Pohland, American Chemical Society. Division of Industrial and Engineering Chemistry, American Chemical Society. Division of Industrial and Engineering Chemistry. Winter Symposium, 1990 This new volume describes developing technologies for treating and managing

wastewaters and solid residues such as soils and incinerator ashes that are contaminated It includes chapters on such diverse topics as municipal solid wastes water purification by radiation the isolation of organic species and inorganic radionuclides and solvent recycling Several chapters cover radiolysis chemistry in dilute aqueous media solar treatment chemical separations the biological and chemical treatment of soils and sludges and solids immobilization This volume is a useful introduction to hazardous waste treatment for the novice as well as a valuable reference for the technical expert

Emerging Technologies in Hazardous Waste Management IV Daniel William Tedder, American Chemical Society. Division of Industrial and Engineering Chemistry, 1994 The 18 papers were selected from over 200 presented at the symposium Atlanta Georgia September 1992 to reflect the most important or promising directions in hazardous waste management and to avoid duplicating information in earlier volumes of the series Among the remedial technologies described for soils and sediments are electrokinetic and the mobilization of specific ions Other methods include the crystallization of mechanical pulp mill effluents and the removal of gasoline vapors from air streams by biofiltration Radioactive and mixed waste are considered in studies of the Hanford waste site in Washington and reports of laboratory scale studies Annotation copyright by Book News Inc Portland OR *Emerging Technologies in Hazardous Waste*

Management V, 1995 **International Trade in Hazardous Wastes** D.K. Asante-Duah, I.V. Nagy, 1998-03-12 This book discusses the need for a regulated and informed forum for international trade in hazardous waste The authors argue that with careful planning health and ecological risks can be minimized and net economic benefits realized fairly

Environmental Technology Handbook James G. Speight, James G Speight, 2020-02-06 Historically the development of civilization has upset much of the earth's ecosystem leading to air land and water pollution The author defines pollution as the introduction of a foreign substance into an ecosystem via air land or water This book delves into issues that effect the everyday lives of people who come in contact with these hazards By examining these issues this body of work aims to stimulate debate and offer solutions to the ever growing threat to the environment and humanity Includes problems with each chapter Explores issues such as control of gaseous emissions waste recycling and waste disposal Explains physical and thermal methods of waste management Provides definitions and resources for future reference Discusses the history of environmental technology *Hazardous and Toxic Waste Management, January 1989 - May 1993* Louise Reynnells, 1993

Emerging Technologies in Hazardous Waste Management III Daniel William Tedder, 1993 Based on a symposium held in Atlanta Georgia in October 1991 this volume is both an introduction to hazardous waste treatment for the novice and a reference for the technical expert Specialists in emerging technologies for treating and managing gaseous liquid and solid wastes contribute 22 chapters arranged within five sections physical and chemical wastewater treatment biological treatment soil remediation and treatment treatment of volatile compounds and selected mixed waste treatment applications Annotation copyright by Book News Inc Portland OR *Emerging Technologies in Hazardous Waste Management V* Daniel

William Tedder, American Chemical Society. Division of Industrial and Engineering Chemistry, 1993 *Environmental Technologies and Trends* Ravinder Kumar Jain, Ravi Jain, 1997 The book covers contemporary environmental issues related to such subjects such as drinking water air pollution waste water hazardous waste and groundwater and it focusses on current research activities emerging technologies and future trends For each major topic area an overview paper covers the current state of the technology The individual papers were independently reviewed by scientists and engineers knowledgeable in the field and complemented by summaries that include references to other related work and additional technical discussion or comments about the subject matter An introductory chapter in English and French provides an overview of all the papers and summarizes crucial issues presented in the papers and their interrelationship Selected Water Resources Abstracts, 1991
