*Francis Bacon and the Rhetoric of Nature* John C. Briggs, 1989      **Shakespeare's Theater of Nature** Aaron Kitch, 2025-03-06 Shakespeare's Theater of Nature argues that Shakespeare combined art and nature in new ways while experimenting with relations between words images and objects as sources of knowledge and pleasure Shakespeare's recentering of nature as a source of theatrical representation in a range of plays follows debates in natural philosophy and theology about how to understand divinity in and through the order of nature ordo creationis Early chapters analyze early modern reframing of nature by printed books of botany cosmology and history as well Tudor interludes that center nature as a subject while later chapters offer readings of eight plays by Shakespeare that draw on classical medieval and early modern debates in natural philosophy and theology to create new modes of dramatic mimesis      **A Handbook to the Reception of Classical Mythology** Vanda Zajko, Helena Hoyle, 2017-03-16 A Handbook to the Reception of Classical Mythology presents a collection of essays that explore a wide variety of aspects of Greek and Roman myths and their critical reception from antiquity to the present day Reveals the importance of mythography to the survival dissemination and popularization of classical myth from the ancient world to the present day Features chronologically organized essays that address different sets of myths that were important in each historical era along with their thematic relevance Features chronologically organized essays that address different sets of myths that were important in each historical era along with their thematic relevance Offers a series of carefully selected in depth readings including both popular and less well known examples

The Performance of Nobility in Early Modern European Literature David M. Posner, 1999-11-04 This valuable study illuminates the idea of nobility as display as public performance in Renaissance and seventeenth century literature and society Ranging widely from Castiglione and French courtesy manuals through Montaigne and Bacon to the literature of the Grand Si cle David Posner examines the structures of public identity in the period He focuses on the developing tensions between on the one hand literary or imaginative representations of nobility and on the other the increasingly problematic historical position of the nobility themselves These tensions produce a transformation in the notion of the noble self as a performance and eventually doom court society and its theatrical mode of self presentation Situated at the intersection of rhetorical and historical theories of interpretation this book contributes significantly to our understanding of the role of literature both in analysing and in shaping social identity      The Cambridge History of Science: Volume 3, Early Modern Science David C. Lindberg, Katharine Park, Ronald L. Numbers, Roy Porter, 2003 An account of European knowledge of the natural world c 1500 1700      *Speaking for Nature* Sylvia Bowerbank, 2004-06-28 The book contains perceptions of nature and ecology in writings by English women authors from the sixteenth seventeenth and eighteenth centuries Includes discussion of works by the writers Mary Wroth ca 1586 ca 1640 Margaret Cavendish 1624 1674 Mary Rich Warwick 1625 1678 Catherine Talbot 1721 1770 Mary Wollstonecraft 1759 1797      *Finding Nature's Order* Susan Giesemann North, 2007

**The Palgrave Handbook of Early Modern Literature and Science** Howard Marchitello, Evelyn Tribble, 2017-02-27

This book is about the complex ways in which science and literature are mutually informing and mutually sustaining. It does not cast the literary and the scientific as distinct but rather as productively in distinct cultural practices for the two dozen new essays collected here the presiding concern is no longer to ask how literary writers react to scientific writers but rather to study how literary and scientific practices are imbricated. These specially commissioned essays from top scholars in the area range across vast territories and produce seemingly unlikely unions between physics and rhetoric, math and Milton, Boyle and the Bible, plague and plays among many others. In these essays so-called scientific writing turns out to traffic in metaphor, wit, imagination and playfulness normally associated with literature, provides material forms and rhetorical strategies for thinking physics, mathematics, archeology and medicine. *Terms of Response* Robert L.

Montgomery, 2010-11-01 **Francis Bacon and the Limits of Scientific Knowledge** Dennis Desroches, 2006-09-15 While Francis Bacon continues to be considered the father of modern experimental science his writings are no longer given close attention by most historians and philosophers of science let alone by scientists themselves. In this new book Dennis Desroches speaks up loudly for Bacon showing how we have yet to surpass the fundamental theoretical insights that he offered towards producing scientific knowledge. The book first examines the critics who have led many generations of scholars in fields as diverse as literary criticism, science studies, feminism, philosophy and history to think of Bacon as an outmoded landmark in the history of ideas rather than a crucial thinker for our own day. Bacon's own work is seen to contain the best responses to these various forms of attack. Desroches then focuses on Bacon's *Novum Organum*, *The Advancement of Learning* and *De Augmentis* in order to discern the theoretical rather than simply the empirical or utilitarian nature of his programme for the renovation of the natural sciences. The final part of the book draws startling links between Bacon and one of the twentieth century's most important historians/philosophers of science, Thomas Kuhn, discerning in Kuhn's work a reprise of many of Bacon's fundamental ideas despite Kuhn's clear attempt to reject Bacon as a significant contributor to the way we think about scientific practice today. Desroches concludes then that Bacon was not simply the father of modern science he is still in the process of fathering it. **Francis Bacon on the Nature of Man** Karl Richards Wallace, 1967

**The Trials of Orpheus** Jenny C Mann, 2025-01-28 A revealing look at how the Orpheus myth helped Renaissance writers and thinkers understand the force of eloquence. In ancient Greek mythology the lyrical songs of Orpheus charmed the gods and compelled animals, rocks and trees to obey his commands. This mythic power inspired Renaissance philosophers and poets as they attempted to discover the hidden powers of verbal eloquence. They wanted to know: How do words produce action? In *The Trials of Orpheus* Jenny Mann examines the key role the Orpheus story played in helping early modern writers and thinkers understand the mechanisms of rhetorical force. Mann demonstrates that the forms and figures of ancient poetry indelibly shaped the principles of sixteenth and seventeenth century scientific knowledge. Mann explores how Ovid's version

of the Orpheus myth gave English poets and natural philosophers the lexicon with which to explain language's ability to move individuals without physical contact. These writers and thinkers came to see eloquence as an aesthetic force capable of binding, drawing, softening and scattering audiences. Bringing together a range of examples from drama, poetry and philosophy by Bacon, Lodge, Marlowe, Montaigne, Shakespeare and others, Mann demonstrates that the fascination with Orpheus produced some of the most canonical literature of the age. Delving into the impact of ancient Greek thought and poetry in the early modern era, *The Trials of Orpheus* sheds light on how the powers of rhetoric became a focus of English thought and literature.

**Francis Bacon's Inquiry Touching Human Nature** Svetozar Minkov, 2010-05-10 Francis Bacon's *Inquiry Touching Human Nature* is a study of Francis Bacon's moral philosophy in its relation to the enlightenment project he helped launch. Since Bacon is one of the founders of technological modernity, the book presents a meditation on the presuppositions and character of modern life. In its distinctiveness, modern life is characterized by a rejection as well as a reinterpretation of the classical and Christian approaches to life and conceptions of virtue. Svetozar Minkov follows closely Bacon's confrontation with the traditional views on courage, moderation, justice, wisdom, love and ways of dealing with death and general adversity. Bacon had a comprehensive vision of the human situation. He can help us think through the relation between power and wisdom. And because he saw the costs or dangers of modern life as clearly as he predicted and helped bring about its advancements and boons, Bacon is a thinker who addresses directly and deeply our own perplexities.

**Discovering Design** Richard Buchanan, Victor Margolin, 1995-04-15 *Discovering Design* reflects the growing recognition that the design of the everyday world deserves attention not only as a professional practice but as a subject of social, cultural and philosophic investigation. Victor Margolin, cofounder and an editor of the journal *Design Issues*, and Richard Buchanan, also an editor of the journal, bring together eleven essays by scholars in fields ranging from psychology, sociology and political theory to technology studies, rhetoric and philosophy. The essayists share the editors' concern first made clear in Margolin's *Design Discourse: History, Theory, Criticism* with the development of design studies as a field of interdisciplinary research. The contributors, Gianfranco Zaccai, Albert Borgmann, Richard Buchanan, Augusto Morello, Tufan Orel, Nigel Cross, Victor Margolin, Langdon Winner, Carl Mitcham, Tony Fry and Ezio Manzini, focus on three broad themes that form a sequence of fundamental issues: how to shape design as a subject matter, how to distinguish the activity of designing in the complex world of action and how to address the basic questions of value and responsibility that persistently arise in the discussion and practice of design. The editors' introduction provides a useful overview of these questions and offers a multidisciplinary framework for design studies. The essays discuss such topics as the relation of aesthetics to technology, the place of design in social action, the role of the consumer in design decisions and the need for ethical practice in contemporary design. Manzini's concluding essay shows how the issue of ethics should connect responsible behavior to decisions made every day in the manufacture of objects.

**Samuel Johnson's Pragmatism and Imagination** Stefka Ritchie, 2018-11-07 The central theme

of this book is an under studied link between the canon of Francis Bacon's and Isaac Newton's scientific and philosophical thought and Samuel Johnson's critical approach that can be traced in a textual study of his literary works. The interpretive framework adopted here encourages familiarity with the history and philosophy of science confirming that the history of ideas is an entirely human construct that constitutes an integral part of intellectual history. This further endorses the argument that intermediality can only be of benefit to future research into the richness of Johnson's literary style. As perceived boundaries are crossed between conventionally distinct communication media the profile of Johnson that emerges is of a writer of passionate intelligence who was able to combine a pragmatic approach to knowledge with flights of imagination as a true artist.

*Skepticism and Language in Early Modern Philosophy* Danilo Marcondes, 2020-12-10 Danilo Marcondes argues that contrary to a traditional view maintaining that language is not given any central role in early modern philosophy an early linguistic turn in the seventeenth century opened a place for the philosophy of language as part of the philosophical system then under construction. *Skepticism and Language in Early Modern Philosophy* The Early Linguistic Turn also claims that the revival of ancient skepticism at the modern age contributed decisively towards this linguistic turn insofar as it attacked the powers of the intellect in representing reality and making knowledge possible. Marcondes also argues that the concept of language itself becomes crucial to this investigation since the various understandings that developed during this period led to the central role that would be given to the philosophy of language in contemporary philosophy.

*Between Worlds* William Pallister, 2013-05-24 John Milton's *Paradise Lost* has long been celebrated for its epic subject matter and the poet's rhetorical fireworks. In *Between Worlds* William Pallister analyses the rhetorical methods that Milton uses throughout the poem and examines the effects of the three distinct rhetorical registers observed in each of the poem's major settings: Heaven, Hell, and Paradise. Providing insights into Milton's relationship with the history of rhetoric as well as rhetorical conventions and traditions this rigorous study shows how rhetorical forms are used to highlight and enhance some of the poem's most important themes including free will, contingency, and probability. Pallister also provides an authoritative discussion of how the omniscience of God in *Paradise Lost* affects Milton's verse and considers how God's speech applies to the concept of the perfect rhetorician. An erudite and detailed study of both *Paradise Lost* and the history of rhetoric *Between Worlds* is essential reading that will help to unravel many of the complexities of Milton's enduring masterpiece.

*Frame, Glass, Verse* Rayna Kalas, 2018-12-15 In a book that draws attention to some of our most familiar and unquestioned habits of thought from framing to perspective to reflection Rayna Kalas suggests that metaphors of the poetic imagination were once distinctly material and technical in character. Kalas explores the visual culture of the English Renaissance by way of the poetic image showing that English writers avoided charges of idolatry and fancy through conceits that were visual but not pictorial. Frames, mirrors, and windows have been pervasive and enduring metaphors for texts from classical antiquity to modernity as a result those metaphors seem universally to emphasize the mimetic function of language.

dividing reality from the text that represents it This book dissociates those metaphors from their earlier and later formulations in order to demonstrate that figurative language was material in translating signs and images out of a sacred and iconic context and into an aesthetic and representational one Reading specific poetic images in works by Spenser Shakespeare Gascoigne Bacon and Nashe together with material innovations in frames and glass Kalas reveals both the immanence and the agency of figurative language in the early modern period Frame Glass Verse shows finally how this earlier understanding of poetic language has been obscured by a modern idea of framing that has structured our apprehension of works of art concepts and even historical periods Kalas presents archival research in the history of frames mirrors windows lenses and reliquaries that will be of interest to art historians cultural theorists historians of science and literary critics alike Throughout Frame Glass Verse she challenges readers to rethink the relationship of poetry to technology

*The American Deists* Kerry S. Walters, 1992 Challenging carved in stone tenets of Christianity deism began sprouting in colonial America in the early 18th century was flourishing nicely by the American revolution and to all intents and purposes was dead by 1811 Despite its hasty demise deism left a theological legacy Christian sensibility would never be quite the same again **Science and Nature** Carolyn Merchant, 2017-11-07 Science and Nature brings together the work and insights of historian Carolyn Merchant on the history of science environmental history and ethics The book explores her ideas about the interconnections among science women nature and history as they have emerged over her academic lifetime Focusing on topics such as The Death of Nature the Scientific Revolution women in the history of science and environment and partnership ethics it synthesizes her writings and sets out a vision for the twenty first century Anyone interested in the interactions between science and nature in the past present and future will want to read this book It is an ideal text for courses on the environment environmental history history of science and the philosophy of science
