Flexible Incentives For The Adoption Of Environmental Technologies In Agriculture:

Flexible Incentives for the Adoption of Environmental Technologies in Agriculture Frank Casey, Andrew Schmitz, Scott Swinton, David Zilberman, 2012-12-06 Flexible Incentives for the Adoption of Environmental Technologies in Agriculture identifies and structures more flexible economic incentives for the achievement of environmental goals in agriculture. It provides a conceptual framework and presents case studies that analyze how flexible incentives can address environmental problems that are caused by agricultural production. The book brings together economists, agency personnel and political economists for the purpose of exploring how new cutting edge economic tools could be developed and applied to environmental problems. The goal of the book is to complement and to expand the economic theory of environmental regulation and technology adoption with new research findings. The key theme of this book is the important role technology takes when addressing environmental problems. New technologies and technical development are broadly defined to include economic instruments, innovative ways to communicate environmental information, new economic institutions and education. This book is designed for public and private policymakers, government analysts, teachers, researchers and students who specialize in the fields of natural resources, agricultural economics and environmental regulation. It provides a fresh perspective on what types of incentives may be used to lead us to the desired environmental outcomes and offers new ideas about the types of economic instruments that may achieve these outcomes. [Agricultural Policy for the 21st Century](#) Luther G. Tweeten, Stanley R. Thompson, 2008-06-02 Agricultural policy reform has become a very hot topic. Over the next couple of years we will see the funding for these programs being hotly debated. The thesis of this book is that a better informed public is essential to bring rationality to farm policy. This book provides telling evidence that markets work: that competent commercial farmers will earn returns on their resources as high as those earned elsewhere in the absence of income transfer to farmers. **107-1 Hearings: Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations for 2002, Part 3, 2001**, 2001 **The Economics of Agri-Environmental Policy, Volume II** Sandra S. Batie, Richard D. Horan, 2017-11-30 This two volume set collects key essays examining economic theory, methods and issues salient to agri environmental policy in the US and in Europe as well as in other countries. The topics under discussion are arranged thematically and include theoretical, numerical and empirical works; all are grounded in policy and economics. The introduction to these volumes reviews the evolution of agri environmental policies with an important focus on the history of US policy and European agri environmental policy. A key feature within this is the importance of the Environmental Protection Agency (EPA) in the US, particularly its move towards more market based incentives from the 1980s onwards. Within the European context, the effects of the CAP (Common Agricultural Policy) on agri environmental programmes and schemes within the member states are discussed. Significantly, the essays republished here have provided the knowledge base that has influenced further applied work, creating an influential impact on policy development. **A Comprehensive**

Assessment of the Role of Risk in U.S. Agriculture Richard E. Just, Rulon D. Pope, 2013-11-11 After all the research on agricultural risk to date the treatment of risk in agricultural research is far from harmonious Many competing risk models have been proposed Some new methodologies are largely untested Some of the leading empirical methodologies in agricultural economic research are poorly suited for problems with aggregate data where risk averse behavior is less likely to be important This book is intended to i define the current state of the literature on agricultural risk research ii provide a critical evaluation of economic risk research on agriculture to date and iii set a research agenda that will meet future needs and prospects This type of research promises to become of increasing importance because agricultural policy in the United States and elsewhere has decidedly shifted from explicit income support objectives to risk related motivations of helping farmers deal with risk Beginning with the 1996 Farm Bill the primary set of policy instruments from U S agriculture has shifted from target prices and set aside acreage to agricultural crop insurance Because this book is intended to have specific implications for U S agricultural policy it has a decidedly domestic scope but clearly many of the issues have application abroad For each of the papers and topics included in this volume individuals have been selected to give the strongest and broadest possible treatment of each facet of the problem The result is this comprehensive reference book on the economics of agricultural risk

The Economics of Water Quality Naomi Zeitouni, 2019-10-22 This volume brings together a number of prominent economic studies all of which deal with key water quality issues The studies focus on the economic aspects of water quality including identifying the polluters actions and incentives designing and comparing control mechanisms analyzing the costs and benefits of water quality programmes and finally managing transboundary water quality They all make recommendations for improving water quality through changing incentives programmes and or policies

Land Use Problems and Conflicts John C. Bergstrom, Stephen J Goetz, James S. Shortle, 2004-08-02 The causes consequences and control of land use change have become topics of enormous importance in contemporary society Not only is urban land use and sprawl a hot button issue but issues of rural land use have also been in the headlines Policy makers and citizens are starting to realize that many environmental and economic issues have the question of land use at their very core Comprising papers from a conference sponsored by the Northeast Regional Center for Rural Development Land Use Problems and Conflicts draws together some of the most up to date research in this area Sections are devoted to problems in the United States and Europe the consequences of such problems land use related data and alternative solutions to conflict With a lineup including some of the best scholarship on this subject to date this volume will be of use to those studying environmental and land use issues in addition to policy makers and economists

Metaeconomics Gary D. Lynne, 2020-11-13 This book presents the Metaeconomics Framework and Dual Interest Theory which weave the empathy based moral and ethical dimension back into key economic questions Metaeconomics addresses the problem of placing too much emphasis on the market or the government and thus argues that seeing the link between ego and empathy self and

other interest and market and government will lead to a more just fair and sustainable polity The unique Dual Interest Theory proposes that ego based self interest and empathy based other interest are joint and internal to each person it maintains the original proposition from Adam Smith that each person maximizes their own interest which Metaeconomics makes clear involves balancing the two joint interests although self interest is more primal The book begins with an explanation of how Metaeconomics connects the other kinds of economics The book then provides a series of applications of Metaeconomics in heated policy issues such as elections finance family food health natural resources education taxes and extreme inequality among others Finally the book concludes that the only way to save capitalism is to bring empathy into both private and public actions and bring about a more humane balance in market and government *Herbicide Resistance and World Grains*

Stephen B. Powles,Dale L. Shaner,2001-03-13 Written by experts from across the globe *Herbicide Resistance and World Grains* evaluates the weed and herbicide management systems in major world grain crops such as soybean maize rice and canola The book examines the impact of transgenic crops and new technology on resistance management It provides background information and offers practical *Proceedings* ,1997 *Agricultural Globalization Trade and the Environment*

Charles B. Moss,Gordon C. Rausser,Andrew Schmitz,Timothy G. Taylor,David Zilberman,2012-12-06 The relative prosperity in U S agriculture that attended the passage of the Federal Agriculture Improvement and Reform Act of 1996 was followed by a general decline in U S agricultural prices from 1998 to 2000 This trend in declining prices continues through the year 2001 despite the movement toward more liberalized agricultural trade Trade liberalization has been the result of a variety of factors including the implementation of the Uruguay Round Agreement and the establishment of a variety of regional trade agreements such as the North America Free Trade Agreement Needless to say in the face of falling agricultural prices and increasingly liberalized agricultural trade the agricultural policy scene is an extremely complex one both locally and globally The chapters in this volume look to understand this complexity by addressing the interaction between trade the economic well being of the farm sector and the possibilities for future policy reform The chapters collected here explore a number of different issues including the operation of the tariff rate quotas established under the Uruguay Round Agreement the implications of sanitary and phytosanitary restrictions on trade and the growing controversy over genetically modified organisms In addition several chapters analyze the interaction between agricultural trade and environmental concerns **Africa and**

Sustainable Global Value Chains Regina Frei,Sherwat Ibrahim,Temidayo Akenroye,2022-02-07 This book contains a collection of studies on the interactions between businesses in Africa and Global Value Chains GVCs in terms of social environmental and economic sustainability This is particularly pertinent given the asymmetrical power distribution between the global buyer and the African supplier their governance relationships and the ongoing competitive pressures to reduce costs and increase flexibility to meet GVC demands Rather than focusing on the sustainability of a single organization GVCs address the sustainability of inter firm value chains and global industries as a whole With little differentiation between value

chain creation and social environmental degradation extending to people and raw material extraction upstream and disposal or recycling downstream sustainability issues need to be at the forefront of African business research interests Nowadays sustainability is considered a competitive advantage for a firm looking to join a GVC Whether sustainability is approached from the viewpoint of an exporting firm motivated to join a GVC in its respective industry or whether a firm's continuing contractual or collaborative relationship with a buyer depends on its compliance with sustainability standards both approaches focus on the ability of firms in Africa to benefit from joining sustainable GVCs

Knowledge Generation and Technical Change Steven Wolf, David Zilberman, 2012-12-06 Knowledge generation and transfer mechanisms are being transformed in important and controversial ways Investment in research and development has increased in response to recognition that scientific productivity is tightly connected to economic dynamism Patent protection has been expanded in order to stimulate higher levels of private investment Intellectual property rights held by public organizations and researchers are now increasingly transferred to private organizations to accelerate the diffusion and enhance the value of knowledge produced by public agencies and universities Additionally new institutions such as university offices of technology transfer venture capital markets and a variety of consortia in knowledge intensive industries are being established throughout the United States and in other parts of the world These changes have led to a repositioning of the state in systems of innovation and an increase in the proprietary character of technical information The purpose of this book is to review and analyze i contemporary transitions in agricultural knowledge generation and extension arrangements from an empirical perspective and ii emerging and contradictory perspectives as to how knowledge systems can be assessed effectively The authors aim to provide the reader with a better understanding of the implications of new biotechnologies and new intellectual property rights regimes on public private relations in science the extent to which benefits from scientific knowledge are being appropriated by private sector actors the diversity and possible outcomes of privatization initiatives in extension and prospects for public goods production and ecological sustainability given contemporary trends The book presents contrasting views on the degree of complementarity and substitution between private and public sector investments in research and extension Recognizing that the labels public and private are incomplete and at times misleading descriptions of the structure and function of coordinating bodies in social systems the analyses highlight ways in which public and private spaces and modes of functioning combine In addition to illustrating a broad range of analytic methodologies useful for studying organizational questions in knowledge systems the authors identify the implications of a range of past and potential institutional innovations

It's a jungle out there - the strange animals of economic organization in agri-food value chains Konstantinos Karantinidis, Stefano Pascucci, Liesbeth Dries, Jean Marie Codron, 2023-08-07 This book aims to explore the variety in organizational forms that exists in the European agri food sector and to identify an appropriate theoretical framework that includes a set of conceptual instruments to analyse this variety Moreover this framework should be helpful in

the exploration of the relationship between organizations and the regulatory domain The book focuses on organizational forms under two perspectives First it underlines the variety in organizational forms and their internal complexity Second it includes a series of case studies from different theoretical perspectives that highlight diversity within the agri food sector spanning from the adoption of standards to producer organizations The book then proposes a conceptual foundation that can help in the design of applied theoretical frameworks to address the variety and the complexity of the organizational modes in agri food supply systems

Globalizing Integrated Pest Management George W. Norton, E. A. Heinrichs, Gregory C. Luther, Michael E. Irwin, 2008-02-28 As food demand has grown worldwide agricultural production has intensified with a concomitant expansion in pesticide use Concerns over pesticide induced health and environmental problems increased pest resistance to pesticides and continued losses due to pests have stimulated the search for alternative pest management solutions As a result integrated pest management IPM approaches have been developed and applied that rely on genetic cultural biological and information intensive pest management alternatives This book presents and critiques the participatory approaches that can be used to globalize IPM It describes the development deployment and evaluation of participatory IPM All the chapters include perspectives from both the US and developing country scientists who are on the front lines of IPM generation and diffusion The book is unique amongst IPM books in that it stresses policy analysis social and economic impact assessment multidisciplinary field research and technology transfer mechanisms

Tomorrow's Agriculture Peters, Prabhu Pingali, 2018-04-17 This title was first published in 2002 This volume represents some of the proceedings of the 24th conference of the International Association of Agricultural Economists IAAE held in Berlin Germany in August 2000 The papers in this volume include the president's address the Elmhirst Lecture and a selection of 20 contributed papers It also includes panel discussion reports reports on the discussion groups and mini symposia poster paper abstracts and the synoptic view presented at the close of the conference by the new president of the IAAE Joachim von Braun The theme of the 24th conference was Tomorrow's Agriculture Incentives Institutions Infrastructure and Innovations reflecting the rapid advances being made in the application of biotechnology in both the developed and developing worlds

Areawide Pest Management Opende Koul, Gerrit W. Cuperus, Norman Elliott, 2008 This book aims 1 to lay out the historical underpinnings of the areawide pest including weeds plant and stored grain insect pests management AWPM and to highlight current activity in the field 2 to delve into concepts that have direct impact on the successful implementation of AWPM which include i biological and ecological concepts important for understanding the dynamics of populations in spatially heterogeneous environments ii the critical role of inter agency and multidisciplinary interactions in the development and implementation of AWPM programmes which are often complex inter agency and intergovernmental endeavours iii the roles of modelling meteorology and databases in AWPM programmes which by their nature are information intensive and iv the importance of economic and sociological evaluation in successful AWPM implementation and 3 to compile recent case examples of pest

management programmes that have used the AWPM approach A survey in presented on a wide variety of programmes developed for protecting agricultural and natural resource systems and which use a wide range of pest management tactics

Climate Change and Sub-Saharan Africa: The Vulnerability and Adaptation of Food Supply Chain Actors John K. M. Kuwornu, 2019-05-05 The adverse effects of climate change and climate variability have become some of the biggest environmental and socio economic challenges for society and for food supply chain actors in particular Serving as a serious inhibitor to the attainment of food security climate change poses a fundamental threat to the availability accessibility stability and utilization of nutritious food and quality drinking water The threat of this global phenomenon is not only apparent from the difficulties faced by all food supply chain actors but is also felt acutely by households dependent on semi subsistence agriculture As evidenced by numerous studies conducted by the academic community governmental and non governmental organisations climate change and climate variability will have disastrous effects on entire food supply chains across the world This edited volume looks to address How vulnerable are food supply chain actors to climate change and climatic variability What adaptation strategies are they adopting How is the resilience of food supply chains being supported Are they being financed and or supported by international organizations to cope with climate change And what governmental support are they receiving to help cope with climate change This book is an essential resource for students lecturers researchers agribusinesses marketing firms agricultural institutions climate change adaptation institutions policymakers and many others with an interest in agricultural development and the global food industry **Diplomacy on the Jordan** Munther J. Haddadin, 2012-12-06 The Jordan River has attracted the attention of people around the world The natives call it the Shari a or the Code of God The religious importance of the river is known to mankind Travelers and explorers sailed down its course from north to south All have noted that its waters are turbulent its path windy and its meandering course steep Old civilizations flourished in the Jordan River basin The territories surrounding it were known to have been ruled by the same political authority for centuries Riparian States came to exist in its basin only after the First World War when Britain and France shared the spoils of the eclipsed Ottoman Empire Lebanon Syria Jordan and Palestine were created as separate political entities and became riparian parties on the Jordan Palestine became the target of the Zionist Movement for the establishment of a national home for the Jews They were supported by Britain who issued the Balfour Declaration in 1917 pledging support for their objective The Jewish State Israel was established in part of Palestine in 1948 and became another riparian party on the Jordan River **The Oxford Handbook of Land Economics** JunJie Wu, 2014-06-20 What do economists know about land and how they know The Oxford Handbook of Land Economics describes the latest developments in the fields of economics that examine land including natural resource economics environmental economics regional science and urban economics The handbook argues first that land is a theme that integrates these fields and second that productive integration increasingly occurs not just within economics but also across disciplines Greater recognition and integration

stimulates cross fertilization among the fields of land economics research By providing a comprehensive survey of land related work in several economics fields this handbook provides the basic tools needed for economists to redefine the scope and focus of their work to better incorporate the contemporary thinking from other fields and to push out the frontiers of land economics The first section presents recent advances in the analysis of major drivers of land use change focusing on economic development and various land use markets The second section presents economic research on the environmental and socio economic impacts of land use and land use change The third section addresses six cutting edge approaches for land economics research including spatial econometric simulation and experimental methods The section also includes a synthetic chapter critically reviewing methodological advances The fourth section covers policy issues Four chapters disentangle the economics of land conservation and preservation while three chapters examine the economic analysis of the legal institutions of land use These chapters focus on law and economic problems of permissible government control of land in the U S context
