Maritime History at the Crossroads Frank Broeze,2017-10-18 This volume seeks to critically review the contemporary state of maritime historiography as it stands at the volume s publication date of 1995 The volume is comprised of thirteen essays each focused on the recent research into the maritime concerns of a particular geographical location listed as follows

Australia Canada China Denmark Germany Greece Ibero America India the Netherlands the Ottoman Empire Spain the United States and a final chapter concerning historians and maritime labour in Britain Australia and New Zealand One concern made evident by the collection is the lack of stable identity and cohesive aims within maritime history the subject holds many conflicting definitions and concepts The purpose of this volume is to explore the recent developments in maritime history plus the growth of scholarly interest to provide a beacon and stimulus for future work and to clearly direct and define maritime historiography toward a solid position in the field of history

The Fall and Rise of French Sea Power Hugues Canuel, 2021-04-15 The Fall and Rise of French Sea Power explores the renewal of French naval power from the fall of France in 1940 through the first two decades of the Cold War The Marine nationale continued fighting after the Armistice a service divided against itself The destruction of French sea power at the hands of the Allies the Axis and fratricidal confrontations in the colonies continued unabated until the scuttling of the Vichy fleet in 1942 And yet just over twenty years after this dark day Charles de Gaulle announced a plan to complement the country's nuclear deterrent with a force of nuclear powered ballistic missile carrying submarines Completing the rebuilding effort that followed the nadir in Toulon this force provided the means to make the Marine nationale a fully fledged blue water navy again ready to face the complex circumstances of the Cold War An important continuum of cooperation and bitter tensions shaped naval relations between France and the Anglo Americans from World War II to the Cold War The rejuvenation of a fleet nearly wiped out during the hostilities was underpinned by a succession of forced compromises often the least bad possible reluctantly accepted by French politicians and admirals but effectively leveraged in their pursuit of an independent naval policy within a strategy of alliance Hugues Canuel demonstrates that the renaissance of French sea power was shaped by a naval policy formulated within a strategy of alliance closely adapted to the needs of a continental state with worldwide interests This work fills a distinct void in the literature concerned with the evolution of naval affairs from World War II to the 1960s The author drawing upon extensive research through French British American and NATO archives including those made public only recently regarding the sensitive circumstances surrounding the French nuclear deterrent maps out for readers the unique path adopted in France to rebuild a blue water fleet during unprecedented circumstances

Sea Power in the Twenty-First Century Charles Koburger, 1997-09-16 As the U S Navy enters the twenty first century many of the ships aircraft weapons and tactics it employed so successfully during the Cold War will no longer be cost effective or even effective Future battlefields will shift the locus of naval action from the high seas into littoral waters demanding sustained operations in relatively narrow shallow waters Naval forces in the twenty first century must not only meet the traditional requirements of command of the sea ships planes troops and bases carrying out forward presence crisis response strategic deterrence and sealift They must now put these together to obtain the four key operational capabilities of littoral warfare command control intelligence and surveillance and communication battlespace dominance power projection and force sustainment The core of

the new U S strategic concept is power projection and it envisions naval forces directly leading Army and Air Force elements to influence events ashore most probably in the Third World And this navy must be cost effective The Western European and Mediterranean Theaters in World War II Donal Sexton,2011-10-06 The Western European and Mediterranean Theaters in World War II is a concise comprehensive guide for students teachers and history buffs of the Second World War With an emphasis on the American forces in these theaters each entry is accompanied by a brief annotation that will allow researchers to navigate through the vast amount of literature on the campaigns fought in these regions with ease Focusing on all aspects surrounding the U S involvement in the Western European and Mediterranean theaters including politics religion biography strategy intelligence and operations this bibliography will be a welcome addition to the collection of any academic or research library Routledge Research Guides to American Military Studies provide concise annotated bibliographies to the major areas and events in American military history With the inclusion of brief critical annotations after each entry the student and researcher can easily assess the utility of each bibliographic source and evaluate the abundance of resources available with ease and efficiency Comprehensive concise and current Routledge Research Guides to American Military Studies are an essential research tool for any historian Parameters ,1994 *New Interpretations in Naval History* William M. McBride,1998 The symposium itself had no central theme but 15 papers were selected for publication for their academic merit and for their presentation of new findings They are arranged in chronological sections from the age of sail to the postwar US Navy with a concluding keynote address on what naval history can contribute to a useful navy for 2017 No index Annotation copyrighted by Book News Inc Portland OR **The Journal of Military History** ,2004-07 **A Guide to the Sources of United States Military History** Robin Higham,Donald J. Mrozek,1998 Three Republics One Navy Anthony Clayton,2014-12-19 In the 1870s to supplement their early steam engines French warships were still rigged for sail In the 1970s the Marine Nationale s ships at sea included aircraft carriers operating supersonic jets and intercontinental ballistic missile submarines propelled by nuclear engines Within this one hundred years the Marine has played important roles in the acquisition of Asian and African colonial empires until 1900 the lead role in a naval Cold War against Great Britain in 1904 1920 preparation largely Mediterranean based for and participation in a Paris agenda in the First World War a spectacular modernization unfortunately incomplete in the inter war years division tragic self destruction and a rebirth in the Second World War important roles in the two major decolonization campaigns of Indochina and Algeria and finally in the retention of major world power status with power projection roles in the late 20th century requiring a navy with both nuclear age and traditional amphibious operational capabilities The enormous costs involved were to lead to reductions and a new naval relationship with Great Britain at the end of the 20th Century These successive radical changes were set against political dispute turmoil and in the years 1940 to 1942 violent division Political leaders from the 19th Century imperialists to the Fifth Republic sought a lead role for France or if not sufficient naval power to effectively influence allies and world affairs

Domestic economic difficulties more than once led to unwise navy on the cheap policies and construction programs The major post 1789 rift in French society appears occasionally among crews on board ships in docks and builders yards and in 1919 1920 open mutinies in ships at sea In this work the author has tried to weave together these very varied strands into a history of a navy whose nation s priorities have more often been land frontier defense the navy undervalued with a justifiable pride in its achievements poorly recognized A study of the history of the Marine is also useful and important contribution to wider studies of French national history over thirteen tumultuous decades *Naval Expeditions* Charles

Koburger,1997-09-30 In the Post Cold War Era the possibility of large scale military conflict between the superpowers has been replaced by the probability of a series of minor and perhaps not so minor regional ones Many if not most of those will take place within reach of seaborne expeditionary forces France organized such an expedition at the close of World War II in 1945 1946 to return to Indochina This account of that expedition provides a good case study of what such expeditions involve and moreover illustrates many politico military lessons and warnings for those like the U S who would project power from the sea east of the Suez today

The Royal Navy in World War II Derek G. Law,2003 The Royal Navy in World War II is a comprehensive annotated bibliography of all monographs describing the role of British Dominion and minor allied forces in the naval war against the Axis This second edition contains 1 400 more entries than its predecessor and although mainly concerned with the Royal Navy it does offer extensive coverage on the Dominion Navies of Australia Canada India and South Africa as well as the minor allied navies of the occupied European countries Coverage of the US Navy s involvement in the Atlantic and Caribbean Theaters is also included A wonderful reference for historians librarians and navy buffs
