Employee Surveys That Make A Difference Using Customized Feedback Tools To Transform Your Organization:

Employee Surveys that Make a Difference Joe Folkman, 1999-06 For some companies employee surveys have become a catalyst for change that provides executives and employees with additional insight on key drivers of organizational performance

Designing and Using Organizational Surveys Allan H. Church, Janine Wacławski, 2007-07-23 The survey process is a highly complex and situationally dependent one in need of careful management. If poorly designed and administered surveys can create disappointment and even disaster. Little has been written so far for those responsible for designing and implementing surveys in organizations. These authors have drawn on their extensive consulting experience to develop a concise pragmatic seven step model covering the entire process from initiation to final evaluation to making the results meaningful to the future of the organization. They pay special attention to the political and human sensitivities concerned and show how to overcome the many potential barriers to a successful outcome.

The Team Effectiveness

Survey Workbook Robert W. Bauer, Sandra S. Bauer, 2006-02-01 Virtually every type and size of organization commits substantial resources to team based initiatives. While there are many different names applied to these teams: corrective action teams, project teams, quality improvement teams, as well as method specific teams such as Six Sigma, lean, quality function deployment, strategy deployment teams, and so on, their purpose is similar: improve organization quality, performance, productivity, and effectiveness. But the reasons why these team activities and programs sometimes fail aren't always obvious to team members, leaders, and upper management. This is because there is no system in place to measure what is actually occurring. The Team Effectiveness Survey Workbook helps identify these reasons by teaching readers how to develop survey objectives, prepare your survey questionnaire, create a survey code structure for summarizing the results, administer the survey process, the survey results, and analyze and feed back the survey results. It contains over 500 different questions divided into 28 categories to help create survey questionnaires to meet the reader's specific information needs. Throughout the workbook you will find sample questionnaires, answer sheets, code structures, and more along with examples and forms to aid in constructing a survey. Also included is a Team Effectiveness Toolkit CD-ROM containing all of the survey questions in their appropriate categories, the sample Team Effectiveness questionnaires, and all of the survey support materials. The workbook has been developed for use by internal and external resource persons, consultants who are responsible for team development, implementation activities, and also team leaders and members involved in team based initiatives.

Contents: Preface, Introduction, Section One: The Survey Process, Section Two: Survey Questions, Section Three: Sample Survey Questionnaires, Section Four: Survey Support Materials, Section Five: Team Effectiveness CD-ROM Toolkit Instructions.
