The Future of Post-Human Performing Arts Peter Baofu,2013-01-03 Are the performing arts really supposed to be so radical that as John Cage once said in the context of music there is no noise only sound since he argued that any sounds we can hear can be music WK 2007a D Harwood 1976 This radical tradition in performing arts with music as an example here can be contrasted with an opposing view in the older days when Greek philosophers and medieval theorists in music defined music as tones ordered horizontally as melodies and vertically as harmonies Music theory within this realm is studied with the presupposition that music is orderly and often pleasant to hear WK 2007a Contrary to these opposing traditions and other views as will be discussed in the book performing arts in relation to both the body and its presence is neither possible nor desirable to the extent that the respective ideologues on different sides would like us to believe Needless to say the challenge to these opposing traditions in performing arts does not imply that performing arts are worthless human endeavors or that those fields of study related to performing arts like aesthetics acoustics communication studies psychology culture studies sociology religion morality and so on should be rejected too Of course neither of these extreme views is reasonable Instead this book provides an alternative better way of understanding the future of performing arts especially in the dialectic context of the body and its presence while learning from different approaches in the literature but without favoring any one of them or integrating them since they are not necessarily compatible with each other In other words this book offers a new theory that is the transdisciplinary theory of performing arts to go beyond the existing approaches in a novel way If successful this seminal project will fundamentally change the way that we think about performing arts from the combined perspectives of the mind nature society and culture with enormous implications for the human future and what the author originally called its post human fate

Portrait Painting Atelier Suzanne Brooker, 2011-11-15 The art of portraiture approached its apex during the sixteenth century in Europe with the discovery of oil painting when the old masters developed and refined techniques that remain unsurpassed to this day The ascendancy of nonrepresentational art in the middle of the twentieth century displaced these venerable skills especially in academic art circles Fortunately for aspiring artists today who wish to learn the methods that allowed the Old Masters to achieve the luminous color and subtle tonalities so characteristic of their work this knowledge has been preserved in hundreds of small traditional painting ateliers that persevered in the old ways in this country and throughout the world Coming out of this dedicated movement Portrait Painting Atelier is an essential resource for an art community still recovering from a time when solid instruction in art technique was unavailable in our schools Of particular value here is a demonstration of the Old Masters technique of layering paint over a toned ground surface a process that builds from the transparent dark areas to the more densely painted lights This method unifies the entire painting creating a beautiful glow that illuminates skin tones and softly blends all the color tones Readers will also find valuable instruction in paint mediums from classic oil based to alkyd based the interactive principles of composition and photograph based composition and the anatomy of the human face and the key relationships among its features Richly illustrated with the work of preeminent masters such as Millet Gericault and van Gogh as well as some of today's leading portrait artists and featuring seven detailed step by step portrait demonstrations Portrait Painting Atelier is the first book in many years to so comprehensively cover the concepts and techniques of traditional portraiture
