DMT: The Spirit Molecule Rick Strassman, 2000-12-01 A clinical psychiatrist explores the effects of DMT one of the most powerful psychedelics known A behind the scenes look at the cutting edge of psychedelic research Provides a unique scientific explanation for the phenomenon of alien abduction experiences From 1990 to 1995 Dr Rick Strassman conducted U S Government approved and funded clinical research at the University of New Mexico in which he injected sixty volunteers with DMT one of the most powerful psychedelics known His detailed account of those sessions is an extraordinarily riveting inquiry into the nature of the human mind and the therapeutic potential of psychedelics DMT a plant derived chemical found in the psychedelic Amazon brew ayahuasca is also manufactured by the human brain In Strassman's volunteers it consistently produced near death and mystical experiences Many reported convincing encounters with

intelligent nonhuman presences aliens angels and spirits Nearly all felt that the sessions were among the most profound experiences of their lives Strassman's research connects DMT with the pineal gland considered by Hindus to be the site of the seventh chakra and by Rene Descartes to be the seat of the soul DMT The Spirit Molecule makes the bold case that DMT naturally released by the pineal gland facilitates the soul's movement in and out of the body and is an integral part of the birth and death experiences as well as the highest states of meditation and even sexual transcendence Strassman also believes that alien abduction experiences are brought on by accidental releases of DMT If used wisely DMT could trigger a period of remarkable progress in the scientific exploration of the most mystical regions of the human mind and soul

Stone, 2012-09-21 An important new way of viewing the prehistoric art of the Americas The Jaguar Within demonstrates that understanding a work of art's connection with shamanic trance can lead to an appreciation of it as an extremely creative solution to the inherent challenge of giving material form to nonmaterial realities and states of being Shamanism the practice of entering a trance state to experience visions of a reality beyond the ordinary and to gain esoteric knowledge has been an important part of life for indigenous societies throughout the Americas from prehistoric times until the present Much has been written about shamanism in both scholarly and popular literature but few authors have linked it to another significant visual realm art In this pioneering study Rebecca R Stone considers how deep familiarity with and profound respect for the extra ordinary visionary experiences of shamanism profoundly affected the artistic output of indigenous cultures in Central and South America before the European invasions of the sixteenth century Using ethnographic accounts of shamanic trance experiences Stone defines a core set of trance vision characteristics including enhanced senses ego dissolution bodily distortions flying spinning and undulating sensations synaesthesia and physical transformation from the human self into animal and other states of being Stone then traces these visionary characteristics in ancient artworks from Costa Rica and Peru She makes a convincing case that these works especially those of the Moche depict shamans in a trance state or else convey the perceptual experience of visions by creating deliberately chaotic and distorted conglomerations of partial inverted and incoherent images
