Flight From Science And Reason:

The Flight from Science and Reason Paul R. Gross, Norman Levitt, Martin W. Lewis, 1996 Forty two essays responding to the thesis that the American academic community is turning away from the Enlightenment ideals of rationalism as the 20th century closes in on the millennium The papers diverge widely from this central thematic hub delving into subjects as varied as the public image of **The Flight from Science and Reason** Paul R. Gross, Norman Levitt, Martin W. Lewis, 1996

The Rebirth of Classical Political Rationalism Leo Strauss, 1989-01-15 This concise and accessible introduction to Strauss's thought provides for wider audience a bridge to his more complex theoretical work Editor Pangle has gathered five of Strauss's previously unpublished lectures and five hard to find published writings and has arranged them so as to demonstrate the systematic progression of the major themes that underlay Strauss's mature work These essays display the incomparable insight and remarkable range of knowledge that set Strauss's works apart from any other twentieth century philosopher's Charles R Kesler National Review , *Beyond the Science Wars* Ullica Christina Olofsdotter Segerstråle, Ullica Segerstråle, Ullica Christina Olofsdotter Segerstråle, 2000-08-03 Contextualizes the Science Wars from interdisciplinary sociological historical scientific political and cultural perspectives [What Did the Biblical Writers Know and When Did They Know It?](#) William G. Dever, 2001-05-10 For centuries the Hebrew Bible has been the fountainhead of the Judeo Christian tradition Today however the entire biblical tradition including its historical veracity is being challenged Leading this assault is a group of scholars described as the minimalist or revisionist school of biblical studies which charges that the Hebrew Bible is largely pious fiction that its writers and editors invented ancient Israel as a piece of late Jewish propaganda in the Hellenistic era In this fascinating book noted Syro Palestinian archaeologist William G Dever attacks the minimalist position head on showing how modern archaeology brilliantly illuminates both life in ancient Palestine and the sacred scriptures as we have them today Assembling a wealth of archaeological evidence Dever builds the clearest most complete picture yet of the real Israel that existed during the Iron Age of ancient Palestine 1200 600 B C Dever's exceptional reconstruction of this key period points up the minimalists abuse of archaeology and reveals the weakness of their revisionist histories Dever shows that ancient Israel far from being an invention is a reality to be discovered Equally important his recovery of a reliable core history of ancient Israel provides a firm foundation from which to appreciate the aesthetic value and lofty moral aspirations of the Hebrew Bible [Feminist Epistemology and Philosophy of Science](#) Heidi E. Grasswick, 2011-05-16 Having enjoyed more than twenty years of development feminist epistemology and philosophy of science are now thriving fields of inquiry offering current scholars a rich tradition from which to draw In addition to a recognition of the power of knowledge itself and its effects on women's lives a central feature of feminist epistemology and philosophy of science has been the attention they draw to the role of power dynamics within knowledge seeking practices and the implications of these dynamics for our understandings of knowledge science and epistemology Feminist

Epistemology and Philosophy of Science Power in Knowledge collects new works that address today's key challenges for a power sensitive feminist approach to questions of knowledge and scientific practice The essays build upon established work in feminist epistemology and philosophy of science offering new developments in the fields and representing the broad array of the feminist work now being done and the many ways in which feminists incorporate power dynamics into their analyses

Crisis of the Strauss Divided Harry V. Jaffa, 2012-08-26 Leo Strauss 1899 1973 was the greatest mind in political philosophy in the twentieth century and possibly in other centuries as well That I am well aware is a judgment I share with very few if any So writes Harry V Jaffa in his epilogue to this volume Including an extensive unpublished essay entitled Straussian Geography A Memoir and Commentary *Crisis of the Strauss Divided* brings together a collection of Jaffa s published arguments defending and explaining that judgment written during the 40 years since Strauss s death The volume includes arguments of those who have disagreed with Jaffa about Strauss s teaching and about the nature of political philosophy These wide ranging exchanges explore many of the great themes of political philosophy and in particular the implications of Strauss s thinking for America and modern civilization

Kauffman, 2002 According to James M Kauffman too much of what is said today about educational reform is nonsense that shortchanges students parents and taxpayers This deforms education rather than reforming it The primary objective of this book is to help teachers teacher educators policy makers and parents think more critically about current rhetoric about education Reason and science in the enlightenment tradition are more helpful in reforming and improving education than political agendas Reform should focus on instruction Education must address the full range of learners from those who are mentally retarded to those who are intellectually gifted Special education multicultural education and standardized testing are among the controversial issues explored Extremes of both left and right ideologies are rejected in favor of careful thinking and sound judgment **The Humanities and the Dynamics of African Culture in the 21st Century** John Ayotunde Isola Bewaji, Kenneth W. Harrow, Eunice E. Omonzejie, 2017-05-11 That Africa is at a crossroads in an increasingly globalised world is indisputable Equally unassailable is the fact that the humanities as a broad field of intellection research

and learning in Africa appears to have been pigeonholed in debates of relevance in the development aspirations of many African nations Historical experiences and contemporary research outputs indicate however that the humanities in its various shades is critical to Africa's capacity to respond effectively to such problems as security corruption political ineptitude poverty superstition and HIV AIDS among many other mounting challenges which confront the people of Africa The vibrancy and resilience of Africa's cultures against these and other odds of globalisation episodes in the course of our history demand the focused attention of academia to exploit their relevance to contemporary issues This collection provides a comprehensive overview of issues in the humanities at the turn of the 21st century which create a veritable platform for the global redefinition and understanding of Africa's rich cultures and traditions Such areas covered include ruminations in metaphysics and psychology pathos and ethos cinematic and literary connections and historical conceptualisations

Who's Afraid of Charles Darwin? Griet Vandermassen, 2005-02-10 Why should feminism and the biological sciences be at odds And what might be gained from a reconciliation In *Who's Afraid of Charles Darwin* Vandermassen shows that rather than continuing this enmity feminism and the biological sciences and in particular evolutionary psychology have the need and the potential to become powerful allies Properly understood the Darwinian perspective proposed in this volume will become essential to tackling the major issues in feminism

Social Studies of Science and Technology: Looking Back, Ahead B. Joerges, H. Nowotny, 2012-12-06 BERNW ARD JOERGES AND HELGA NOWOTNY YET ANOTHER TURN The thing that doesn't fit is the thing that's most interesting

Richard Feynman This volume was originally conceived as a contribution to yet another turn not captured by one of the many adjectives that have served to describe the collective meandering of the scholarly community in search of direction It was meant to mark the millennial turn a seemingly purely chronological event but one in search for great meanings and invested with loaded significances The editors wanted to seize the opportunity of the moment in order to pause and reflect on the sociology and history of social studies of science and technology The moment came and went and the new millennium barely nine months later thrust its historical marker upon the world through a horrendous and cruel shock in an unforeseen and unforeseeable way Since then the world appears more vulnerable and volatile fragmented and fraught with uncertainty The universal values as bequeathed by the Enlightenment are either refused or appear refuted The dream of a universal civilization which has accompanied the unfolding of the existing multiple modernities in their historically unique trajectories has been discarded and its promises in tatters
