chapters that explore the design strategies of lightness quickness exactitude visibility multiplicity and consistency These factors allow designers to develop contextual solutions that marry technical know how with social and cultural understanding ranging in scale from buildings to furniture and urban master plans 120 case studies from roughly 30 countries including some highly prestigious buildings provide a comprehensive overview of the different design strategies *Digital Wood Design* Fabio Bianconi,Marco Filippucci,2019-02-24 This book explores various digital representation strategies that could change the future of wooden architectures by blending tradition and innovation Composed of 61 chapters written by 153 authors hailing from 5 continents 24 countries and 69 research centers it addresses advanced digital modeling with a particular focus on solutions involving generative models and dynamic value inherent to the relation between knowing how to draw and how to build Thanks to the potential of computing areas like parametric design and digital manufacturing are opening exciting new avenues for the future of construction The book s chapters are divided into five sections that connect digital wood design to integrated approaches and generative design to model synthesis and morphological comprehension to lessons learned from nature and material explorations to constructive wisdom and implementation related challenges and to parametric transfigurations and morphological optimizations Understanding Organisational Culture in the Construction Industry Vaughan Coffey,2010-01-28 Using the construction industry as the subject of his research Vaughan Coffey investigates the culture performance link using a new measure of company performance and an evaluation of organizational culture which is largely behaviourally based *Relational Contracting for Construction Excellence* Albert P Chan,Daniel W Chan,John F Yeung,2009-09-23 Improved efficiency and effectiveness in the construction industry provide huge potential savings Various forms of relational contracting such as partnering alliancing public private partnership PPP and joint venture are good examples of this Relational Contracting for Construction Excellence presents the principles of relational contracting practicalities and a series of short case studies Principles begins with the fundamentals then covers development in major countries definitions of relational contracting their benefits difficulties critical success factors and key performance indicators Practice includes the relational contracting approach and process in general and significant factors which make workshops successful at whatever stage of the process A number of real life case studies from the UK USA Australia and Hong Kong are provided Since the book draws on a combination of practical consultancy works and university research a wide range of readers will find it useful i e from industrial practitioners to undergraduate students New Forms of Procurement Marcus C. Jefferies,Steve Rowlinson,2016-04-14 The last three decades have seen the evolution of Public Private Partnerships PPPs and Relationship Contracting RC as alternative procurement approaches to traditional methods of delivering public infrastructure The potential for growth in these new forms of procurement has led to an on going debate on the nature of requirements particularly in terms of policy development encouraging private investment and value for money A key argument for Governments to procure projects using PPPs and RC is that the process delivers better value for all the

stakeholders including the community and asset end users This wide ranging study of such crucial procurement issues includes international historical context collaboration and risk management with a focus on sustainable procurement approaches The international significance of PPPs and RC procurement is reinforced with case study examples from the UK Europe North America South Africa and the Asia Pacific It features cutting edge research from around the world on subjects such as Reviews and reflection of the PPP approach Project Alliancing Implementation of RC in developing countries Changes in procurement policy Value for money collaboration and stakeholder involvement Growth and emergence of PPPs in Asia Risk management Including contributions from some of the world s most prominent academics and practitioners in this field it is a crucial guide to the strategic choices governments now face for the provision of infrastructure between using public or private mechanisms or a combination of the two

*Collaborative Construction Information Management* Geoffrey Shen, Peter Brandon, Andrew Baldwin, 2009-06-02 Most construction projects are large and costly Collaborative working involves two or more stakeholders sharing their efforts and resources to complete the project more effectively and efficiently Collaborative integrative and multi disciplinary teams can tackle the complex issues involved in creating a viable built environment This tends to be looked at from three interrelated perspectives the technological organizational and social and of these the key issue is to improve productivity and enable innovation through the empowerment and motivation of people This book provides insights for researchers and practitioners in the building and construction industry as well as graduate students written by an international group of leading scholars and professionals into the potential use development and limitations of current collaborative technologies and practices Material is grouped into the themes of advanced technologies for collaborative working virtual prototyping in design and construction building information modelling managing the collaborative processes and human issues in collaborative working

*The Soft Power of Construction Contracting Organisations* Sai On Cheung, Peter Shek Pui Wong, Tak Wing Yiu, 2015-01-09 Across the AEC industry the non technical skills possessed by organisations are key to their overall performance In this study the particular importance of optimising the so called soft power of organisations is addressed Things like organisational culture responsible corporate behaviour and building trust based relationships with other stake holders are seen as facets of a broader organisational capability and the advantages of this strength are also explored The internationally conducted research behind this book will provide readers with new insights into effective management from both inter and intra organisational perspectives This unique and important book is essential reading for researchers and advanced students of construction management

*OHS Electronic Management Systems for Construction* Imriyas Kamardeen, 2013 Occupational accidents have a massive personal and social cost as well as a major financial cost The construction industry is one of the most dangerous industries accounting for around 20 30% of all occupational deaths worldwide The accompanying financial cost is either absorbed directly or passed on in the form of higher insurance costs In addition regulatory bodies have started to impose legal accountability on all the parties

along the construction supply chain OHS is hard to implement Construction projects are complex with a fluid workforce and the regulatory framework is highly elaborate OHS Electronic Management Systems for Construction presents a theoretical framework which is designed to overcome these difficulties integrating OHS management in construction using knowledge management and web technologies This framework is explained in a clear step by step way as are features such as a systematically developed corporate safety memory and a virtual learning portal to facilitate on demand safety training The ultimate aim of this book is to aid the development of an established safety culture at the organisational level and the formation of an industry wide community of safety practice This is essential reading for OHS professionals and construction managers attempting to change their industry for the better as well as advanced students and researchers **Technology, Design and Process Innovation in the Built Environment** Peter Newton, Keith Hampson, Robin Drogemuller, 2009-02-09

Making buildings and infrastructure more sustainable represents a key and global challenge This presents the results of research from the Australia Co operative Research Centre for Construction Innovation covering four themes applied to regeneration as well as to new build Sustainable Materials and Manufactures Virtual Design Construction and Management Integrating Design Construction and Facility Management over the Project Life Cycle and Integration across spatial scales

**Employee Resourcing in the Construction Industry** Ani Raiden, Andrew Dainty, Richard Neale, 2009-03-04 This new book looks at employee resourcing in depth both analytically and in order to provide a practical insight into the strategic considerations and operational approaches which modern large contractors take in deploying their human resources It is a valuable resource for both students and managers **Fall Prevention Through Design in Construction** Imriyas

Kamardeen, 2015-06-05 The role of designers has traditionally been to design a building so that it conforms to accepted local building codes The safety of workers is left up to the contractor building the designs Research shows however that designers can have an especially strong influence on construction safety during the concept preliminary and detailed design phases This book establishes the new knowledge and conceptual frameworks necessary to develop a mobile computing enabled knowledge management system that can help reduce the high rate of construction falls There are three main objectives of this book 1 To create a new Prevention through Design PtD knowledge base to model the relationships between fall risks and design decisions 2 To develop a PtD mobile App to assist building designers in fall prevention through design 3 To evaluate the practical implications of the PtD mobile App for the construction industry especially for building designers and workers The cutting edge technologies explored in this book have the potential to significantly reduce the rate of serious injuries that occur in the global construction industry This is essential reading for researchers and advanced students of construction management with an interest in safety or mobile technologies *Performance Improvement in Construction Management* Brian Atkin, Jan Borgbrant, 2009-09-25 This collection of reviews bridges the gap between construction research and practice under three major themes innovation organisation and human behaviour and methods and tools Many of the authors have

worked in technology transfer as change agents resolving industrially relevant problems by using scientifically based research The book reveals the source of ideas data and results to provide a useful resource for researchers academics and graduate students and a challenging guide for senior industry managers      **Leadership and Sustainability in the Built Environment** Alex Opoku,Vian Ahmed,2015-02-11 Features research carried out in 5 different continents The book s topic is crucial to the sustainability agenda This is an interdisciplinary book featuring contributions from the fields of construction sustainability and management
