihu Root Collection of United States Documents ,1905 *Index of General Orders and Circulars* United States.
