Schelling's Philosophy G. Anthony Bruno, 2020-03-26 The current wave of critical and historical engagement with idealist texts affords an unprecedented opportunity to discover the richness and value of the thought of F W J Schelling In this volume leading scholars offer compelling reasons to regard Schelling as one of Kant's most incisive interpreters a pioneering philosopher of nature a resolute philosopher of human finitude and freedom a nuanced thinker of the bounds of logic and self-consciousness and perhaps Hegel's most effective critic The volume provides a wide ranging presentation of Schelling's original contribution to and internal critique of the basic insights of German idealism his role in shaping the course of post-Kantian thought and his sensitivity and innovative responses to questions of lasting metaphysical epistemological ethical aesthetic and theological importance

Simone Weil and Continental Philosophy A. Rebecca Rozelle-Stone, 2017-11-08 Simone Weil is an often overlooked thinker whose insights could radically reshape contemporary discourses on religion nature art ethics work politics and education This collection of essays situates Simone Weil's thought alongside prominent Continental thinkers and their philosophical concerns to show the ways in which she belongs to but also stands outside some of the major streams of Continental discourse including phenomenology ethics of embodied disposition and difference and post-Marxian political thought For the first time in a major work intersections between the ideas of Weil and figures such as Nietzsche Berdyaev Foucault Blanchot Merleau-Ponty Levinas Chrtien Agamben Fanon and Ranciere are closely examined The volume is authored by an international team of leading scholars in Weil studies and in contemporary Continental philosophy of religion more broadly Simone Weil and Continental Philosophy is not only an unprecedented resource for Weil scholars who seek to read her in broader and more current philosophical terms but also an important addition to the libraries of scholars and students of Continental philosophy and theology engaged in thinking about some of the most pressing questions of our time

"Life, the Universe, and Everything" Ric

Machuga,2012-03-29 No philosophical idea no matter how small can live alone Ideas always gain their force power and life from their surroundings their ecosystem The ecosystem of ideas defended in this book comes from the ancient Greek philosopher Aristotle and his medieval interpreter Thomas Aquinas The ongoing relevance of their philosophical thought to twenty first century issues is opened up in fascinating ways in this book Life the Universe and Everything is the product of thirty years of teaching introductory courses in philosophy Assuming no prior background it only requires of readers an enquiring mind and a willingness to think carefully An ideal guide to the big questions we face **'Being Towards Death'**

Sylvie Avakian,2021-04-19 This book draws the philosophical contribution of Martin Heidegger together with theological spiritual insights from the East especially that of Nikolai Berdyaev Thus it brings into dialogue the West with the East and philosophy with theology By doing so it offers Christian theology an existential spiritual language that is relevant and meaningful for the contemporary reader In particular the work explores Heidegger s being towards death Sein zum Tode as the basis for theological philosophical thinking Only the one who embraces being towards death has the courage to think and poetize This thinking in turn makes being towards death possible and in this circular movement of thinking and being the mystery of being reveals itself and yet remains hidden Since the work aims at demonstrating being towards death through language it transitions away from the common formulations and traditionally accepted ways of writing dogmatic theology towards an original philosophical reflection on faith and spirituality At different points however the work also retrieves the profound thoughts and theologies of the past the insightful creativity of which cannot be denied Faithfully Seeking

Understanding Johannes Kuhn,2009 The selections are taken from chapters of Kuhn s books including his Catholic Dogmatics and from various articles that appeared in the T bingen quarterly Die theologische Quartalschrift They are arranged according to the following topics faith and reason revelation and the personhood of God responses to Protestant liberalism theological topics including grace and freedom theology and the university and Catholic fundamental theology Though diverse in subject when read together the essays yield a complete theological vision that derives from a carefully constructed theological foundation **The Perfection of Freedom** D. C. Schindler,2012-11-08 The Perfection of Freedom seeks to

respond to the impoverished conventional notion of freedom through a recovery of an understanding rich with possibilities yet all but forgotten in contemporary thought This understanding developed in different but complementary ways in the German thinkers Schiller Schelling and Hegel connects freedom not exclusively with power and possibility but rather most fundamentally with completion wholeness and actuality What is unique here is specifically the interpretation of freedom in terms of form whether it be aesthetic form Schiller organic form Schelling or social form Hegel Although this book presents serious criticisms of the three philosophers it shows that they open up new avenues for reflection on the notion of freedom avenues that promise to overcome many of the dichotomies that continue to haunt contemporary thought for example between freedom and order freedom and nature and self and other The Perfection of Freedom offers not only a significantly

new interpretation of Schiller Schelling and Hegel it also proposes a modernity more organically rooted in the ancient and classical Christian worlds

Hegel's Interpretation of the Religions of the World Jon Stewart, 2018-09-05 In his Lectures on the Philosophy of Religion Hegel treats the religions of the world under the rubric the determinate religion This is a part of his corpus that has traditionally been neglected since scholars have struggled to understand what philosophical work it is supposed to do In Hegel's Interpretation of the Religions of the World Jon Stewart argues that Hegel's rich analyses of Buddhism Hinduism Zoroastrianism Judaism Egyptian and Greek polytheism and the Roman religion are not simply irrelevant historical material as is often thought Instead they play a central role in Hegel's argument for what he regards as the truth of Christianity Hegel believes that the different conceptions of the gods in the world religions are reflections of individual peoples at specific periods in history These conceptions might at first glance appear random and chaotic but there is Hegel claims a discernible logic in them Simultaneously a theory of mythology history and philosophical anthropology Hegel's account of the world religions goes far beyond the field of philosophy of religion The controversial issues surrounding his treatment of the non European religions are still very much with us today and make his account of religion an issue of continued topicality in the academic landscape of the twenty first century

German Political Philosophy Chris Thornhill, 2007-01-24 This book combines philosophical intellectual historical and political theoretical methodologies to provide a new synoptic reading of the history of German political philosophy Incorporating chapters on the political ideas of Luther and Zwingli on the politics of the early Enlightenment on Idealism on Historicism and Lukacs on early Twentieth Century political theology on the Frankfurt School and on Habermas and Luhmann the book sets out both a broad and a detailed discussion of German political reflection from the Reformation to the present In doing so it explains how the development of German political philosophy is marked by a continual concern with certain unresolved and recurrent problems It claims that all the major positions address questions relating to the origin of law that all seek to account for the relation between legal validity and metaphysical and theological superstructures and that all are centred on the attempt to conceptualise and reconstruct the character of the legal subject
