## **Emerging Japanese Architects Of The 1990s:**

Emerging Japanese Architects of the 1990s Jackie Kestenbaum, 1991 *Emerging Japanese Architects of the 1990s* introduces a new generation of architects to the west Six of the most exciting members of the fourth generation of architects to emerge in Japan after World War II Atsushi Kitagawara Kiyoshi Say Takeyama AMORPHE Norihiko Dan Hiroyuki Wakabayashi WORKSHOP and Hisashi Hara are profiled in this book amidst stunning photographs of their work these architects have been building and publishing extensively in Japan blessed by Japan's new wealth and love of new fashions and designs The six differ greatly in style and in education from Norihiko Dan who studied at Yale to Hiroyuki Wakabayashi who is self trained They express a variety of styles and many of their works are commercial projects They build restaurants hotels theaters and office buildings structures as practical and architecturally interesting as the buildings of their aesthetic precursors The book contains an introductory essay by Kestenbaum which places this generation in social and historical context and analyzes each of the architects works The six architects profiled here are some of the best known in Japan today the ones to watch in the international architecture scene

*Emerging Japanese Architects of the 1990s* Jackie Kestenbaum, 1991      **Emerging Japanese architects of the 1990s** J. Kestenbaum,      **Contemporary Japanese Architecture** James Steele, 2017-03-16 *Contemporary Japanese Architecture* presents a clear and comprehensive overview of the historical and cultural framework that informs the work of all Japanese architects as an introduction to an in depth investigation of the challenges now occupying the contemporary designers who will be the leaders of the next generation It separates out the young generation of Japanese architects from the crowded distinguished multi generational field they seek to join and investigates the topics that absorb them and the critical issues they face within the new economic reality of Japan and a shifting global order Salient points in the text are illustrated by beautiful descriptive images provided by the architects and from the extensive collection of the author By combining illustrations with timelines and graphics to explain complex ideas the book is accessible to any student seeking to understand contemporary Japanese architecture      *Area Bibliography of Japan* Ria Koopmans-de Bruijn, 1998 Provides a general overview of literature relating to Japan and covers a broad range of subject matter from art feminism and linguistics to corporate culture history and medicine Includes books published since 1980 that are related to the geographical area of Japan and to Japanese culture within that area      *The Constructed Other: Japanese Architecture in the Western Mind* Kevin Nute, 2021-09-30 *The Constructed Other* argues that the assumed otherness of Japanese architecture has made it both a testbed for Western architectural theories and a source of inspiration for Western designers The book traces three recurring themes in Western accounts of Japanese architecture from the reopening of Japan in the mid nineteenth century to the present day a wish to see Western architectural theories reflected in Japanese buildings efforts to integrate elements of Japanese architecture into Western buildings and a desire to connect contemporary Japanese architecture with Japanese tradition It is suggested that together these narratives have had the effect

of creating what amounts to a mythical version of Japanese architecture often at odds with historical fact but which has exercised a powerful influence on the development of building design internationally
