Emotional Expression In Infancy A Biobehavioral Study:

Emotional Expression in Infancy Robert N. Emde, Robert John Harmon, Theodore J. Gaensbauer, 1976 On infant development **Emotional Expression in Infancy** David Shakow, Joseph De Rivera, Paul E. Stepansky, Robert N. Emde, Robert John Harmon, Theodore J. Gaensbauer, 1976 **The Psychobiology of Affective Development (PLE: Emotion)** Nathan A. Fox, Richard Davidson, 2014-11-20 Originally published in 1984 this was the first volume on this topic to appear in an emerging area of study at the time The editors were selective in choosing their contributions to the volume to ensure that both the developmental and neuropsychological domains were well represented One of the major goals was to foster greater contact and cross fertilization between subdisciplines that they firmly believed should be more intimately connected The result is this title which can now be enjoyed in its historical context **Measuring Emotions in Infants and Children** Carroll Ellis Izard, Peter B. Read, 1982 Volume 1 brings together a strong group of researchers who have pioneered a wide variety of empirical approaches to the difficult problems of conceptualising and assessing emotion in infants and children The volume will be an invaluable resource for all those who study infants and children Volume 2 complements the first volume which gave new impetus to research on social and affective development adapted from vendor website The Course of Life: Infancy and early childhood , 1980 Measuring Emotions in Infants and Children: Volume 2 Carroll Ellis Izard, Peter B. Read, 1982 This complements the first volume which gave new impetus to research on social and affective development Evolutionary Perspectives on Human Development Robert G. Burgess, Kevin MacDonald, 2005 This new edition of Evolutionary Perspectives on Human Development is obligatory reading for anyone interested in the integration of evolutionary theory into developmental psychology It provides a valuable corrective to recent narrow approaches which argue that the human mind is constructed exclusively of domain specific mechanisms and which deemphasize the importance of human psychological and behavioral plasticity Anyone who reads this book will come away with a richer understanding of our shared human nature Bill Irons Northwestern University In this volume Burgess and MacDonald have brought together a distinguished group of psychologists and anthropologists to investigate how given our evolutionary heritage genetic make up and salient environment behavior cognition and emotion unfold from the human organism They make clear that both evolutionary functional and proximate behavioral perspectives are essential to understanding the human mind and its products Many of these essays should be required reading for sociobiologists evolutionary psychologists and evolutionary anthropologists and their ilk Jeffrey Kurland Penn State It s clear that evolutionary biology has a tremendous amount to offer when it comes to our understanding of human development and yet many experts in developmental psychology have remained impervious to these insights At last this may change Burgess and MacDonald have compiled a rich array of theory and data much of it contributed by the leading lights of evolutionary psychology or if you prefer sociobiology A very valuable collection and one that might help define a new and important field

David P Barash University of Washington Evolutionary Perspectives on Human Development Second Edition considers the role of evolutionary theory in the field of developmental psychology to examine key topics of individual human development This unique book fills an important gap in the literature applying evolutionary models to human development by focusing on central development issues The book emphasizes both domain general evolved psychological mechanisms and domain specific processes The text also integrates behavior genetic research with evolutionary and developmental principles In this contributed volume editors Robert L Burgess and Kevin MacDonald have brought together a distinguished group of social and behavioral scientists employing multiple levels of analysis drawn from a variety of academic disciplines This diverse group of contributors illustrates the enormous power of evolutionary theory by elucidating human behavior and its development and the various ways it is manifested in different environments Evolutionary Perspectives on Human Development applies evolutionary theory to such topics as parent child relationships the maltreatment of children psychopathology cooperation and competition among siblings and the acquisition of vital resources in different cultural settings from an evolutionary point of view Key Features Comprehensive coverage of the impact of evolutionary theory on human development provides students with the most thorough foundation available in this area Contributions by leading scholars and researchers expose readers to the exciting research and developments that have been occurring in the field An introductory chapter written by the volume editors provides an accessible overview of the book Evolutionary Perspectives on Human Development provides state of the art groundwork in evolutionary theory as viewed by leading thinkers in the field It is an excellent supplementary textbook for advanced undergraduate and graduate courses in evolutionary and developmental psychology

Rage, Power, and Aggression Robert A. Glick, Steven P. Roose, Steven T. Roose, 1993-01-01 Rage aggression and the will to power are significant human characteristics that have been relatively neglected in psychoanalytic literature In the past rage has been viewed as a response to threat or frustration aggression as an instinctual drive and the will to power as causing destructive and maladaptive behavior In this volume the authors probe these dimensions of human experience to show how they serve adaptive needs assuage anxiety protect against threat and foster maturation

Crying as a Sign, a Symptom, and a Signal Ronald G. Barr, Brian Hopkins, James A. Green, 2000-01-10 Originally viewed as a sign of disease crying is now understood as a symptom of problematic functioning in early development We now know a great deal about normative developmental patterns of infant crying and how they are manifested in various clinical settings emergency room complaint painful procedures colic temper tantrums and nonverbal and mentally challenged infants Crying as a Sign a Symptom and a Signal brings the reader up to date on this new evidence concerning infant crying in the first few months and years of life In this authoritative clinical text an international team of experts explore this new conceptualization of the significance of early infant crying They bring both historical and methodological perspectives to a multidisciplinary synopsis of the new understanding of this important infant behavior

Exploring Affect Silvan S. Tomkins, 1995-01-27 Silvan Tomkins was one of the most influential theorists on emotion and emotional expression Over a period of 40 some years until his death in 1991 he developed a set of original important ideas about the nature of affect and its relationship to cognition and personality Tomkins dealt with fundamental questions in a fresh and provocative way establishing affect as a separate biological system and providing compelling data on discrete affect expressions Several years before his death Professor Tomkins agreed to bring his papers unpublished and published together into *Exploring Affect* for Cambridge Studies in Emotion and Social Interaction He worked with Paul Ekman and Klaus Scherer to develop a structure for the book that would synthesize his theory of emotion Unfortunately he died before he was able to complete the process Virginia Demos who knew Professor Tomkins well took on the enormous task of compiling the papers and writing connective material for the book This volume of Tomkins selected writings on affect brings together his works of four decades and makes them available at a more receptive time in the field It is a treasure trove of provocative insightful and relevant ideas

The Earliest Relationship T. Berry Brazelton, Bertrand G. Cramer, 2018-05-08 Never before has research on newborn behavior and parent infant interaction been fully integrated with psychoanalytic insight into parents emotions and fantasies This book provide a vivid glimpse of the parents daydreams and narcissistic wishes which grow into a desire for a child and they show how these feelings develop into important attachments to the unborn infant during pregnancy The power and competence of the newborn born then challenges parental fantasies desires wishes and expectations creating the beginnings of the bond between parent and child Using the latest research the authors clarify all the ways the infant participates in the dawning relationship and the ingredients of very early communication and interaction They then unveil the imaginary interactions which lend meaning and drama to each gesture and expression We see the baby as Tyrant as Savior or as the reincarnation of lost relationships Everyone who cares for mothers and babies pediatricians developmental and clinical psychologists psychiatrists early childhood specialists nurses and social workers as well as interested parents will find this book of immediate value

Exploring Developmental Theories

Frances Degen Horowitz, 2014-02-25 Through the evaluation and integration of developmental theories this volume proposes a new structural behavioral model of development Dr Horowitz's model helps account for both the behavioral development of children with extensions across the life span and for the universal and non universal characteristics in human behavioral development Exploring Developmental Theories also sheds a new and different light on the nature nurture or heredity environment controversy and on the topic of continuity and discontinuity in development Exploring Developmental Theories examines the concepts of stage structure and systems organismic theory and general system theory analyzes open and closed systems as well as organismic and mechanistic world views integrates the concepts associated with organismic and mechanist world views examines learning mechanisms and processes that foster the acquisition of behavior and discusses the strengths and weaknesses of Gessel Piaget and behaviorism in accounting for behavioral development **Social and**

Emotional Development in Infancy and Early Childhood Janette B. Benson, Marshall M. Haith, 2010-05-21 Research is increasingly showing the effects of family school and culture on the social emotional and personality development of children Much of this research concentrates on grade school and above but the most profound effects may occur much earlier in the 0-3 age range This volume consists of focused articles from the authoritative Encyclopedia of Infant and Early Childhood Development that specifically address this topic and collates research in this area in a way that isn't readily available in the existent literature covering such areas as adoption attachment birth order effects of day care discipline and compliance divorce emotion regulation family influences preschool routines separation anxiety shyness socialization effects of television etc This one volume reference provides an essential affordable reference for researchers graduate students and clinicians interested in social psychology and personality as well as those involved with cultural psychology and developmental psychology Presents literature on influences of families school and culture in one source saving users time searching for relevant related topics in multiple places and literatures in order to fully understand any one area Focused content on age 0-3 save time searching for and wading through lit on full age range for developmentally relevant info Concise understandable and authoritative for immediate applicability in research **Emotion** Robert D. Kavanaugh, Betty Zimmerberg, Steven

Fein, 1996 This volume represents a range of approaches both theoretical and applied to the topic of emotion by neuroscientists developmentalists social and personality psychologists and clinical psychologists Readers should appreciate the diversity of questions and methods presented as well as note the common ground that emerges in these discussions Chapter coverage ranges from the neural bases of emotion to the role of emotion in psychotherapy There are vigorous discussions regarding the concept of emotion its role in development and its application to contemporary problems such as violence and war The papers in this volume begin a dialogue about possible intersections in the study of emotion from scholars who embrace sharply different perspectives on this complex topic a fitting tribute in memory of G Stanley Hall
