Annotated bibliography** ,1976      **The Measure of Poverty** Urban Systems Research & Engineering,1976      Strategic Reforms for Agricultural Growth in Pakistan Rashid Faruquee,1999 Future prospects for the agricultural sector in Pakistan depend on its ability to increase output and income of producers Agriculture remains the backbone of the Pakistani economy employing more than half the labor force and accounting for 70 per cent of export revenues However agriculture faces two sets of constraints in Pakistan resource constraints and policy distortions This volume deals with the major resource and policy constraints currently facing Pakistani agriculture Government involvement in Pakistan s agricultural sector has been excessive and often inappropriate and agricultural reforms are a key part of the adjustment program underway in Pakistan Some of the principal goals of the program are to ensure a sound and sustainable macroeconomic framework with sustainable internal and external balances to liberalize trade privatize government owned enterprises deregulate and eliminate public sector monopolies and to reform the financial sector The agricultural sector can contribute to the Pakistani economy and to the adjustment program Agriculture has the potential to make a larger contribution to total revenue and plays an important role in external balances A favorable climate gives Pakistan a strong comparative advantage in horticulture as indicated by the rapid growth of the subsector in the absence of policy interventions      **The Flight from Rural Poverty--how Nations Cope** Ellen M. *The Changing American Countryside* Emery N. Castle,1995 The literature on rural America to the extent that it exists has largely been written by urban based scholars perpetuating out of date notions and stereotypes or by those who see little difference between rural and agricultural concerns As a result the real rural America remains much misunderstood neglected or ignored by scholars and policymakers alike In response Emery Castle offers *The Changing American Countryside* a volume that will forever change how we look at this important subject Castle brings together the writings of eminent scholars from several disciplines and varying backgrounds to take a fresh and comprehensive look at the forgotten hinterlands These authors examine the role of non metropolitan people and places in the economic life of our nation and cover such diverse issues as poverty industry the environment education family social problems ethnicity race religion gender government public policy and regional diversity The authors are especially effective in demonstrating why rural America is so much more than just agriculture It is in fact highly diverse complex and interdependent with urban America and the international market place Most major rural problems they contend simply cannot be effectively addressed in isolation from their urban and international connections To do so is misguided and even hazardous when one fourth of our population and ninety seven per cent of our land area is rural Together these writings not only provide a new and more realistic view of rural life and public policy but also suggest how the field of rural studies can greatly enrich our understanding of national life      **Social**
