The SAGE Encyclopedia of Alcohol Scott C. Martin, 2014-12-16. Alcohol consumption goes to the very roots of nearly all human societies. Different countries and regions have become associated with different sorts of alcohol: for instance, the beer culture of Germany, the wine culture of France, Japan and sake, Russia and vodka, the Caribbean and rum, or the moonshine culture of Appalachia. Wine is used in religious rituals and toasts are used to seal business deals or to celebrate marriages and state dinners. However, our relation with alcohol is one of love and hate. We also regulate it and tax it; we pass laws about when and where it's appropriate; we crack down severely on drunk driving, and the United States and other countries tried the failed Noble Experiment of Prohibition. While there are many encyclopedias on alcohol, nearly all approach it as a substance of abuse, taking a clinical/medical perspective on alcohol, alcoholism, and treatment. The SAGE Encyclopedia of Alcohol examines the history of alcohol worldwide and goes beyond the historical lens to examine alcohol as a cultural and social phenomenon as well, both for good and for ill, from the earliest days of humankind.

Winemaking Richard P. Vine, Bruce Bordelon, Ellen M. Harkness, Theresa Browning, 2013-06-29 During the past several decades considerable interest has developed in the United States for the wines that are produced in small wineries across our nation This interest continues to intensify especially for the truly good wines that are reasonably priced Consumers are unforgiving Second class wines will not be acceptable just because a vintner may be newly established The functions that must take place in the small estate type wine cellar and the controls that can be realistically exercised by winemasters are essential in the creation of superior products Although wine can be a comparatively simple food to produce it is a very vast

topic Perhaps much the same as with other art forms it is the infinite variability of factors at the root of the subject that renders it so complex There are hundreds of different wine varieties cultivated around the world and doubtlessly an even greater number of fruit and berry cultivars Combined with such factors as soils climates and mesoclimates which may change with each vintage season cultivation techniques harvesting criteria and overall operational philosophy one can easily understand the enormous breadth and depth of variation which exists This diversity along with more than 5 years of enological development generates a number of different wine possibilities that can only be conceived as something vastly exponential
