Concurrent Object-Oriented Programming and Petri Nets Gul A. Agha, Fiorella De Cindio, Grzegorz Rozenberg, 2003-06-29
Concurrency and distribution have become the dominant paradigm and concern in computer science. Despite the fact that much of the early research in object oriented programming focused on sequential systems, objects are a natural unit of distribution and concurrency as elucidated early on by research on the Actor model. Thus models and theories of concurrency, the oldest one being Petri nets and their relation to objects, are an attractive topic of study. This book presents state of the art results on Petri nets and concurrent object oriented programming in a coherent and competent way. The 24 thoroughly reviewed and revised papers are organized in three sections. The first consists of long papers, each presenting a detailed approach to integrating Petri nets and object orientation. Section II includes shorter papers with emphasis on concrete examples to demonstrate the approach. Finally, section III is devoted to papers which significantly build on the Actor model of computation.

Clown Training Jon Davison, 2015-08-28 This comprehensive guide to clown training invites you into the clown workshop and leads you through a complete clown syllabus from the first steps in playfulness to the work of devising and creating performable numbers and shows. Exploring key clown training methods and drawing on Jon Davison's experience as a leading international clown teacher, Clown Training offers detailed descriptions and analyses of a wide range of techniques, games, and exercises. Solar Cells and Modules Arvind Shah, 2020-07-16 This book gives a comprehensive introduction to the field of photovoltaic PV solar cells and modules. In thirteen chapters, it addresses a wide range of topics including the spectrum of light received by PV devices, the basic functioning of a solar cell, and the physical factors limiting the efficiency of solar cells. It places particular emphasis on crystalline silicon solar cells and modules, which constitute today more than 90 % of all modules sold worldwide. Describing in great detail both the manufacturing process and resulting module performance, the book also touches on the newest developments in this sector, such as Tunnel Oxide Passivated Contact (TOPCON) and heterojunction modules, while dedicating a major chapter to general questions of module design and fabrication. Overall, it presents the essential theoretical and practical concepts of PV solar cells and modules in an easy-to-understand manner and discusses current challenges facing the global research and development community.
