Affect and Emotion in Human-Computer Interaction Christian Peter, Russell Beale, 2008-08-25 Affect and emotion play an important role in our everyday lives They are present whatever we do wherever we are and wherever we go without us being aware of them for much of the time When it comes to interaction be it with humans technology or humans via technology we suddenly become more aware of emotion either by seeing the other's emotional expression or by not getting an emotional response while anticipating one Given this it seems only sensible to explore affect and emotion in human computer interaction to investigate the underlying principles to study the role they play to develop methods to quantify them and to finally build applications that make use of them This is the research field for which over ten years ago Rosalind Picard coined the phrase affective computing The present book provides an account of the latest work on a variety of aspects related to affect and emotion in human technology interaction It covers theoretical issues user experience and design aspects as well as sensing issues and reports on a number of affective applications that have been developed in recent years

Emotional Design in Human-Robot Interaction Hande Ayanoğlu, Emília Duarte, 2019-09-09 While social robots participation increases in everyday human life their presence in diverse contexts and situations is expected At the same point users tend to become more demanding regarding their roles abilities behaviour and appearance Thus designers and developers are confronted with the need to design more sophisticated robots that can produce such a positive reaction from users so as to become well accepted in various cases of use Like this Human Robot Interaction has become a developing area Emotions are an important part in human life since they mediate the interaction with other humans entities and or products In recent years there has been an increase in the importance of emotions applied to the design field giving rise to the so called Emotional Design area In the case of Human Robot Interaction the emotional design can help to elicit e.g. pleasurable or prevent e.g. unpleasant emotional affective reactions responses This book gives a practical introduction to emotional design in human

robot interaction and supports designers with knowledge and research tools to help them take design decisions based on a User Centred Design approach. It should also be useful to people interested in design processes even if not directly related to the design of social robots but instead to other technology based artefacts. The text is meant as a reference source with practical guidelines and advice for design issues.

Emotionally Durable Design Jonathan Chapman, 2012-04-27. In today's unsustainable world of goods where products are desired, purchased, briefly used and then promptly landfilled to make way for more consumption and waste are rapidly spiralling out of control with truly devastating ecological consequences. Why do we as a consumer society have such short lived and under stimulating relationships with the objects that we invest such time, thought and money in acquiring but that will soon be thoughtlessly discarded? Emotionally Durable Design is a call to arms for professionals, students and academic creatives proposing the emergence of a new genre of sustainable design that reduces consumption and waste by increasing the durability of relationships established between users and products. In this provocative text, Jonathan Chapman pioneers a radical design about face to reduce the impact of modern consumption without compromising commercial viability or creative edge. The author explores the essential question: why do users discard products that still work? It transports the reader beyond symptom focused approaches to sustainable design such as design for recycling, biodegradability and disassembly to address the actual causes that underpin the environmental crisis we face. The result is a revealing exploration of consumer psychology and the deep motivations that fuel the human condition and a rich resource of creative strategies and practical tools that will enable designers from a range of disciplines to explore new

ways of thinking and of designing objects capable of supporting deeper and more meaningful relationships with their users This is fresh thinking for a brave new world of creative durable and sustainable products buildings spaces and designed experiences
