Flesh Architectural Probes:

Flesh Elizabeth Diller, Ricardo Scofidio, 1996-01-01 Like all the work of architects Liz Diller Ric Scofidio *Flesh* is a set of contradictions and complexities It is both a monograph of their work the first ever on their art architecture and installations but also not a traditional monograph It is a both and neither nor book as project noted at the time of its publication in 1994 for its groundbreaking typography and not too subtle critique of architecture from within Since its publication Diller Scofidio now Diller Scofidio Renfro have gone on to become among the world's most famous architects but the themes concerns and even forms that make them so celebrated today are all here in *Flesh* along with its most radical proposition that anything can be architecture starting with this book one of the most sought after and valuable books in our library

Architectural Colossi and the Human Body Charalampos Politakis, 2017-08-10 The human body has been used as both a model and metaphor in architecture since antiquity This book explores how it has been an inspiration for the exterior form of architectural colossi through the years It considers the body as a source of architectural and artistic representation and in doing so explores the results of such practices in colossal sculptures and architectural praxis within a philosophical discourse of space time and media *Architectural Colossi and the Human Body* discusses the role of Platonic and Cartesian philosophy and how philosophers such as Heidegger and Merleau Ponty and theoreticians such as Frascari and Pallasmaa have seen described and analysed the human body and the role of architecture and perception Drawing upon three key case studies and by employing theoretical ideas of Venturi and others this book will provide an understanding of the role of anthropomorphism and the relation and use of the human body with reference to selected architects and artists

Diller Scofidio + Renfro Edward Dimendberg, 2013-03-20 In *Diller Scofidio Renfro Architecture after Images* Edward Dimendberg offers the first comprehensive treatment of one of the most imaginative contemporary design studios Since founding their practice in 1979 Elizabeth Diller and Ricardo Scofidio have integrated architecture urban design media art and the performing arts in a dazzling array of projects which include performances art installations and books in addition to buildings and public spaces At the center of this work is a fascination with vision and a commitment to questioning the certainty and security long associated with architecture Dimendberg provides an extensive overview of these concerns and

the history of the studio revealing how principals Elizabeth Diller Ricardo Scofidio and Charles Renfro continue to expand the definition of architecture question the nature of space and vision in contemporary culture and produce work that is endlessly surprising and rewarding from New York's High Line to Blur an artificial cloud and Facsimile a video screen that moves around a building facade Dimendberg also explores the relation of work by DS R to that by earlier modernists such as Marcel Duchamp and John Hejduk He reveals how the fascination of the architects with evolving forms of media technology and building materials has produced works that unsettle distinctions among architecture and other media Based on interviews with the architects their clients and collaborators as well as unprecedented access to unpublished documents sketchbook entries and archival records Diller Scofidio Renfro is the most thorough consideration of DS R in any language Illustrated with many previously unpublished renderings in addition to photos from significant contemporary photographers this book is an essential study of one of the most significant and creative architecture and design studios working today

The Inhabitable Flesh of Architecture Marcos Cruz, 2017-03-02 Today's architecture has failed the body with its long heritage of purity of form and aesthetic of cleanliness A resurgence of interest in flesh especially in art has led to a politics of abjection completely changing traditional aesthetics and is now giving light to an alternative discussion about the body in architecture This book is dedicated to a future vision of the body in architecture questioning the contemporary relationship between our Human Flesh and the changing Architectural Flesh Through the analysis and design of a variety of buildings and projects Flesh is proposed as a concept that extends the meaning of skin one of architecture's most fundamental metaphors It seeks to challenge a common misunderstanding of skin as a flat and thin surface In a time when a pervasive discourse about the impact of digital technologies risks turning the architectural skin ever more disembodied this book argues for a thick embodied flesh by exploring architectural interfaces that are truly inhabitable Different concepts of Flesh are investigated not only concerning the architectural and aesthetic but also the biological aspects The latter is materialised in form of Synthetic Neoplasms which are proposed as new semi living entities rather than more commonly derived from scaled up analogies between biological systems and larger scale architectural constructs These neoplastic creations are identified as partly designed object and partly living material in which the line between the natural and the artificial is progressively blurred Hybrid technologies and interdisciplinary work methodologies are thus required and lead to a revision of our current architectural practice

Binding Space: The Book as Spatial Practice Marian Macken, 2018-04-17 Books orient intrigue provoke and direct the reader while editing interpreting encapsulating constructing and revealing architectural representation Binding Space The Book as Spatial Practice explores the role of the book form within the realm of architectural representation It proposes the book itself as another three dimensional complementary architectural representation with a generational and propositional role within the design process Artists books in particular that is a book made as an original work of art with an artist designer or architect as author have certain qualities and characteristics quite

different from the conventional presentation and documentation of architecture. Paginal sequentiality, the structure and objecthood of the book and the act of reading create possibilities for the book as a site for architectural imagining and discourse. In this way, the form of the book affects how the architectural work is conceived, constructed and read. In five main sections, *Binding Space* examines the relationships between the drawing, the building and the book. It proposes thinking through the book as a form of spatial practice, one in which the book is cast as object, outcome, process and tool. Through the book, we read spatial practice anew.

Scenographic Design Drawing Sue Field, 2020-12-14. This enlightening study explores the set design drawings for theatre and live performance, highlighting their unique qualities within the greater arena of drawing practice and theory. The latest volume in the *Drawing In* series, *Scenographic Design Drawing* encourages an interdisciplinary dialogue in the field of drawing with the inclusion of illustrations throughout. Scenographic design drawings visualize the images in the designer's mind's eye early in the design process. They are the initial design tool in the creative engagement with theatre, opera, dance and non-text based performance. It is in particular this body of drawings that is unique as both a performative and a theatrical representation of multiple worlds within the stage space. Sue Field illuminates this illustration process and identifies how these drawings have functioned and developed over time. *Scenographic Design Drawing* serves to satisfy an emerging global curiosity and a thirst for new knowledge and understanding in relation to the drawings executed by the historical and contemporary scenographer. This work addresses a critical research gap and shows how the scenographic design drawing continues to be a principal site of innovation, subjectivity, originality and authorship in theatre and live performance.

Hypersexual City Nicole Kalms, 2017-03-31. Much of feminist architectural scholarship focuses on the enormous task of instating women's experience of space into spatial praxis. *Hypersexual City: The Provocation of Soft Core Urbanism* suggests this attention to women's invisibility in sociocultural space has overlooked the complex ways in which women already occupy space, albeit mostly as an image or object to be consumed, even purchased. It examines the occupation of urban space through the mediated representation of women's hypersexualized bodies. A complex transaction proliferates in the commercial urban space of cities; this book seeks to address the cause and consequence of the increasing dominance of gendered representation. It uses architectural case studies and analysis to make visible the sexual politics of architecture and urbanism and, in doing so, reveal the ways that heterosexist culture shapes the spaces, behaviour and relationships formed in neoliberal cities. *Hypersexual City* announces how examining urbanism that operates through and is framed by sexual culture can demonstrate that architecture does not merely find itself adrift in the hypersexualized landscape of contemporary cities but is actively producing and contributing to the sexual regulation of urban life.

Architecture and Choreography Beth Weinstein, 2024-05-31. *Architecture and Choreography: Collaborations in Dance Space and Time* examines the field of architectural choreographic experiments, unique interdisciplinary encounters and performed events generated through collaborations between architects and choreographers.

Forty case studies spanning four decades give evidence of the range of motivations for embarking on these creative endeavors and diverse conceptual underpinnings generative methods objects of inquiry and outcomes Architecture and Choreography builds histories and theories through which to examine these works the contexts within and processes through which the works emerged and the critical questions they raise about ways to work together sites and citations ethics and equity control and agency Three themes frame pairs of chapters The first addresses disciplinarity through works that critically reflect upon their discipline s tools techniques and conventions juxtaposed against projects that cite or use other art forms and cultural phenomena as source material The second interrogates space and the role of spatial dispositifs institutions and sites and their hidden and not so hidden conditions as conceptual drivers and structures to subvert trouble unsettle remember The third asks who and what dances finding a spectrum from mobilized architectural bodies to more than human cybarcorps Modes of collaboration and the temporalities and life cycles of projects inform bookending chapters Architecture and Choreography offers vital lessons not only for architects and choreographers but also for students and practitioners across design and performance fields

Architectures of Chance Yeoryia Manolopoulou,2017-03-02 Architectural discourse and practice are dominated by a false dichotomy between design and chance and governed by the belief that the architect s role is to defend against the indeterminate In Architectures of Chance Yeoryia Manolopoulou challenges this position arguing for the need to develop a more creative understanding of chance as aesthetic experience and critical method and as a design practice in its own right Examining the role of experimental chance across film psychoanalysis philosophy fine art and performance this is the first book to comprehensively discuss the idea of chance in architecture and bring a rich array of innovative practices of chance to the attention of architects Wide ranging and through a symbiotic interplay of drawing and text Architectures of Chance makes illuminating reading for those interested in the process and experience of design and the poetics and ethics of chance and space in the overlapping fields of architecture and the aleatoric arts

Daniel Libeskind Antonello Marotta,2013-06-30 The book in your hands is a complete mature work of a scholar at this point aware of his own theoretical and expressive means Perhaps the most complete and thorough essay produced to date on Daniel Libeskind it provides a portrait intertwined with ramifications packed with references full of charm and altogether beautiful also from the point of view of the extraordinary wealth of illustrations Much of the illustrative material has not been published before and is the result of vital collaboration between the author Antonello Marotta and the attentive enthusiastic Libeskind Studio From The Preface by Antonino Saggio

Ceilings and Dreams Paul Emmons,Federica Goffi,Jodi La Coe,2019-07-08 Where is the space for dreaming in the twenty first century Lofty thoughts like dreams are born and live overhead just as they have been represented in Renaissance paintings and modern cartoons Ceilings are often repositories of stories events and otherwise invisible oneiric narratives Yet environments that inspire innovative thinking are dwindling as our world confronts enormous challenges and almost all of our thinking debating and

decision making takes place under endless ceiling grids Quantitative research establishes that spaces with taller ceilings elicit broader more creative thoughts Today ceilings are usually squat conduits of technology they have become the blind spot of modern architecture The twenty essays in this book look across cultures places and ceilings over time to discover their potential to uplift the human spirit Not just one building element among many the ceiling is a key to unlock the architectural imagination Ceilings and Dreams aims to correct this blind spot and encourages architects and designers researchers and students to look up through writings organized into three expansive categories reveries suspensions and inversions The contributors contemplate the architecture of levity and the potential of the ceiling once again as a place for dreaming Gender Studies in Architecture Dörte Kuhlmann,2014-04-11

Analyzing a range of ideas from biological evolutionary and anthropological theories to a variety of feminist psychoanalytic poststructuralist and constructivist discourses this book provides a comprehensive introduction to the problematics of gender and power in architectural and urban design Topics range from conceptions of postulated matriarchal architecture in Old Europe to contemporary technologies of control from the mechanisms of gaze to architectural performatives from the under representation of women in the planning profession to the integration of gender issues to the curriculum The particular strengths of the book lie in its inclusiveness and critical analysis It is not a partisan defence of feminism or any other theory but a critical introduction to the issues relating to gender Moreover the conclusions reach beyond a narrow gender studies perspective to social and ethical considerations that are unavoidable in any responsible architectural or urbanistic practice With its broad range and balanced analysis of different theories the book is suitable as an overview of gender studies in architecture and useful for any designer who is concerned with the social effects of the built environment **The Monster Leviathan** Aaron

Betsky,2024-01-09 Visionary proposals for a mythic and strange architecture or anarchitecture through which we can imagine other and better worlds Lurking under the surface of our modern world lies an unseen architecture or anarchitecture It is a possible architecture an analogous architecture an architecture of anarchy which haunts in the form of monsters that are humans and machines and cities all at once or takes the form of explosions veils queer playful spaces or visions from artwork and video games In The Monster Leviathan Aaron Betsky traces anarchitecture through texts design and art of the twentieth and early twenty first century and suggests that these ephemeral evocations are concrete proposals in and of themselves Neither working models nor suggestions for new forms they are scenes just believable enough to convince us they exist or just fantastical enough to open our eyes The Monster Leviathan gives students and lovers of architecture as well as those hoping to construct a better more sustainable and socially just future a set of tools through which they can imagine that such other worlds are possible As Betsky eloquently articulates anarchitecture already exists and does not exist at all It is the myth of building and all we have to do is find it **Key Interiors since 1900** Graeme

Brooker,2013-09-23 This book defines the history of modern interior design through the reuse of existing buildings This

approach allows the history of the interior to be viewed as separate from the history of architecture and instead enables the interior to develop its own historical narrative The book is organized around six thematic chapters home work retail display leisure and culture Each one comprises a selection of case studies in chronological order 52 key examples dating from 1900 to the present are explored in terms of context concept organization and detail and are illustrated with photographs plans sections concept drawings and sketches This unique history will be invaluable for students of interior architecture and design seeking a survey tailored especially for them as well as appealing to interested general readers Seeing and Making in Architecture Taiji Miyasaka, 2013-08-22 You always aim to achieve that moment of insight that leads to ingenuity and novelty in your design but sometimes it remains elusive This book presents a variety of techniques for mapping and making hands on design build projects and relates this work to real architecture It helps you to learn new ways of seeing and making that will enhance your creative design process and enable you to experience moments that lead to ingenuity in design Each of the book's two parts Seeing and Making is organized according to technique which ranges from quantitative analysis and abstraction to pattern and scale to provide you with a framework for mapping and hands on exercises Interviews with architects Yoshiharu Tsukamoto Atelier Bow Wow and Jesse Reiser and Nanako Umemoto Reiser Umemoto give you perspective on using these exercises in practice The People, Place, and Space Reader Jen Jack Giesecke, William Mangold, Cindi Katz, Setha Low, Susan Saegert, 2014-04-16 The People Place and Space Reader brings together the writings of scholars designers and activists from a variety of fields to make sense of the makings and meanings of the world we inhabit They help us to understand the relationships between people and the environment at all scales and to consider the active roles individuals groups and social structures play in creating the environments in which people live work and play These readings highlight the ways in which space and place are produced through large and small scale social political and economic practices and offer new ways to think about how people engage the environment in multiple and diverse ways Providing an essential resource for students of urban studies geography sociology and many other areas this book brings together important but till now widely dispersed writings across many inter related disciplines Introductions from the editors precede each section introducing the texts demonstrating their significance and outlining the key issues surrounding the topic A companion website PeoplePlaceSpace.org extends the work even further by providing an on going series of additional reading lists that cover issues ranging from food security to foreclosure psychiatric spaces to the environments of predator animals **A Creative Philosophy of Anticipation** Jamie Brassett, John O'Reilly, 2021-04-25 This edited collection highlights the valuable ontological and creative insights gathered from anticipation studies which orients itself to the future in order to recreate the present The gathered essays engage with many writers from speculative metaphysics to poetic philosophy ancient writing systems to the fringes of pataphysics The book situates itself as a creative intervention in and with various thinkers designers artists scientists and poets to offer insight into ways of anticipating It brings together

philosophical practices for which creativity is both a fundamental area of consideration and a mode of working a characterization of recent Continental Philosophy which takes a departure from traditional futures studies thinking This book will be of interest to scholars and research in futures studies anticipation philosophy creative practice and theories about creative practice as well as the intersections between philosophy creativity and business Unplanned Visitors Olivier Vallerand,2022-03-30 Sexuality and gender have long been influential in understanding the construction of domestic space its meanings often revealing a binary division of private and public female and male By reconstructing the foundation of queer critiques of space and by analyzing the representation of domesticity in contemporary art and architecture Unplanned Visitors shows the blurring of private and public that can occur in any domestic space and explores the potential of queer theory for understanding and designing the built environment Olivier Vallerand investigates how queer critiques building on pioneering feminist work question the relation between identity and architecture and highlight normative constructs underlying domestic spaces He draws out a genealogy of queer space in theoretical discourse in architecture studying projects by Mark Robbins Joel Sanders J Mayer H Elmgreen Dragset Andr s Jaque and MYCKET among others These works blur the traditional borders between architecture and art to emphasize the tensions between private and public and their impact on assumptions about domestic space and family structure The challenges in moving from experimental installations to built environments suggest how designers must acknowledge and respond to the social contexts that shape architecture rethinking how domestic spaces can be designed to allow everyone to better manage the expression of their self identification through their living environments Unplanned Visitors poses a challenge to traditional architectural theory and history but also suggests a renewed and more inclusive ethics whereby designers explicitly address social and political power structures The potential of a queer approach to architectural design history theory and education is precisely to enact a method that creates more inclusive buildings and safer neighbourhoods for everyone *Urban Maps* Richard Brook,Nick Dunn,2016-12-05 This book concerns the city and the devices that define the urban environment by their presence representation or interpretation The texts offer an interdisciplinary discourse and critique of the complex systems artifacts interventions and evidences that can inform our understanding of urban territories on surfaces in the margins or within voids The diverse media of arts practices as well as commercial branding are used to explore narratives that reveal latent characteristics of urban situations that conventional architectural inquiry is unable to do The subjects covered are presented within a wider framework of urban theory into which are embedded case study examples that outline the practices processes and interpretations of each theme The chapters provide a contemporary reading of urban socio cultural conditions using mapping as a lens to explore and communicate the social phenomena and lived experiences of the dynamic and temporal city Mapping is developed as a form of critical instrumentality to expose record and contribute to the understanding of the singular essences of space place and networks by thematic cognitive and experiential modes of investigation
