Busquets, 2019-11-19 This book explores secession from three normative disciplines political philosophy international law and constitutional law The author first develops a moral theory of secession based on a hypothetical multinational contract Under this contract theory injustices do not determine the existence of a right to secede but the requirements to exercise it The book's second part then argues that international law is more inclined to accept and advance a remedial right approach to secession Therefore justice as multinational fairness is to be fully institutionalized under the constitutional law of liberal democracies The final part proposes constitutionalizing a qualified right to secede with the aim of fostering recognition and accommodation of national pluralism as well as cooperation and compromise between majority and minority nations
