Women's Lives and Livelihoods in Post-Soviet Uzbekistan Zulfiya Tursunova, 2014-06-05 Women in Uzbekistan have been labeled as victims of patriarchy and submissive voiceless bodies who lack agency and decision making power They are also often symbolized as preservers of rituals and culture and also the victims of socio economic transformations During the years of land tenure changes from collectivization to de collectivization World War II and the five year plan economy women played a vital role in pursuing a diverse range of livelihood opportunities to sustain their families and communities But what kind of livelihood activities do women pursue in rural areas in Uzbekistan What do they think about themselves Do they exercise agency What are their values desires dreams and inspirations in the post Soviet period in Uzbekistan *Women's Lives and Livelihoods in Post Soviet Uzbekistan* presents women's voices and their experiences of carrying out livelihood activities such as farming trading baking sewing building greenhouses and establishing furniture workshops In a major contribution to the study of post Soviet transformations Zulfiya Tursunova demonstrates how women exercise multi dimensional empowerment by joining social and economic saving networks such as gap and chernaya kassa These networks represent a collective movement and action against economic dependency of women on men and the state micro loan bank system The networks that do not require external donor interventions have been able to empower women for social justice knowledge redistribution of resources and conflict resolution in ways that are vital to community development Tursunova provides accounts of such ceremonies as mavlud ihson Bibi Seshanba and Mushkul Kushod These ceremonies show the ways the conflict resolution practices of women are woven into their everyday life and function

Women, Globalization and Fragmentation in the Developing World H. Afshar, S. Barrientos, 1999-07-05. The process of globalization has had a dramatic impact on the lives of women in developing countries in the past decade. They have been increasingly drawn into insecure, flexible employment working for the world market. The feminisation of the labour market has increased the burdens on women and the inability of men to access full-time, well remunerated employment has exacerbated the process of male out-migration and has left many families headed by women. At the same time, the reduction in state services and welfare has increased the burdens placed on women. Nevertheless, the consequences of globalization have been different for different women in different places. In some circumstances, it has created opportunities for greater empowerment, whilst in others, it has stimulated a reaction and increased the subordination of women. This book explores the experiences of women in diverse local contexts within different cultures and faiths, drawing on case studies from Asia, Africa and Latin America. It draws out the contradictory and fragmented impact of globalization at the local level on the lives of women in the developing world.

Understanding the organizational approaches of funders and project implementers to strengthen women's empowerment through agricultural collectives Rubin, Deborah, 2024-10-07. This paper reports on approaches for

strengthening women's empowerment that were implemented by project partners involved in the International Food Policy Research IFPRI led Applying New Evidence for Women's Empowerment ANEW project funded by the Walmart Foundation. The study explores the partner organizations' websites and publications, project materials and selected staff interviews to better understand how each envisions women's empowerment and the pathways for supporting it. The four implementing project partners are Grameen Foundation, Professional Assistance for Development Action (PRADAN) in India, Root Capital in Mexico and TechnoServe in Guatemala. Their programs and their organizational approaches vary in whether they primarily focus on women rather than more broadly targeting both women and men and their gender relationships. Some organizations are more organic in integrating attention to gender and empowerment into their programs, designing and implementing an approach on a case-by-case basis. Others are more intentional in establishing organization-wide policies, strategies and monitoring systems. The organizations also differ in their positions on supporting economic empowerment and clear economic benefits such as prioritizing increased income or assets in contrast to those that also seek to actively change social norms and achieve other social dimensions of empowerment that encompass behaviors around decision making, mobility and self-confidence. Another variation is in the organizations' attention to enterprise development and consequently to entrepreneurship and upgrading and what aspects of women's empowerment are most critical for achieving those goals. This paper offers implementers and their funders insight into organizational differences in approaches to women's empowerment. The review demonstrates that both funders and implementers continue to focus on strengthening women's economic empowerment by increasing women's incomes and assets, often with good results. However, they often lack clear theories of change or explicit strategies to strengthen other dimensions of women's empowerment. More nuanced evidence-based theories of change and targeted actions could strengthen program design to expand and support women's achievement of empowerment across all its dimensions.

International Handbook of Teacher Quality and Policy Motoko Akiba, Gerald K. LeTendre, 2017-09-01. The *International Handbook of Teacher Quality and Policy* is a comprehensive resource that examines how teacher quality is conceptualized, negotiated and contested and teacher policies are developed and implemented by global, national and local policy actors. Edited by two of the leading comparative authorities in the field, it draws on the research and contributions of scholars from across the globe to explore five central questions: How has teacher quality been conceptualized from various disciplinary and theoretical perspectives? How are global and transnational policy actors and networks influencing teacher policies and practices? What are the perspectives and experiences of teachers in local policy contexts? What do comparative research studies tell us about teachers and how their work and policy contexts influence their teaching? How have various countries implemented policies aimed at improving teacher quality and how have these policies influenced teachers and students? The international contributors represent a wide variety of scholars who identify global dynamics influencing policy discourses on teacher quality and examine national and local teaching and policy environments.
