As well as evaluating both application level and component level products software engineers need to be concerned with the evaluation of development processes engineering methods and supplier organizations. However both academics and practitioners are concerned about the cost and effectiveness of applying many of the existing assessment methods. One of the aims of the workshop was to address the question of justifying the use of empirical assessment and evaluation in software engineering as well as to hear about practical experiences. Both this theme together with the other issues involved in evaluation were addressed through technical presentations and experience reports. Thus the workshop was a unique forum dedicated to the presentation and discussion of research and practical experiences addressing all aspects of empirical assessment and evaluation in software engineering **Proceedings, 11th ACM/IEEE International Symposium on Empirical Software Engineering and Measurement**, 2017 Empirical methods and studies in software engineering
