Harel,2022-10-25 Biophilia the love of life encompasses the drive to survive a sense of kinship with all life forms and an instinct for beauty In this unconventional book Kay Harel uses biophilia as a lens to explore Charles Darwin s life and thought in deeply original ways

In a set of interrelated essays she considers how the love of life enabled him to see otherwise unseen evolutionary truths Harel traces the influence of biophilia on Darwin s views of dogs facts thought emotion and beauty informed by little known material from his private notebooks She argues that much of what Darwin described envisioned and felt was biophilia in action Closing the book is a profile of Darwin s marriage to Emma Wedgwood his first cousin a woman gifted in music and medicine who shared her husband s love of life Harel s meditative playful and lyrical musings draw on the tools of varied disciplines aesthetics astronomy biology evolutionary theory history of science philosophy psychiatry and more while remaining unbounded by any particular one Taking unexpected paths to recast a figure we thought we knew this book offers readers a different Darwin a man full of love joy awe humility curiosity and a zest for living Magisteria Nicholas Spencer,2023-03-02 Most things you know about science and religion are myths or half truths that grew up in the last years of the nineteenth century and remain widespread today A deeply researched history of the interplay between the two ways of understanding the world ECONOMIST BEST BOOKS OF 2023 The true history of science and religion is a human one It s about the role of religion in inspiring and strangling science before the scientific revolution It s about the sincere but eccentric faith and the quiet creeping doubts of the most brilliant scientists in history Galileo Newton Faraday Darwin Maxwell Einstein Above all it s about the question of what it means to be human and who gets to say a question that is more urgent in the twenty first century than ever before From eighth century Baghdad to the frontiers of AI today via medieval Europe nineteenth century India and Soviet Russia Magisteria sheds new light on this complex historical landscape Rejecting the thesis that science and religion are inevitably at war Nicholas Spencer illuminates a compelling and troubled relationship that has definitively shaped human history
