Embodied Wisdom Alison Pryer, 2010-12-01 Embodied wisdom: Meditations on memoir and

education by Alison Pryer. Ph.D. explores the interconnectedness of body, mind, and spirit within diverse educational contexts. Evocative, sensual prose carries the reader on a journey through the personal and the remembered in a layered series of autobiographical essays, each one affording deeper insights into the ways in which the inner emotional life of an educator is intertwined with everyday embodied practice. This is a provocative text alive with the richness and complexity of pedagogical experience, one that acknowledges the presence of the body, the spirit, the passionate, the subjective, the intuitive, the chaotic, and the sacred in all the relationships that make teaching and learning possible. In speaking beyond the limitations of dualistic pedagogy in its diverse forms and locations, *Embodied wisdom* enters at times into unexpected and little explored pedagogical territories, engaging with educational contexts that our dualistic culture often denigrates, dismisses, or considers taboo. This work offers readers subtle understandings of the centrality of love, desire, and eros in teaching and learning, carefully examines the connections between powerful family and school pedagogies, including domestic violence against women and childhood sexual abuse, opens up a textual space in which to contemplate the contemporary relevance of the ancient wisdom of Zen pedagogy, and gives serious consideration to the role that the public pedagogies of popular culture play in the formation of personal and cultural identity. The work of healing our dualistic educational culture is a significant political and ethical undertaking, a matter of social justice. *Embodied wisdom* is a book that lights the way for those who want to engage in meaningful cultural transformation. It is, above all, a generative and hopeful text, one that makes possible new kinds of conversations. It will be of interest to curriculum theorists and teacher educators as well as those engaged in holistic education, social ecology, women's and gender studies, and cultural studies. This award-winning ground-breaking exploration of memoir as methodology is also an exquisitely written resource for those engaged in innovative arts-based and autobiographical research.

Teaching and Learning Japanese Martial Arts Vol. 1: Scholarly Perspectives Michael DeMarco, 2017-03-05 In contrast to the overabundance of writings about martial arts that are often promotional and misinformative there are rare works by scholars that are praiseworthy for their sincere unbiased approach to writing This is the very definition of scholarly This two volume anthology brings together the best scholarly works published in the Journal of Asian Martial Arts on the topic of teaching and learning Japanese martial arts In this volume you will find ten chapters that dive deep into Japanese martial traditions combining aspects of history and culture that explain how teaching methods developed and evolved Dr Harrison Pepper's chapter sets the tone with a focus on the fundamental student teacher relationship that is responsible for the transmission of any art She uses sociological and performance studies to analyze the martial art's maturing process Understanding the teacher student relationship is vital for all involved Japanese combative arts Since Japan was ruled by a warrior class for nearly 700 years it is necessary to understand the method by which warriors were educated through the ryuha system Nyle Monday's chapter presents this system Dr Lewis Hershey explores the way in which a martial art can serve as a vehicle for non discursive intercultural exchange in the teaching process His chapter provides a discussion of the importance of embodying the feeling or aesthetic of a particular system as a way of knowing and understanding martial techniques The next three chapters were originally prepared for a meeting of the Association for Asian Studies Dr Paul Varley states that most who have written about martial arts practice are not trained scholars and their writings vary greatly in quality He discusses the state of writing in this field and introduces the other authors Dr Cameron Hurst discusses the characteristics of the martial arts that place them squarely into the category of artistic ways along with such familiar arts as Noh the tea ceremony and flower arranging This reflects the family headship system of instruction to carry on the school's traditions Dr Karl Friday defines the term ryuha as branch of the current representing the onward flow of a stream of thought the branches betoken the splitting off that occurs as insights are passed from master to students generation after generation His chapter shows how ryuha exist to hand on knowledge with pattern practice kata being the core of transmission Is it warrior's individualism that is prized in modern conformity ridden Japanese culture or is this an erroneous interpretation of the idealized warrior image by Westerners In the next chapter Dr Wayne VanHorne's research is persuasive showing that the ultimate goal of the training is to foster individuals to contribute to the betterment of the collective society

with social responsibility In the following chapter Dr John Donohue analyzes the organizational components of traditional martial arts training and relates them to modern pedagogical theories He concludes that the instructional theory embedded in martial arts training is at least as sophisticated and highly developed as are the techniques and philosophies of these systems In the next chapter he examines kata training as 1 a cultural activity that has been shaped by the structural characteristics of Japanese culture and kata training as 2 a highly structured and effective mechanism for imparting technical skill in the martial arts Kim Taylor provides the final chapter dealing with progressive instruction found in many kata based martial arts Using iaido sword drawing as an example he demonstrates how a set of practice can build one kata after the other from simple to more complex ideas and provide a deeper understanding of the entire set If you are interested in Japanese martial traditions you will find much in these ten chapters that clarify why the arts are taught according to a longstanding tradition and also why there have been evolutionary changes in the instructional methods There is sound logic for the old traditions as well as for the changes The scholarly research presented in this anthology will improve a teacher's way of instructing and help a student understand what to expect out of his or her studies

and Learning in Urban Agricultural Community Contexts Isha DeCoito, Amie Patchen, Neil Knobloch, Levon Esters, 2021-09-07
This book fills a void in the literature around how urban agricultural education can be used to create opportunities to educate youth and citizens who live in urban areas about growing food To date very little has been written about program design and the impact of such experiences on learning outcomes In fact most of the journal articles and research to date has focused on access contextual factors sustainability relevance of urban agricultural education and the intersection of science of agriculture This book will cover such topics as how urban youth learn science while engaged in urban agriculture programs how such programs support youth in becoming interested about healthy eating and science more generally and how to design urban agriculture programs in support of STEM education The chapters in this book are written by educational researchers and each chapter has been reviewed by researchers and practitioners
