Flowing Progress Stefan Dorondel, Luminita Gatejel, 2025-08-15 Flowing Progress Transforming the Danube Through Infrastructure focuses on

how different political regimes and forms of governance have imagined and technologically transformed the most international river in the world Multidisciplinary and drawing on methodologies of history anthropology of infrastructure and science technology and society this collection explores the tensions between the river and its natural pulses the humans that populate its floodplains state agencies and infrastructure The book engages the concept of disturbance to point out the circular and spiraling dynamics between hydrological processes and technopolitical and economic practices Disturbance denotes a specific type of long term dynamic between human attempts to control the Danube the material systems they implemented to achieve these goals and the agency of the river that both enabled the functioning of infrastructure and the breakdown of such arrangements It draws particular attention to the concerted efforts to contain and optimize the Danube s flow adding layer after layer of dams channels and pipes that could potentially escalate the power of a leashed river Taking a longer historical perspective from the sixteenth century until today the volume provides a variety of relevant case studies and local contexts in the Ottoman and Habsburg empires and their successor states Austria Hungary Bulgaria Romania and Serbia which show different ways of how humans have imagined and coped with this mighty river

Flood Modeling, Prediction and Mitigation Zekâi Şen, 2017-11-03 This book draws on the author s professional experience and expertise in humid and arid regions to familiarize readers with the basic scientific philosophy and methods regarding floods and their impacts on human life and property The basis of each model algorithm and calculation methodology is presented together with logical and analytical strategies Global warming and climate change trends are addressed while flood risk assessments vulnerability preventive and mitigation procedures are explained systematically helping readers apply them in a rational and effective manner Lastly real world project applications are highlighted in each section ensuring readers grasp not only the theoretical aspects but also their concrete implementation

Modelling Uncertainty in Flood Forecasting Systems Shreedha Maskey, 2004-11-23 Like all natural hazards flooding is a complex and inherently uncertain phenomenon Despite advances in developing flood forecasting models and techniques the uncertainty in forecasts remains unavoidable This uncertainty needs to be acknowledged and uncertainty estimation in flood forecasting provides a rational basis for risk based criteria This book presents the development and applications of various methods based on probability and fuzzy set theories for modelling uncertainty in flood forecasting systems In particular it presents a methodology for uncertainty assessment using disaggregation of time series inputs in the framework of both the Monte Carlo method and the Fuzzy Extension Principle It reports an improvement in the First Order Second Moment method using second degree reconstruction and derives qualitative scales for the interpretation of qualitative uncertainty Application is to flood forecasting models for the Klodzko catchment in Poland and the Loire River in France Prospects for the hybrid techniques of uncertainty modelling and probability possibility transformations are also explored and reported

Comprehensive Water Quality and Purification, 2013-09-24 Comprehensive Water Quality and Purification Four Volume Set provides a rich source of methods for analyzing

water to assure its safety from natural and deliberate contaminants including those that are added because of carelessness of human endeavors Human development has great impact on water quality and new contaminants are emerging every day The issues of sampling for water analysis regulatory considerations and forensics in water quality and purity investigations are covered in detail Microbial as well as chemical contaminations from inorganic compounds radionuclides volatile and semivolatile compounds disinfectants herbicides and pharmaceuticals including endocrine disruptors are treated extensively Researchers must be aware of all sources of contamination and know how to prescribe techniques for removing them from our water supply Unlike other works published to date that concentrate on issues of water supply water resource management hydrology and water use by industry this work is more tightly focused on the monitoring and improvement of the quality of existing water supplies and the recovery of wastewater via new and standard separation techniques Using analytical chemistry methods offers remediation advice on pollutants and contaminants in addition to providing the critical identification perspective The players in the global boom of water purification are numerous and varied Having worked extensively in academia and industry the Editor in Chief has been careful about constructing a work for a shared audience and cause

Floods and Long-Term Water-Level Changes in Medieval Hungary Andrea Kiss,2019-05-15 The book provides an overview of the floods and major hydrological changes that occurred in the medieval Hungarian kingdom covering the majority of the Carpathian Basin between 1000 and 1500 AD The analysis was based on contemporary documentary evidence presented for the first time and the results of archaeological and scientific investigations Beyond the evidence on individual flood events the book includes a comprehensive overview of short medium and long term changes detected in a hydrologically sensitive environment during the transition period between the Medieval Warm Period and the Little Ice Age It also discusses the possible causes including climate and human intervention and the consequences for the physical and human environment namely the related hydro morphological changes short and long term social response and human perception issues

Normalizing an American Right to Health Christina S. Ho, 2023 Normalizing an American Right to Health argues against the conventional wisdom that a U S right to health is out of reach It shows that the necessary change is not extraordinary but familiar and that the law has already laid considerable groundwork in ordinary statutes and case law The book moves from the descriptive task of showing where a right to health already exists in our legal corpus to the prescriptive goal of showing how we could feasibly and meaningfully expand the right through ordinary policies that are widely used in other domains including impact assessments and state sponsored reinsurance

Sustainable Water Management Ken'ichi Nakagami, Jumpei Kubota, Budi Indra Setiawan, 2016-07-15 This book takes a new and critical look at the underlying factors that affect the management of water resources and its content is guided by three important visions With the theory vision the existing knowledge system for IWRM is reorganized in order to supplement new theories related to our society and science We then introduce two distinctive case studies on how to achieve sustainable water management Based on the social implementation vision one study is carried out by the Research Institute for Humanity and Nature on Indonesia's Bali Island where there is a long history of educational and inspirational local level water management systems with multistakeholder participation A further study is based on the harmony between science and society vision and the Ritsumeikan Global Innovation Research Organization Ritsumeikan University proposes innovative water recycling system for the sustainable development of Chongming Island an eco island that belongs to China These two studies highlight science with society a new perspective on science that could promisingly lead to more sustainable futures This book offers a valuable reference guide for all stakeholders and scholars active in water resources management
