Continuum Encyclopedia of Popular Music of the World Volume 8 John Shepherd, David Horn, 2012-03-08 See [Experimentation in Improvised Jazz](#) Andrys Onsman, Robert Burke, 2018-10-01 Experimentation in Improvised Jazz Chasing Ideas challenges the notion that in the twenty first century jazz can be restrained by a singular static definition The worldwide trend for jazz to be marginalized by the mainstream music industry as well as conservatoriums and schools of music runs the risk of stifling the innovative and challenging aspects of its creativity The authors argue that to remain relevant jazz needs to be dynamic proactively experimental and consciously facilitate new ideas to be made accessible to an audience broader than the innovators themselves Experimentation in Improvised Jazz explores key elements of experimental jazz music in order to discern ways in which the genre is developing The book begins with an overview of where when and how new ideas in free and improvised jazz have been created and added to the canon developing the genre beyond its initial

roots It moves on to consider how and why musicians create free and improvised jazz the decisions they make while playing What are they responding to What are they depending on What are they thinking The authors analyse and synthesise the creation of free jazz by correlating the latest research to the reflections provided by some of the world s greatest jazz innovators for this project Finally the book examines how we respond to free and improvised jazz artistically critically and personally Free jazz is the book argues an environment that develops through experimentation with new ideas

Sounds of the Underground Stephen Graham, 2020-03-06 In basements dingy backrooms warehouses and other neglected places around the world music is being made that doesn't fit neatly into popular or classical categories and genres whose often extreme sounds and tiny concerts hover on the fringes of these commercial and cultural mainstreams The term underground music as it's being used here connects various forms of music making that exist outside or on the fringes of mainstream institutions and culture such as noise free improvisation and extreme metal This is music that makes little money that's noisy and exploratory in sound and that's largely independent from both the market and from traditional high art institutions It sometimes exists at the fringes of these commercial and cultural institutions as for example with experimental metal or improv but for the most part it's removed from the mainstream underground as we see with noise artists such as Werewolf Jerusalem or Ramleh obscure black metal artists such as Lord Foul and improvisers such as Maggie Nicols In response to a lack of previous scholarly discussion Graham provides a cultural political and aesthetic mapping of this broad territory By outlining the historical background but focusing on the digital age the underground and its fringes can be seen as based in radical anti capitalist politics or radical aesthetics while also being tied to the political contexts and structures of late capitalism The book explores these various ideas of separation and captures through interviews and analysis a critical account of both the music and the political and cultural economy of the scene
