Organizations as Complex Systems Maurice Yolles, 2006-09-01 Managing the Complex is an ambitious title and it would be an audacious one if we were not to begin with a frank admission to date few to none of us have a skill set which includes managing the complex We try various things we write about others and we wonder about still others When a tool perspective or technique comes along which seems to evoke success we emulate it probe it and recoil at the all too often admission that it was situation and context which afforded success its opportunity and not some quality intrinsic to the tool perspective or technique Indeed if the study of complexity has done anything for managers and for those who espouse managerial theory it is in providing a scientific foundation for the notion that context matters Those who preach abstract ideas have then to reconcile themselves to the notion that situation and embodiment matters Those who believe in strong causality and determinism are left to wrestle with the role of chance uncertainty and chaos Those who prefer to argue that men move history are confronted with the role of environment and affordances while those who argue the reverse are left to contend with charisma irrationality of crowds and the strange qualities we know as emotions A series on complex systems has less ambitious goals to contend with than this Such a series can deal with classifications and categories and speak of noise as if it were not the central focus of the problem Managing the complex is about managing noise or perhaps we should say it is about dealing with accepting making room for and learning from noise The articles in this volume and in volumes to come will each be considered as noise by some and as gems by others but we hope that practicing managers and academics alike will find plenty of fuel to drive their personal explorations into understanding and perhaps even managing the complex

Frey,2018-01-29 This encyclopedia is the first major reference guide for students new to the field covering traditional areas while pointing the way to future developments **Taking Flight** Jennifer Donahue,2020-07-23 Caribbean women have long utilized the medium of fiction to break the pervasive silence surrounding abuse and exploitation Contemporary works by such authors as Tiphonie Yanique and Nicole Dennis Benn illustrate the deep rooted consequences of trauma based on gender sexuality and race and trace the steps that women take to find safer ground from oppression Taking Flight examines the immigrant experience in contemporary Caribbean women s writing and considers the effects of restrictive social mores In the texts examined in Taking Flight culturally sanctioned violence impacts the ability of female characters to be at home in their bodies or in the spaces they inhabit The works draw attention to the historic racialization and sexualization of black women s bodies and continue the legacy of narrating black women s long standing contestation of systems of oppression Arguing that there is a clear link between trauma shame and migration with trauma serving as a precursor to the protagonists emigration Jennifer Donahue focuses on how female bodies are policed how moral racial and sexual codes are linked and how the enforcement of

social norms can function as a form of trauma Donahue considers the relationship between trauma shame and sexual politics and investigates how shame works as a social regulator that frequently leads to withdrawal or avoidant behaviors in those who violate socially sanctioned mores Most importantly Taking Flight positions flight as a powerful counter to disempowerment and considers how flight whether through dissociation or migration functions as a form of resistance

Material Feminisms: New Directions for Education Carol Taylor, Gabrielle Ivinson, 2018-02-02 *Material Feminisms New Directions for Education* provides a range of powerful theoretical and innovative methodological examples to illuminate how new material feminism can be put to work in education to open up new avenues of research design and practice It poses challenging questions about the nature of knowledge production the role of the researcher and the critical endeavour arising from inter and post disciplinarity Working with diffractive methodologies and new materialist ecological epistemologies the book offers resources for hope which widen the scope for how educational problems are interrogated and provides a political counter movement to neo positivist outcomes based approaches within education Inspired by writers such as Barad Bennett and Deleuze and Guattari the book makes a radical break with cognitive dualist and universal conceptions of human subjectivity and intelligence in education By taking its starting point as the co constitutiveness of discourse materiality corporeality and place the book foregrounds educational practices as material enactments of multiple non linear entangled affective and relational forces It offers new insights into how gender class and ethnicity are constituted in and by material assemblages that are often submerged or unseen This book is an essential starting place for those intrigued by what new theoretical accounts of materiality posthumanism and affect can offer educational research Diffractive methodologies challenge readers to take a fuller range of actors into account than in objective humanist methodologies and in so doing to pay closer attention to what data is It invites researchers to engage with long standing feminist concerns about power and knowledge production in research processes This book was originally published as a special issue of *Gender and Education*

Jaswal ,Desiree Forsythe,2024-09-24 Research demonstrates that STEM disciplines perpetuate a history of exclusion particularly for students with marginalized identities This poses problems particularly when science permeates every aspect of contemporary American life Institutions repeated failures to disrupt systemic oppression in STEM has led to a mostly white cisgender and male scientific workforce replete with implicit and or explicit biases Education holds one pathway to disrupt systemic linkages of STEM oppression from society to the classroom Maintaining views on science as inherently objective isolates it from the world in which it is performed STEM education must move beyond the transactional approaches to transformative environments manifesting respect for students social and educational capital We must create a STEM environment in which students with marginalized identities feel respected listened to and valued We must assist students in understanding how their positionality privilege and power both historically and currently impacts their meaning making and understanding of STEM **History of Multicultural Education Volume 2** Carl A.
