Fraser Statistics An Introduction:

Statistics, an Introduction Donald A. S. Fraser, 1958 **Answers to Problems in D.A.S. Fraser's Statistics, an Introduction** Donald Alexander Stuart Fraser, I. Guttman, 1958* The Cult of Statistical Significance Deirdre Nansen McCloskey, Steve Ziliak, 2010-02-11 McCloskey and Ziliak have been pushing this very elementary very correct very important argument through several articles over several years and for reasons I cannot fathom it is still resisted If it takes a book to get it across I hope this book will do it It ought to Thomas Schelling Distinguished University Professor School of Public Policy University of Maryland and 2005 Nobel Prize Laureate in Economics With humor insight piercing logic and a nod to history Ziliak and McCloskey show how economists and other scientists suffer from a mass delusion about statistical analysis The quest for statistical significance that pervades science today is a deeply flawed substitute for thoughtful analysis Yet few participants in the scientific bureaucracy have been willing to admit what Ziliak and McCloskey make clear the emperor has no clothes Kenneth Rothman Professor of Epidemiology Boston University School of Health The Cult of Statistical Significance shows field by field how statistical significance a technique that dominates many sciences has been a huge mistake The authors find that researchers in a broad spectrum of fields from agronomy to zoology employ testing that doesn't test and estimating that doesn't estimate The facts will startle the outside reader how could a group of brilliant scientists wander so far from scientific magnitudes This study will encourage scientists who want to know how to get the statistical sciences back on track and fulfill their quantitative promise The book shows for the first time how wide the disaster is and how bad for science and it traces the problem to its historical sociological and philosophical roots Stephen T Ziliak is the author or editor of many articles and two books He currently lives in Chicago where he is Professor of Economics at Roosevelt University Deirdre N McCloskey Distinguished Professor of Economics History English and Communication at the University of Illinois at Chicago is the author of twenty books and three hundred scholarly articles She has held Guggenheim and National Humanities Fellowships She is best known for *How to Be Human Though an Economist* University of Michigan Press 2000 and her most recent book *The Bourgeois Virtues Ethics for an Age of Commerce* 2006
