Specifications of Letters Patent for Inventions and Provisional Specifications ,1879 **The Impact of the First World War on International Business** Andrew Smith,Kevin Tennent,Simon Mollan,2016-10-26 People throughout the world are now commemorating the centenary of the start of the First World War For historians of international business and finance it is an opportunity to reflect on the impact of the war on global business activity The world economy was highly integrated in the early twentieth century thanks to nearly a century of globalisation In 1913 the economies of the countries that were about to go war seemed inextricably linked The Impact of the First World War on International Business explores what happened to international business organisations when this integrated global economy was shattered by the outbreak of a major war Studying how companies responded to the economic catastrophe of the First World War offers important lessons to policymakers and businesspeople in the present concerning for instance the impact of great power politics on international business or the thesis that globalization reduces the likelihood of inter state warfare This is the first book to focus on the impact of the First World War on international business It explores the experiences of firms in Britain France Germany Japan China and the United States as well as those in neutral countries such as the Netherlands Sweden and Argentina covering a wide range of industries including financial services mining manufacturing foodstuffs and shipping Studying how firms responded to sudden and dramatic change in the geopolitical environment in 1914 offers lessons to the managers of today s MNEs since the world economy on the eve of the First World War has many striking parallels with the present Aimed at researchers academics and advanced students in the fields of Business History International Management and Accounting History this book goes beyond the extant literature on this topic namely due to the broad range of industries and countries covered The Impact of the First World War on International Business covers a broad range of geographical areas and topics examining how private firms responded to government policy and have based their contributions mainly on primary sources created by business people **Grassland-Invertebrate Interactions: Plant Productivity, Resilience and Community Dynamics** Ivan Hiltbold,Michael Rostás,2017-10-13 Natural and anthropogenic grasslands such as prairies meadows rangelands and pastures cover more than 40% of the planet s surface and provide a wealth of ecological services Grasslands alone store one third of the global carbon stocks and grass roots through their specific architectures ensure water cycling and prevent the erosion of fertile topsoil In addition grasslands are of vital importance for human food production as vast areas of rangelands and pastures provide feed for livestock Pastoral legumes mobilize atmospheric nitrogen and improve fertility of arable soils Not least grasslands are an essential genetic resource The three major crop species that feed half of the global population have been bred from wild grasses Ancestors of our contemporary turf cultivars common components of urban landscapes and recreation spaces originated from wild grasslands Although natural and managed grasslands represent pivotal ecosystems many aspects of how they function are poorly understood To date most attention has focused on grassland

primary producers i.e forage plants and mammalian grazers but invertebrates are likely to play an equally if not more important role in grassland ecosystem functioning In Australian pastures for example the biomass of root feeding scarab beetles can often exceed that of sheep and plant damage caused by invertebrates is sometimes equivalent to an average dairy cow's grass consumption Indeed grasslands are one of the most densely populated ecosystems with invertebrates being probably the most important engineers that shape both plant communities and the grassland as a whole In a rapidly changing world with increasing anthropogenic pressure on grasslands this Research Topic focuses on 1 How grassland habitats shape invertebrate biodiversity 2 Impacts of climate change on grassland invertebrate interactions 3 Plant and invertebrate pest monitoring and management 4 Plant mediated multitrophic interactions and biological control in grasslands 5 Land use and grassland invertebrates 6 Plant resistance to invertebrate pests Given the increasing demand for food and land for human habitation unprecedented threats to grasslands are anticipated Resilient to some extent these key ecosystems need to be better comprehended to guarantee their sustainable management and ecosystem services **Pierre Julien** Michael Preston
