Empiricism Explanation And Rationality An Introduction To The Philosophy Of The Social Sciences:

Empiricism, Explanation and Rationality Len & Roger Doyal & Harris, 2013-04-15 Originally published in 1986 All students of social science must confront a number of important philosophical issues This introduction to the philosophy of the social sciences provides coherent answers to questions about empiricism explanation and rationality It evaluates contemporary writings on the subject which can be as difficult as they are important to understand Each chapter has an annotated bibliography to enable students to pursue the issues raised and to assess for themselves the arguments of the authors

Continental Philosophy of Social Science Yvonne Sherratt, 2005-10-17 Continental Philosophy of Social Science demonstrates the unique and autonomous nature of the continental approach to social science and contrasts it with the Anglo American tradition Yvonne Sherratt argues for the importance of an historical understanding of the Continental tradition in order to appreciate its individual humanist character Examining the key traditions of hermeneutic genealogy and critical theory and the texts of major thinkers such as Gadamer Ricoeur Derrida Nietzsche Foucault the Early Frankfurt School and Habermas she also contextualizes contemporary developments within strands of thought stemming back to Ancient Greece and Rome Sherratt shows how these modes of thinking developed through medieval Christian thought into the Enlightenment and Romantic eras before becoming mainstays of twentieth century disciplines Continental Philosophy of Social Science will serve as the essential textbook for courses in philosophy or social sciences

Philosophy of the Social Sciences Patrick Baert, 2005-11-18 In this ground breaking new text Patrick Baert analyses the central perspectives in the philosophy of social science critically investigating the work of Durkheim Weber Popper critical realism critical theory and Rorty's neo pragmatism Places key writers in their social and political contexts helping to make their ideas meaningful to students Shows how these authors views have practical uses in empirical research Lively approach that makes complex ideas understandable to upper level students as well as having scholarly appeal

Laws And Explanation In The Social Sciences Lee C McIntyre, 2018-10-08 The first full length defense of social scientific laws to appear in the last twenty years this book upholds the prospect of the nomological explanation of human behavior against those who maintain that this approach is impossible impractical or irrelevant By pursuing an analogy with the natural sciences McIntyre shows that the barriers to nomological inquiry within the social sciences are not generated by factors unique to social inquiry but arise from a largely common set of problems that face any scientific endeavor All of the most widely supported arguments against social scientific laws have failed largely due to adherence to a highly idealized conception of nomologicality allegedly drawn from the natural sciences themselves and the limited doctrine of descriptivism Basing his arguments upon a more realistic view of scientific theorizing that emphasizes the pivotal role of redescription in aiding the search for scientific laws McIntyre is optimistic about attaining useful law like explanations of human behavior

Realism and Racism Bob Carter, 2002-01-04 There are continuing difficulties within social science surrounding concepts of race This book suggests that these difficulties stem from

the uncertain ontological and epistemological status of ideas about race itself a consequence of the recognition that concepts of race have all but lost their relevance as sociologically significant descriptions This book surveys ways in which social scientists have attempted to come to terms with this situation before developing an alternative approach based on recent work by realist authors This approach offers a radical revision of orthodox debates about race concepts about the possibility of a social science and about the nature of empirical research This illustrated through two policy examples an account of post war migration to the UK and debates about trans racial adoption in the UK and the USA *Ontology of Sex* Carrie Hull, 2006-01-16 Poststructuralism particularly through the writings of Michel Foucault and Judith Butler has achieved remarkable success in challenging our belief in natural sex categories and instincts Here Carrie Hull endorses the progressive ideals of poststructuralism while demonstrating the superiority of a realist account of sex and sexuality Embracing biological and cultural variability Hull nonetheless shows that the sexed body is naturally structured and deeply meaningful Poststructuralist philosophers have argued that biological sex is a continuum rather than a binary and that sex identity and drive are entirely performances of cultural norms rather than expressions of innate qualities Hull draws parallels with Nelson Goodman W V O Quine and B F Skinner to show that these poststructuralist theories are rooted in a nominalist relativist and behaviourist philosophy and develops an alternative framework using arguments from contemporary and critical realism Employing colourful illustrations from biology anthropology and psychology Hull demonstrates the rich potential of realist philosophy and concludes that it is philosophically and scientifically correct on one hand and politically advisable on the other to maintain a distinction albeit attenuated between sex and gender and sexuality and behaviour

Interpreter: A Journal of Mormon Scripture, Volume 9 (2014) The Interpreter Foundation, 2014-05-19 This is volume 9 2014 of *Interpreter A Journal of Mormon Scripture* published by The Interpreter Foundation It contains articles on a variety of topics including reflections on the mission of The Interpreter Foundation the doctrinal and temple implications of Peter's surnaming literacy and orality in the Book of Mormon the temporality of sin an analysis of epistemology in historiography and two book reviews of David Bokovoy's *Authoring the Old Testament Genesis Deuteronomy* [Explanation in the social sciences](#) Josianne Duchène, Guillaume Wunsch, Eric Vilquin, 1987 *Sociological Reasoning* Rob Stones, 1996-07-03 While sociological modernists were outrageously presumptuous in their claims for sociological knowledge postmodernists have gone to another extreme in claiming that it has no more truth status than fiction Critical of both positions *Sociological Reasoning* develops an original typology of approaches to social scientific theory and research which is distinguished by its openness and reflexive awareness of rhetorical and methodological aspects of knowledge claims Laced with graphic illustrative examples this is a strikingly well written text that will appeal to students at undergraduate level and beyond *Approaches to Social Enquiry* Norman Blaikie, 2007-09-24 Since its initial publication this highly respected text has provided students with a critical review of the major research paradigms in the social sciences and the logics or strategies of enquiry associated

with them This second edition has been revised and updated *The Post-Modern and the Post-Industrial* Margaret A. Rose,1991-06-28 The first book to provide a critical survey of the many different uses made of the term post modern across a number of different disciplines **Noam Chomsky: On Power, Knowledge and Human Nature** P. Wilkin,1997-04-30 Noam Chomsky is among the most influential contemporary thinkers Peter Wilkin looks in particular at the philosophical basis of his social and political thought especially his ideal about power knowledge and human nature He shows how Chomsky s ideas can help to defend naturalism as in social and political thought Chomsky s critical writings of social inquiry and his normative ideas on libertarian socialism and human emancipation are interpreted as synthesising a number of important ideas and approaches at a time when these ideas have fallen out of favour **Counselling in a Multicultural Society** Stephen Palmer,Pittu D Laungani,1998-12-10 The book aptly describes explores and hits the core of very complex issues around race racism culture difference dual identity stereotypes immigration and alienation It is also very thought provoking raising questions about one s own ability to work more flexibly in the consulting room with clients of different backgrounds It is excellent for a directory of resources useful for training purposes and an enabling role model for good practice in counselling in a multicultural society I enjoyed it It should be a required handbook on the shelf of every caring professional working within a multicultural environment or setting Transformations The PCSR Journal This book examines the many complex issues surrounding counselling and therapy in a multicultural society It aims to sensitize readers to the cultural and racial setting in which counselling occurs and to raise awareness of the specific counselling needs of those from differing backgrounds The book explores the impact of culture on identity and of cultural differences on interaction It looks at how one might take a client s cultural context into consideration or deal with racism and provides a sophisticated account of the salient value systems of Western and non Western cultures Contributors also challenge the suitability of a client centred approach for clients from non Western backgrounds and explore the possibilities for transcultural culture centred and multimodal models of counselling in the West **Critical Theory and Methodology** Raymond A. Morrow,Raymond Allen Morrow,David D. Brown,1994-06-24 Critical Theory traces its roots from Marxism through the renowned Frankfurt School to a wide array of national and cultural traditions Raymond Morrow s book traces the history and outlines the major tenets of critical theory for an undergraduate audience He exemplifies the theory through an analysis of two leading social theorists J um urgen Habermas and Anthony Giddens Unique to this volume is the emphasis on the link between Critical Theory and empirical research and social science methodology often thought to be incompatible **In Search of the Real Max Weber** Colin Campbell,2025-09-01 This book uses the contrast between the theoretical positions of the two Max Webers that is the Weber of the Protestant Ethic thesis and the Weber of the theory of action as the basis for developing a theory of agency and an associated dynamic interpretive approach to action The book critiques traditional theories of action for neglecting the physical dimension for conflating agency with action and contrasting the latter with behaviour It argues that

action is not just cerebral or communicative but inherently tied to effort emotion and imagination with voluntarism understood in terms of attention instead of intention and the exercise of will rather than choice This is the basis of a dynamic interpretivist approach one that integrates behavioural insights with interpretive sociology highlighting how actors actively maintain their power of agency The concept of character is also introduced as a crucial link between individual agency ethical values and cultural systems This book will be of interest to researchers and students of sociology anthropology media studies and criminology as well as social theorists

SAGE Visual Methods Jason Hughes,2012-07-23 In contemporary Western societies the visual domain has come to assume a hitherto unprecedented cultural centrality Daily life is replete with a potentially endless stream of images and other visual messages from the electronic and paper based billboards of the street to the TV and Internet feeds of the home The visual has become imbued with a symbolic potency a signifying power that seemingly eclipses that of all other sensory data The central aim of this four volume collection is to explore key approaches to visual research methods and to consider some of the core principles issues debates and controversies surrounding the use of visual techniques in relation to three key enterprises 1 documentation and representation 2 interpretation and classification and 3 elicitation and collaboration Volume One Principles Issues Debates and Controversies in Visual Research serves as a theoretical backdrop to the field as a whole It introduces core epistemological ethical and methodological debates that effectively cut across the four volume collection as a whole Volume Two Documentation and Representation illustrates approaches to visual documentation and representation from classical documentaries to contemporary state of the art modes of visual anthropology and ethnography Volume Three Interpretation and Classification examines core debates surrounding and approaches to visual analysis Volume Four Elicitation and Collaboration explores participative approaches to visual inquiry

Research Methods for Education, second edition Peter Newby,2014-07-11 Research Methods for Education Second Edition takes the student by the hand and guides them through the complex subject of research methods in an engaging witty and clear way The book covers the philosophical approaches and epistemology as well as the practical aspects of research such as designing questionnaires and presenting conclusions Each chapter is split into Context and Practice and both sections are packed with exercises examples and comparative international material from other educational contexts Peter Newby s book is the student friendly text which demystifies the research process with clarity and verve Key features written in a clear and friendly manner to help students feel more confident dealing with the complexities of research and particularly useful for those new to research or less confident with numbers a mixed methods approach which doesn t simply prioritise quantitative or qualitative methods allowing for greatest possible coverage contains guidance on analytic procedures that require more advanced tools such as SPSS and Minitab many excellent international examples and case studies specifically from education which breaks away from a parochial focus on UK education system
