

A high-angle, top-down photograph of a person with long brown hair, wearing an orange long-sleeved shirt, sitting at a teal desk. Their hands are on a silver laptop keyboard. To the left of the laptop is an open book and a pair of scissors. To the right is a black smartphone. In the bottom right corner, a pair of glasses and a small black object are visible. The scene is lit with warm, golden light, creating a focused and studious atmosphere.

Further Education Unit, 1989 Those responsible for coordinating flexible and open learning in colleges should consider whether the time may be right to seek common ground on the issues and principles shared by the many related initiatives in Great Britain during the last two decades Two principles that are important to flexible learning are that education's effectiveness is measured by the extent to which it enhances the individual's self esteem and or progression through qualification and that the student must be actively engaged in learning The initiatives have included distance learning individualized instruction integrated assignments and open learning including the Open University and Open Tech An understanding of the need for counseling and tutorial support has emerged and consequently the terms supported self study and personal development plans have tended to replace terms such as open learning Less attention is now paid to materials production and more to the following activities 1 accreditation 2 modularization of courses 3 evaluation and adaption of materials and 4 implementation of student support and staff development Many initiatives have failed to become fully embedded across their host institutions When embedding occurs the focus of control of the learning process moves toward the learner One way to embed flexible learning is to use an in college flexible learning workshop for the college's own staff development CML
