, 1999 Grants for Matching and Challenge Support 1999-2000 Foundation Center, 1999-12 **White House Initiative On Educational Excellence For Hispanic Americans, Fiscal Year 1999/2000 Annual Performance Reports, September 2000**, 2001 **The Politics of Performance Funding for Higher Education** Kevin J. Dougherty, Rebecca S. Natow, 2015-05-15

One of the striking ways in which state governments have pursued better performance in public higher education is through the use of performance funding Performance funding involves tying state support directly to institutional performance on specific outcomes such as rates of graduation and job placement The principal rationale for performance funding has been that the introduction of market like forces will prod institutions to become more efficient delivering more bang for the buck Kevin Dougherty an expert on state performance funding finds its development puzzling First despite the great interest in it only half the states have ever adopted performance funding for higher education Moreover of the states that did adopt performance funding over half later dropped it Finally in the states that have retained performance funding over a long period of time their programs have undergone considerable changes in the amount of state funding they devote to performance funding and in the content of the indicators they use to allocate that funding In spite of this performance funding continues to attract interest as a way of improving educational outcomes This book based on an extensive ten state study aims to shed light on the social and political factors affecting the origins evolution and demise of these programs **Rural Health Services Funding**, 2000 **Handbook of Research in Education Finance and Policy** Helen F. Ladd, Edward B. Fiske, 2012-08-21

Sponsored by the Association for Education Finance and Policy AEFPP this groundbreaking new handbook assembles in one place the existing research based knowledge in education finance and policy thereby helping to define this evolving field of research and practice It provides a readily available resource for anyone seriously involved in education finance and policy in the United States and around the world The Handbook traces the evolution of the field from its initial focus on school inputs and the revenue sources used to finance these inputs to a focus on educational outcomes and the larger policies used to achieve them It shows how the current decision making context in school finance inevitably interacts with those of governance accountability equity privatization and other areas of education policy Because a full understanding of the important contemporary issues requires input from a variety of perspectives the

Handbook draws on contributors from a variety of disciplines While many of the chapters cover complex state of the art empirical research the authors explain key concepts in language that non specialists can understand

Funding Public Colleges and Universities for Performance Joseph C. Burke,2002-10-10 This is the first comprehensive study of performance funding of public colleges and universities which directly ties some state allocations to institutional results on designated indicators The book examines performance funding as a national phenomenon identifying the champions and critics of the program the arguments for and against its adoption the most common performance measures used for funding the characteristics that separate stable from unstable initiatives and the inherent possibilities and problems The authors include case studies of performance funding in Tennessee Missouri Florida Ohio and South Carolina and explore the reasons why Arkansas Colorado Kentucky and Minnesota first adopted and later abandoned their programs They examine problems with performance funding such as the reluctance of the academic community to agree on reasonable goals for undergraduate education or the failure to apply performance funding to the academic departments that are mostly responsible for institutional results on many of the performance indicators The contributors conclude that although the future of performance funding remains cloudy one aspect is becoming clear taxpayers are unlikely to continue to accept the proposition that performance should count in all endeavors except state funding for higher education Contributors include E Grady Brogue Joseph C Burke Juan C Copa Patrick Dallet Terri Lessard Gary Moden Dr Robert B Stein Michael Williford and David J Wright

Defending the Community College Equity Agenda Thomas Bailey,Vanessa Smith Morest,2006-12-26 Winner of the 2007 Outstanding Publication Award given by the American Educational Research Association Division J Community colleges enroll almost half of all undergraduates in the United States These two year colleges manifest the American commitment to accessible and affordable higher education With about 1 200 institutions nationwide community colleges have made significant progress over the past decade in opening access and have become the critical entry point to higher education for many Americans who traditionally have been left out of educational and economic opportunity Yet economic political and social developments have

increased the challenges community colleges face in pursuing an equity agenda. Some of these include falling state budgets combined with growing enrollments, a greater emphasis on outcome based accountability, competition from for profit institutions, and growing immigrant student populations. These trials come at a time when community colleges confront crucial economic and workforce development pressures that may impact their mission. How can community colleges continue to maintain their open door policies, support underprepared students, and struggle to help enrolled students complete degrees and certificates that prepare them for success in the workplace? Building on case studies of colleges in six states: New York, Texas, Florida, California, Washington, and Illinois, this volume offers a fresh examination of the issues currently facing American community colleges. Drawing on their fieldwork supplemented by national data, the authors analyze how these challenges impact the community college mission of educational opportunity, especially for low income students, students of color, and other underserved groups, and how colleges are responding to a drastically different environment. They then propose a set of strategies to strengthen the role of community colleges in providing both access and opportunities for achievement for all students.

Vouchers within Reason James G. Dwyer, 2018-10-18. Observing the storm of recent debates around school vouchers, James G. Dwyer concludes that the welfare of children has been routinely subordinated to the interests and supposed rights of various groups of adults: parents, teachers, taxpayers, and advocates for ideological causes. Dwyer argues that a truly child centered approach to education reform would yield dramatically different conclusions regarding the morality and constitutionality of government initiatives to improve public and private schooling in America. Dwyer makes the case that state funding of religious and other private schools is not only permissible but mandatory as a moral and constitutional right of the children already in private schools. In *Vouchers within Reason*, he also demonstrates the necessity of attaching to that funding robust standards for the content and nature of instruction and for treatment of

students These are just the sort of regulatory strings that most current supporters of vouchers fear In the author s view vouchers represent an opportunity for states to accomplish what they have been unable to do in the past namely to bring academic accountability to religious schools many of which fail to provide a good secular education He sees voucher programs that are now in place as morally irresponsible and clearly unconstitutional however because they require almost nothing of recipient schools in return for the funding This book reorients the hot topic of universal school vouchers in a new and vital direction that may change the minds of scholars educators and policymakers alike **General Acts, Resolutions, and Memorials Adopted by the ...
