**Scenario Planning** Thomas Chermack, 2017-02-03 Pierre Wack was head of scenario planning at Royal Dutch Shell Oil in London for just over ten years. He died in 1997. He was a pioneer of what we know today as scenario planning, an alternative and complement to strategic planning. Scenarios explore a variety of possible futures for examining decisions in organizational planning. Pierre was a unique man with interests in Indian and Japanese cultures and traditions. He travelled extensively and led a unique life that involved long periods of visiting gurus in India and extended sabbaticals in Japan. His experiences with Eastern thought no doubt shaped his ability to evolve the scenario method at Shell, and as a result, he was able to lead a team that foresaw the oil crises of the 1970s and 80s. This new volume will cover the basic context of his life, timeline, and attach it to the development of his thinking about scenario planning over the course of his career. After his death, Wack's materials, papers, and documents were collected by Napier Collyns and have recently been made available at the University of Oxford, where the Pierre Wack Memorial Library has been established. These documents contain a variety of clues and stories that reveal more about who Pierre Wack was, how he thought, and will provide details about scenario planning that have never been seen or published. They also reveal a curious man and include a timeline written by his wife Eve, which details their relationship over the course of 40 years. Written for management and business historians and researchers, this book will uncover unseen contributions by a scenario planning pioneer shaped by significant events in his personal life that helped him to see the world differently.

**What the Ancestors Knew** Joanne P. Miller, 2023-11-30 This book is intended to engender debate. Its subject, faith in a modern Buddhist context, almost always carries with it the widespread but erroneous assumption that it is completely unimportant to the Buddhist path. Without really knowing what it is and how it differs from theistic versions, faith has been given a bad name. Moreover, naivety regarding the colonial orientalist agenda and bias of early Zen exegetes in the West has allowed modern Zennists to accept almost unquestioningly the view that faith and knowledge occupy opposite ends of the practice spectrum. As a result, trusted and authentic sources of authority, Zen ancestors and sutras, have often been prevented from speaking about a doctrinally sound and legitimate tool of realization mentioned in a stunningly large amount of sutras. It has also resulted in an erroneous and often condescending view of faith schools of Buddhism. Now is the perfect time in Zen's journey in the West to reassess and address these shortcomings.

**Rediscovering the West** Stephen C. Rowe, 1994-08-16

**Gathering the Light** V. Walter Odajnyk, 2011-12 Originally published by Shambhala in 1993, *Gathering the Light* is a significant contribution to Jungian psychology and to research concerning the relationship between psychological and spiritual development. *Gathering the Light* remains a groundbreaking work that integrates Jungian psychology, alchemy, and the practice of meditation. It is one of very few, if not the only Jungian book that demonstrates that the alchemical opus is not only an analogy of the individuation process but also a depiction of various experiential stages encountered in the course of meditation. *Gathering the Light* compares Western and Eastern images of the goal of alchemy and of meditation practice; it offers a psychological

interpretation of the Zen Ox Herding pictures it argues that in essence both psychological and spiritual development consists of the withdrawal of projections and the appendix offers a critique of Wilber's mistaken view of Jung's conception of archetypes and provides a critical review of Thomas Cleary's translation of *The Secret of the Golden Flower* **Holy Faces** Julie K. production with individuality products with place and utilitarian benefit with environmental responsibility In so doing the author explores How understandings of human meaning affect design and how design can better incorporate issues of personal meaning How mass production needs to become integrated with localised production and service provision How short lived electronic goods can be brought into a more sustainable design paradigm The changing role of the designer in a post consumerist world Taking a design centred approach a combination of creative propositional design practice reasoned argument and theoretical discussion the book will impel readers to investigate the nature of contemporary material culture and its relationship to both the natural environment and to deeper notions of human meaning
