Emotion Evolution And Rationality:

Emotion, Evolution, and Rationality Dylan Evans, Pierre Cruse, 2004 For thousands of years emotions have been thought of as obstacles to intelligent thought. This view has been challenged in recent years by both philosophers and scientists. In this groundbreaking book the first of its kind leading thinkers from philosophy, psychology and neuroscience challenge this commonly held view of emotion in a series of fascinating and challenging essays.

Epistemology and Emotions Georg Brun, Ulvi Doguoglu, 2016-04-29 Undoubtedly emotions sometimes thwart our epistemic endeavours. But do they also contribute to epistemic success? The thesis that emotions skew the epistemic landscape as Peter Goldie puts it in this volume has long been discussed in epistemology. Recently however philosophers have called for a systematic reassessment of the epistemic relevance of emotions. The resulting debate at the interface between epistemology, theory of emotions and cognitive science examines emotions in a wide range of functions. These include motivating inquiry, establishing relevance as well as providing access to facts, beliefs and non propositional aspects of knowledge. This volume is the first collection focusing on the claim that we cannot but account for emotions if we are to understand the processes and evaluations related to empirical knowledge. All essays are specifically written for this collection by leading researchers in this relatively new and developing field bringing together work from backgrounds such as pragmatism and scepticism, cognitive theories of emotions and cognitive science, Cartesian epistemology and virtue epistemology.

The Rationality of Emotion Ronald De Sousa, 1990-03-14 In this urbane and witty book Ronald de Sousa disputes the widespread notion that reason and emotion are natural antagonists. He argues that emotions are a kind of perception that their roots in the paradigm scenarios in which they are learned give them an essentially dramatic structure and that they have a crucial role to play in rational beliefs, desires and decisions by breaking the deadlocks of pure reason. The book's twelve chapters take up the following topics: alternative models of mind and emotion; the relation between evolutionary, physiological and social factors in emotions; a taxonomy of objects of emotions; assessments of emotions for correctness and rationality; the regulation by emotions of logical and practical reasoning; emotion and time; the mechanism of emotional self-deception; the ethics of laughter and the roles of emotions in the conduct of life. There is also an illustrative interlude in the form of a lively dialogue about the ideology of love, jealousy and sexual exclusiveness. A Bradford Book.

Programming Machine Ethics Luís Moniz Pereira, Ari Saptawijaya, 2016-02-10 This book addresses the fundamentals of machine ethics. It discusses abilities required for ethical machine reasoning and the programming features that enable them. It connects ethics, psychological, ethical processes and machine implemented procedures. From a technical point of view the book uses logic programming and evolutionary game theory to model and link the individual and collective moral realms. It also reports on the results of experiments performed using several model implementations. Opening specific and promising inroads into the terra incognita of machine ethics the authors define here new tools and describe a variety of programs tested.

moral applications and implemented systems In addition they provide alternative readings paths allowing readers to best focus on their specific interests and to explore the concepts at different levels of detail Mainly written for researchers in cognitive science artificial intelligence robotics philosophy of technology and engineering of ethics the book will also be of general interest to other academics undergraduates in search of research topics science journalists as well as science and society forums legislators and military organizations concerned with machine ethics

Emotional Choices Robin Markwica,2018-03-09 Why do states often refuse to yield to military threats from a more powerful actor such as the United States Why do they frequently prefer war to compliance International Relations scholars generally employ the rational choice logic of consequences or the constructivist logic of appropriateness to explain this puzzling behavior Max Weber however suggested a third logic of choice in his magnum opus *Economy and Society* human decision making can also be motivated by emotions Drawing on Weber and more recent scholarship in sociology and psychology Robin Markwica introduces the logic of affect or emotional choice theory into the field of International Relations The logic of affect posits that actors behavior is shaped by the dynamic interplay among their norms identities and five key emotions fear anger hope pride and humiliation Markwica puts forward a series of propositions that specify the affective conditions under which leaders are likely to accept or reject a coercer s demands To infer emotions and to examine their influence on decision making he develops a methodological strategy combining sentiment analysis and an interpretive form of process tracing He then applies the logic of affect to Nikita Khrushchev s behavior during the Cuban missile crisis in 1962 and Saddam Hussein s decision making in the Gulf conflict in 1990 1 offering a novel explanation for why U S coercive diplomacy succeeded in one case but not in the other
