Flight To Anywhere A Navigators Life:

Lost at Sea John Wukovits, 2023-05-16 The forgotten story of American war hero Eddie Rickenbacker's crash landing in the Pacific during World War II and his incredible twenty three day crusade to keep his crew alive In the darkest days of World War II an unlikely civilian was sent to deliver a letter from Washington to General MacArthur in New Guinea Eddie Rickenbacker was a genuine icon a pioneer of aviation the greatest fighter pilot of the First World War recipient of the Medal of Honor who'd retired to become a renowned race car driver Now in his fifties one of the most admired men in America Rickenbacker was again serving his nation riding high above the Pacific as a passenger aboard a B 17 But soon the plane was forced to crash land on the ocean surface leaving its eight occupants adrift in tiny rubber life rafts hundreds of miles from the nearest speck of land Lacking fresh water and with precious little food the men faced days of unrelenting sun followed by nights shivering in the cold fighting pangs of hunger exhaustion and thirst all the while circled by sharks Each prayed to see a friendly vessel on the horizon and dreaded the arrival of a Japanese warship Meanwhile as the US Navy scoured the South Pacific American radio and newspapers back home parsed every detail of Rickenbacker's disappearance and an adoring public awaited news of his fate Using survivors accounts and contemporary records award winning author John Wukovits brings to life a gripping story of survival leadership and faith in a time of crisis [Delivery](#) Milton Golin, 2010-05-19 You are there in these real life stories A necessary inflight armed mutiny Evasion of enemy planes near Mount Everest storms A jailhouse talk with the dynamiter of an airliner Participation in a White House reception activity in an Oval Office session Here is a must read notably for the World War II buff and the serious news junkie Giovanna Breu former national editor People Magazine High drama of investigative reports involving disaster heroism air crashes serial murder hidden American history childhood and other health disorders and wartime crises **Flight to Anywhere :a Navigator's Life** Mark Farmer, 1998 **The Navigator** , 1980 **So Many Ways to Die** Scott R. PM Johnson,2016-04-19 EARTH HAS CHANGED The old world order collapsed following the meteor impacts of 2031 when fire rained down from the skies instantly vaporizing millions Billions more died during the Long Winter and resource wars that followed Over one hundred years have passed since those devastating events and new societies have formed around the globe In North America the fragile peace that exists among the continent s independent nations and city states is under threat The ambitious Grand Guardian of the People s Republic of America is mobilizing his massive war machine in order to make real his dream of reunifying a former great power But on the eve of the offensive a leading scientist dies under mysterious circumstances though not before he entrusts another with the key to unlocking a secret A secret so powerful it could not only unravel the Grand Guardian s designs but also doom or save all of humanity Book 2 The Warrior and Book 3 The Renegade and Book 4 The Conqueror now available *Stormchasers: The Hurricane Hunters and Their Fateful Flight into Hurricane Janet* David Toomey,2003-06-17 Fifty years after Isaac s Storm a riveting story of the first Hurricane Hunters and the one crew who paid the ultimate price In a virtual age when tempests are monitored by global positioning and The Weather Channel Stormchasers reminds us that our first understanding of hurricanes was directly built on the risks and sacrifices of living breathing heroes writes Hampton Sides author of Ghost Soldiers In September 1955 Navy Lieutenant Commander Grover B Windham and a crew of eight flew out of Guant namo Bay into the eye of Hurricane Janet swirling in the Caribbean a routine weather reconnaissance mission from which they never returned In the wake of World War II the Air Force and the Navy had discovered a new civilian arena where daring pilots could test their courage and skill These Hurricane Hunters flew into raging storms to gauge their strength and predict their paths Without computer global positioning or satellite support they relied on rudimentary radar systems to locate the hurricane s eye and estimated the drift of their aircraft by looking at windblown waves below Drawing from Navy documents and interviews with members of the squadron and relatives of the crew Stormchasers reconstructs the ill fated mission of Windham s crew from preflight checks to the chilling moment of their final transmission *Straight & True* Hugh Soar,2012-10-08 The arrow essentially a specialized spear is among the most ancient human inventions and can be found in cultures throughout the world The need to launch a projectile farther and with greater accuracy than is possible with the human arm gave rise to a variety of solutions Spearthrowers which extend the length of the user s arm and therefore transfer greater power to the projectile

were developed far back in prehistory and both the American Indian atlatl and the Australian woomera are examples of this technology Blowpipes too are recorded in various cultures and represent another ancient technology It was soon discovered that a stringed bow could launch a small spear like projectile we now know as the arrow and this combination became the dominant method for shooting projectiles for tens of thousands of years A wonderfully simple device the arrow and bow revolutionized both hunting and warfare not only because of the speed force and accuracy that could be achieved but by the fact that the arrow makes almost no sound as it flies toward its target providing an essential element of surprise In *The Arrow A Brief History* Hugh D H Soar describes the transition from hand thrown spear to bow launched arrow and then follows the arrow s developments in cultures around the world and across time The book describes arrows found in Neolithic sites those used by North and South American Indians including a detailed discussion of poison tipped arrows arrows used in China Japan and Mongolia and finally the arrow in Europe where it was successfully paired with the longbow during the Middle Ages The author completes his survey with the changes in technology introduced during the twentieth century though the use of aluminum and other light weight metals as well as synthetic materials to construct parts of the arrow Relying on his considerable knowledge accumulated through decades of research the author provides the reader with an appreciation for a humble device that coupled with the bow changed the history of the world
