Ems Stress An Emergency Responders Handbook For Living Well:

EMS Stress Ray Shelton, Jack Kelley, 1994 Written by an emergency responder for emergency responders this unique reference explains how to cope successfully with every day stress as well as the critical incident stress encountered by the pre hospital care provider It is a self help book utilizing examples and case studies to provide an emotional as well as intellectual impact

Stress Management for the Emergency Care Provider Alan A. Mikolaj, 2005 Unfortunately stress is an occurrence for emergency services personnel For over 20 years the effects of stress have been studied and various approaches have been established Critical Incident Stress Management project by Mikolaj is a new approach based on some past principles Presents chapters on escaping overload finding the support you need lowering stress at the station assessing your career stress and more For all emergency responders

Stress Clarke M. Ivanich, 2002 Stress seems to be an affliction common to almost everyone living in the 21st century except perhaps a few inhabitants of some far off islands untouched by modern society But what is it And more importantly what is there we can do about it Some research says we need it but this seems hard to believe Other research no less believable says we don't need it but we can manage it About the only thing about stress that seems certain is that there is a lot of it around and that the less of it that lands on a person the better This book gathers new and important citations from both the journal and the book literature and provides access through author subject and title indexes

Medic Life John Becknell, 1995 Focusing on career dissatisfaction in emergency services this text offers skills and methods of organization and creating setting and meeting goals in the provider's personal and professional life These skills aim to help the provider achieve a sense of pride and accomplishment

Bureau of Labor Statistics,2002-04 **The Impact of Specialized Training for Emergency Medical Services**

Specialists on the Accuracy of Triage in Emergency Departments Sultan Ibrahim Alkathiri,Abdullrahman Awad Alotaibi,Mohammed Yahya Alshehri,Mohammed Mansour Alotibi, In medical emergencies time is of the essence This requires each and every member involved in healthcare especially emergency departments ED to have a kind of precision which goes without question to make decisions rapidly and with the highest level of skill Similarly on such a sea of pain and noise where patients are nameless and faceless it is essential to prioritize patients and opt to help those who might be saved by some simple procedure that takes little time at all This skill called triage is at the heart of emergency care and makes sure that patients receive appropriate treatment when they need it most Triage has long been seen as a province of emergency rooms

and the battlefield but how well it is done can depend much on skills and expertise In emergency medical services EMS today the field has shifted with specialized training programs playing an increasingly important role Training programmes seek to deepen the knowledge base and refine the judgment systems of paramedics EMTs and other EMS specialists The eventual result is that care given to patients once they step through those hospital doors becomes closely dependent on these programs This book entitled The Impact of Specialized Training for Emergency Medical Services Specialists on Triage in Emergencies will study how EMS completion rates affect triage decision making Key to this study is the relationship between specialized education and hands on training versus patient results accuracy and effectiveness of triage under crisis conditions in an emergency environment The book collates insights from research findings expert opinions case studies and interviews with people in the field to explain the critical role that EMS specialists especially those who have received advanced specialized training play in shaping initial ED assessments We study how this specialized training changes decision making processes the handling of patients who are critically ill or injured and how it can eliminate mistakes that arise when people makes judgments about patients trapped in battle conditions such as in the field This work seeks to highlight not just the profound impact of specialized training but also underscores the need to continually update and improve EMS training programmes in order to stay ahead of what are now rapidly growing challenges In this way we hope to provide valuable guidance for health professionals administrators policy makers and educators aiming to enhance patient care emergency services and the broader relationship between training and triage We aim by discussing both the theoretical frameworks and practices in specialized EMS training to highlight the unarguable links which exist between better emergency care systems and an efficiently trained EMS personnel Such an issue looms vastly important as swift and timely decision making in triage too often hinges on the question of life or death Finally as you read these chapters we invite you to tread into a substantial topic how it is that advanced specialized training can significantly affect the outcome of emergency medical care and what new advances may be within reach for the whole triage process globally
