experiences This book makes the ideal first read for anyone who intends to start flight training it should be considered Flight Training 101 Diamond does not assume any aviation knowledge on the part of the reader His book is the ideal handbook for student pilots covering such topics as why people fly the process of learning to fly including money matters health requirements time commitments school and instructor options and the tests involved and the privileges and limitations associated with a pilot certificate From there the author dispels frequent concerns of learning to fly such as the realities of engine failures midair collisions and weather The airplane is covered with an orientation to the controls and instrumentation and showing which maneuvers students will be flying throughout the pilot curriculum The book concludes by discussing which gizmos can help with training which can hurt the learning process and which are necessary if not only for the cool factor Since the author is also an accomplished illustrator the text is accompanied by some of the best full color and 3D graphics found in any aviation textbook readers will have a solid mind s eye view of the flight training process As a result they will enter their flight training program completely prepared knowing exactly what needs to happen to get their license understanding what to expect and being able to make the right decisions so no time is wasted at the airport or in the airplane taking the short approach to flight training *Flight Instructor's Lesson Plan Handbook* Edwin Quinlan,2000
